

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

And whereas, on June 27, 1754, the Most Noble Marquis of CARNARVAN, Grand Master, with his Deputy and Wardens, and the Grand Hooge, did appoint a Committee to review and make such Alterations and Additions, consistent with the Laws and Rules of MASONRY, as they the fail Committee should find necessary to be made to the former Editions of the Book of Constitutions for the Use of the regular Lodges; which said Alterations and Additions were made accordingly and approved of, and recommended, by the Grand-Master, Deputy, and Wardens to the Fraternity, as the only Book of Constitutions:

And whereas on the ninth Day of April, 1766, it was thought necessary, by the Right Honourable Lord BLAYNEY, Grand Master, with his Deputy and Wardens, and the Grand Lodge, to appoint a Committee to revise, alter, and make some Additions to the last mentioned Book of Constitutions, consistent with the Laws and Rules of Masonry, for the Use of regular Lodges: And whereas the said necessary Alterations and Additions have been made, and this new Edition of the Book of Constitutions has been published with great Care and Fidelity, under the Inspection of our said Committee:

The History of MASONRY from the CREATION abroughout the known World; till true old ARCHITECTURD, demolished by the Goths, was revived in ITALY.

CH AP. I. wall with

The State of MASONRY from the CREATION to the FLOOD.

HE Divine Wisdom having resolved to form the WORLD, and to reduce a wild CHAOS to a fair, regular, and permanent System, the Almighty ARCHITECT not only traced out the whole Plan of the Universe, but gave Life and Being, Form and Figure to every Part therefor.

WHEN the Fiat for LIGHT was given, the dull, heavy, and terrene Parts of Matter, which over-clouded the Empansium, B

obeyed the Almighty's Command, and Began to range into Form and Order. Some subsided to the Center of the Earth; but the lucid and fiery Particles ascending higher, separated LIGHT from DARKNESS, and made the first Day and Night; which became more lucid and serene by the Work of the second Day; when the Waters were drawn off from the Chaos, and were dismissed to their several Orbs and Stations.

THE delightful Element of the Air was disentangled and extracted from the Chaos; and next Day the Waters of the Earth being gathered into one Place, the dry Land appeared, and was furnished with Grass for Cattle, and Herbs, and Fruit-trees for the Nourishment of Man. On the fourth Day the same Divine Wisdom created the glorious Orbs of the Sun to rule the Day, and the Moon to rule the Night; and for the Measure and Computation of Time.

THESE great Bodies thus set in Order; he proceeded to the Creation of the ANIMAL World; and began with Fish and Fowl, which the Divine Power formed out of such Matter as was mixed and concocted with the Water, and gave them a prolifick Virtue, and a natural Instinct for Generation, to preserve their Species, and to multiply their Individuals; a Virtue which he also bestowed on the terrestrial Animals, both Savages, tame Creatures, and creeping Things.

ALL Things necessary for Man's Felicity being * perfected by the Architect and Grand-Master of the M. M. I.

Universe according to Geometry, and so ordered and disposed as to contribute, in their several Capacities, to his Benefit and Delight; then Man was also

THE first Christians computed their Times as the Nations did among whom They lived till A. D. 532, when Dionysius Exiguus, a Roman Abbot, taught them first to compute from the Birth of Christ: But He lost 4 Years, or began the Christian Era 4 Years later than just.

Therefore,

also created and introduced into the World in a Manner and Solemnity not unbecoming the Lord and Governor of it. Work so truly Divine, that the Power of no subordinate Intelligence could be capable of it; and was not perfected without a peculiar Consultation of the Divine Persons: The Result whereof was to create Man after the Image of GoD; with a Heart thoroughly instructed in the noble Science of Geometry, for his own Improvement, and for the Instruction of his Descendants, in the Art of applying every Part of the Creation to the Glory of the Creator, and to the Benefit of the Creature: with a Mind fortified to bear the Divine Presence, qualified for the Divine Converse, fully illuminated by the Divine Spirit; and with a Body indulged with the Privilege of Immortality, adorned with fuch Comeliness and Majesty, as might challenge the Rule and Jurisdiction of this inferior World; and blessed with an universal Harmony in all its Faculties; an Understanding fraught with all Manner of Knowledge; a Will submitted to the Divine Pleasure; Affections placed upon their proper Objects; Passions calm and easy; and a Conscience quiet and serene, with resplendent Holiness and perfect Felicity.

How ADAM exercised himself in that noble Science in his Paradisaical State, does not certainly appear. But there is great

Reason

Therefore, the according to the Hebrew Chronology of the Old Testament, and other good Vouchers, CHRIST was truly born in some Month of the Year of the World, or A. M. 4000, yet these 4 Years added make — Not before the Birth of Christ, but before the Christian Era, viz. -For the true Anno Domini, or Year after Christ's Birth, is But the Masons being used to compute by the Vulgar Anno Domini, or Christian Era, and so these Letters A. M. 1756 and adding to it not 4004 as it ought, but fignify Anno Mundis or Year the strict Years before Christ's Birth, viz. of the World: and here 4000 B. C. is not Before Christ, They usually call this the Year of MASONRY 5756 but Before the Christian Instead of the accurate Year and we must keep to the Vulgar Computation.

The A. M. or Anno Mundi is the same followed by User and Prideaux, &c.

Reason to believe that he employed himself in forming a well proportioned and convenient Plan of shelter from Heat; of Retirement, Rest, and Repast; and of Worship; and in laying out and cultivating his Garden of Delights. However, this very Man, whom Gov had created upright, by thirsting after illicit Knowledge, foon forfeited the Favour of the Almighty; and his Right to that happy State: By our first Parents Disobedience to the Divine Precept in Paradife, they defaced the beautiful Works of the Creation; entailing Sin, Pain, and Death upon their Posterity: With guilty Shame they are forced to exchange fair EDEN'S Garden for an uncultivated World, which produced nothing but what was the Effect of toilfome Labour; and where they had no other prospect than a sad Variety of Sorrow, Care, and Trouble: a flate which, however impaired, we cannot, in any wife, suppose to be ignorant of the LIBERAL SCIENCES, much less of Geometry: in which it was found to be of the utmost Consequence, to instruct his Offspring, to enable them to trace the Wildom, Strength, and Beauty displayed in all the wonderous Works of Creation; and by which feveral curious Arts were invented, which to this Day are the Glory of Mankind, and an Ornament to the World.

Hence it is, that there is in Man a Fund of Industry, and a certain happy Ingenuity in inventing ARTS and SCIENCES, whether mechanical or liberal; all of which have a mighty Tendency to the Delight and Benefit of Mankind. And therefore we need not question but that the wise God, by putting these Singularities in our Nature, intended, as another End of our Creation, that we should not only live happily ourselves, and spend our Time in beneficial Occupations, or agreeable Amusements, but be likewise mutually assistant to each other, Instruments for the Good of HUMAN SOCIETY; which, in the Scripture Phrase, is to be all of one Mind, having Compassion one for another, and to

have fet an Example to the Free and Accepted.

WE may be very well affured, that ADAM instructed his Defeendants in GROMETRY, and the Application of it to whatever Crafts were convenient for those early Times; without which, the Children of Men must have lived in Woods, Dens, and Caves, like Brutes; or at least in Arbours made of Branches of Trees, or in some poor and wretched Hovels of Mud.

CAIN, with his Family and Adherents, being expelled from ADAM's Altars, and pre-instructed in the Principles of Geometry and Architecture, Bef. C. 3879. forthwith built a strong City, and called it DEDICATE OF CONSECRATE, after the Name of his eldest Son Enoch; whose Race following this Example, improved themfelves not only in Geometry and Masoury, but made Discoveries of several other curious Arts*. Thus LABAL, the eldest Son of LAMECH, first invented the Use of Tents; for in those early Days we cannot suppose the feeble Inhabitants of the Earth were capable of erectling many Buildings in Stone and Timber; and he taught the Art of managing those Herds of Cattle, which heretofore had been dispersed wild through the Land: JUBAL, his third Son, was the Inventor of Musick, and mufical Instruments, especially the Harp and Organ: and TUBAL CAIN, his youngest Son, found out the Art, of forging and working Metals, of making Armour and war-like Weapons; and was also famous for his great Strength and Skill in War.

THE Defeendants of Serial came nothing behind those of CAIN, in the Cultivation of GROMETEN and MASONEY: This Patriarch, of the other half of Mankind, must have greatly profited in those noble Sciences under the continual Tuition of ADAM, with whom he lived till the Year of the World 930, and succeeded him then in the grand Direction of the CRAFT; affisted

affifted by * Enosh, Kainan, Mahalaleel, Jared, and ENOCH; who, as a Monument of his superior Abilities and Love to Posterity, foreseeing the universal Desolation, which would foon happen by Water or Fire, and deprive Mankind of those ARTS and SCIENCES already improved, raised two large Pillars, one of Brick, the other of Stone, and inscribed thereon an Abridgment of the Arts and Sciences, particularly Geome-TRY and MASONRY, that, if the PILLAR of Brick happened to be overthrown by the Flood, THAT of Stone might remain; which + Josephus tells was to be seen, in his Time, in the Land of Siriad, by the Name of SETH's or ENOCH'S PILLARS. And from the Contents of these PILLARS we have great Reason to believe, that the enterprising Genius of Man did not confine itfelf to the Art of Building, and working in Brass and Iron, and to Musick; but that it very early exerted itself in Astronomy, and every Science, useful and entertaining.

None can doubt but Astronomy, tho' preceded by Geome-TRY, was invented near the Commencement of Time. As there is nothing more surprizing than the Regularity of the beavenly LUMINARIES, it is easy to judge that one of the first Curiosities of Mankind was to confider their Courses, and to observe the Periods of them. It was not Curiofity only that prompted Men to apply themselves to astronomical Speculations; Necessity itself may be said to have obliged them to it. For if the Seasons are not observed, which are distinguished by the Motion of the Sun, it is impossible, to succeed in Agriculture. If the Duration of the Month and Year were not determined, a certain Order could not be established in civil Affairs, nor could the Days allotted to the Exercise of Religion be fixed. Thus as neither AGRICULTURE, POLITY, nor Religion could dispense with the Want of Astronomy, it is evident that Mankind were obliged to apply themselves to the Sciences from the Beginning of the World.

THE Posterity of SETH, who had for some Ages retained their Integrity in the true Worship of God, and a close Application to Sciences, were at last infected with the same Contagion of Profaneness and Immorality, as the Race of Cain; so that all Sorts of Wickedness over-spread the Earth, and reigned triumphant: But at last ended in their Destruction and Extirpation by the Deluge, in which all the human Race perished, except Noah and his Family*. Here was a dismal Face of Things; instead of the Earth, adorned with the Productions of Nature, and the Improvements of Art, a watery Desert appeared, which offered nothing to the View of Heaven, but the floating Wrecks of Man and his Fellow Creatures, who were swept away with the common Destruction; which was the most dreadful and amazing Judgment, the most horrid and portentous Catastrophe that Nature ever yet saw+.

METHUSELAH, with his Son LAMECH and Grandson NOAH, retired from the corrupt Wold*, and in their own peculiar Family preserved the good old Religion of the promised Messas pure, and also the Royal Art, till the Flood: for LAMECH died only five Years before the Flood, and METHUSELAH died a sew Days before it, aged 969 Years: and so he could well communicate the Traditions of his learned Progenitors to Noab's three Sons; for JAPHET lived with him 100 Years, SHEM 98, and HAM 96. * See Gen. vi. 11, 12, 13. † See Gen. vii. 18, &co-† See Gen. vi. 14, &c.

though of Wood only, was fabricated by GEOMETRY, as nicely as any Stone-Building (like true Ship-Building to this Day) a curious and large Piece of Architecture, and finished when Noah entered into his 600 Year; a-board which he and his three Sons and their four Wives ascended \(\): and having received the Cargo of Animals by God's Direction, they were saved in the Ark, while the rest perished in the Flood* for their Immals M.—1656. The morality and Unbekief. From these Masons, or four Grand Officers, the whole present Race of Mankind are descended.

THEY brought with them over the Flood, and afterwards communicated to their Children, GEOMETRY; and the Art of Building. The first Thing NOAH did upon his landing, was to build an Altar +, and offer a burnt Sacrifice of every clean Beast and Fowl. God having accepted the Sacrifice, blessed Noah, and gave him Power over ALL living Creatures, with a Permission to eat them as freely as of the Produce of the Ground: However, he forbid him to eat the Blood of Animals, or to shed the Blood of Man; commanding him to punish Man-slaughter with Death, and to people the World as fast as he could.

Being all of one Language and Speech, It came to pass, as

they journayed from the East towards the West;

they found a Plain in the Land of Shinaar, and
Before Christ dwelt there together, as Noachide, or Sons of

Noah, the first Name of Masons. And when

Noah ordered his Sons, and Grandsons, in the Year 101, in

which Peleg was born to Heber, to disperse and take Posses

fion of the several Parts of the Earth, according to the Partition

he had made, they through fear of the bad Consequence of
Separation, resolving to keep together, assembled in great Numbers on the Plains of Shinaar, so, to build a City and large

Tower.

Name, and prevent their Dispersion, God for their Vanity confounding their Speech*; occasioned that which they endeavoured to avoid. And hence this Tower was called Babel, or Confusion. Upon the Top of this Tower was an Observatory, by the Benefit of which it was that the Babylonians advanced their Skill in Geometry and Astronomy, beyond all other Nations: For when † Alexander took Babylon, Calisthenes, the Philosopher, who accompanied him thither, found they had astronomical Observations for 1903 Years backwards from that Time, which carries up the Account as high as the 115th Year after the Flood, and sisteen after the building of the Tower of Babel. All which shews that, after the Dispersion, they still carried with them the Knowledge of Masonry, and improved it to a great Degree of Persection.

NIMROD;, or Belus §, the Son of Cush, the eldest Son of HAM, and Founder of the Babylonian Monarchy, kept Possession of the Plain, and founded the first great Empire at BABYLON, and became GRAND MASTER of all MASONS, after > the general Migration. He built many splendid Cities in SHI-NAR: And under him flourished those learned Mathematicians. whose Successors were stiled Magi, or wife Men, by way of Eminence for their superior Knowledge. The Migration from SHINAR commenced 53 Years after they began to build the Tower, or 154 Years after the Flood. And they went off at various Times, and travelled North, South, East, and West, with their mighty Skill, and found the good Use of it in settling their Colonies. And from SHINAR, The Science and the Art were carried to the distant Parts of the Earth, notwithstanding the Confusion of Dialects: Which gave Rise to the Masons Faculty, and universal Practice, of conversing without speaking, and of knowing

knowing each other by Signs and Tokens: which, says an old Tradition, they settled upon the Dispersion, or Migration, in case any of them should meet in distant Parts, who had been before in Shinar.

THUS the Earth was again planted and replenished with MASONS, whose various Improvements we shall trace.

MITZRAIM, or MENES, the second Son of HAM, carried to, and preserved in EGYPT, or the Land of Year of the MITZRAIM, their original Skill, and much culti-Flood 160. Before Christ vated the Art: For antient History informs us * of 2188. the early fine Taste of the Egyptians, their many magnificent Edifices, and great Cities, as Memphis, Heliopolis, Thebes, with 100 Gates, &c. besides their Palaces and Sepulchres, their Obelisks and Statues, the Colossal Statue of Sphinx, whose Head was 120 Feet round, and their famous pramits, the greatest being reckoned the first or earliest of the seven Wonders of Art, after the general Migration. Some say it was built of Marble, brought from the Quarries of Arabia; for there is no Vestige of a Quarry near it. Others call them artificial Stones made on the Spot, most of them 30 Feet long. The Pile at Bottom was 700 Feet square, and 481 Feet high; but Others make it much higher: And in rearing it 360,000 Masons were employed for 20 Years, as if all the People had joined in the GRAND DESIGN.

THE Egyptians excelled all Nations also in their amazing LABYRINTHS, One of them covered the Ground of a whole Province, containing many fine Palaces, and 100 Temples, disposed in its several Quarters and Divisions, adorned with Columns of the best Porphyry, and the accurate Statues of their Gods and Princes; which Labyrinth the Greeks, long afterwards, endeavoured to imitate, but never arrived at Its Extension and Sublime.

THE

[11]

THE Successors of Mitstaim (who stiled themselves the Sons of antient Kings) encouraged the Royal Art down to the last of the Race, the learned King Amasis.

BUT History fails us in the South and West of Africa. Nor have we any just Accounts of the fair and gallant Posterity of Noah's eldest Son JAPHET, that first replenished vast old Scytbia, from Norway Eastward to America; nor of the Japhetites in Greece and Italy, Germany, Gaul and Britain, &c. till their original Skill was lost: But, no doubt, they were good Architects at their first Migration from Sbinar.

SHEM, the second Son of Noah, remained at Ur of the Chaldees in Shinar, with his Father and great Grandson Heber, where they lived private and died in Peace; but Shem's Off-spring travelled into the South, and East of Great Asia, viz. Elam, Ashur, Arphaxad, Lud, and Aram, with Sala the Father of Heber; and their Offspring propagated the Science and the Art as far as China and Japan: while Noah, Shem, and Heber, diverted themselves at Ur, in Mathematical Studies, teaching Peles the Father of Rehu, Father of Serus, Father of Nachor, Father of Terah, Father of Abram, a learned Race of Mathematicians and Geometricians *.

Thus Abram, born two Years after the Death of Noah †, had learned well the Science and the Art, before the God of Glory called him to travel from Ur † 1. M. 2008. of the Chaldees, and to live a Peregrin, not in Stone and Brick, but in Tents erected also by Geometry. So travelling with his Family and Flocks through Mesopotamia, he pitched at Charran*, where old Terah, in five Years, * 1. M. 2078. died, and then Abram, aged 75 Years, travelled

into

[12]

into the Land of the Canaanites*: but a Famine foon forced him down to Egypt; and returning next Year,

*A.M.2083. he began to communicate his great Skill to the Chiefs of the Canaanites, for which they honoured him as a Prince.

ABRAM transmitted his Geometry to all his Off-spring; Isaac did the same to his two Sons, and Jacob well instructed his Family, of which we have a clear Example in his Son Joseph, who retained such strong Ideas of the early Instructions received in his Father's House, that he excelled the Egyptian Masons in Knowledge, and, being installed their Grand Masons in Knowledge, and, being installed their Grand sudden by the Command of Pharaoh, employed them in building many Granaries, and Store-Cities throughout the Land of Egypt, to preserve them from the direful Effects of a long and severe Famine, before the Descent of Jacob and his Family.

The Descendants of Abraham, being Sojourners and Shepherds in Egypt, practised very little of Architecture,
except the building of Tents, till about eighty
Years before their Exodus; when, by the overruling Hand of Providence, they were trained up
to the building with Stone and Brick and built for the Egyptians the two strong Cities of Pithom and Raamasis, in order to
make them expert Masons, before they possessed the promised
Land, then famous for good Architecture.

AFTER ABRAM left Charran 430 Years, Moses marched out of Egypt, at the Head of 600,000 Hebrew Males, marshalled in due Form; for whose sake GOD divided the Red-Sea, to let them pass through, and drowned Pharaoh and the Egyptians that pursued them. And in this Peregrination through Arabia to Canaan, GOD was pleased to inspire their Grand Master MOSES, Foshua his Deputy, and

Aboliab and Bezaleel Wardens, with Wisdom of Heart; and so next Year they raised the curious Exed. xxxii. 6. TABER-

TABERNACLE of Tent (where the divine Shethinah refided, and the holy Ark or Cheft, the Symbol of GOD's Presence) which, though not of Stone or Brick, was framed by Geometry, a most beautiful Piece of true symmetrical Architecture, according to the Pattern that GOD discovered to Moses on Mount Sinai, and it was afterwards the Model of Solomon's Temple.

Moses being well skilled in all the Egyptian Learning, and also divinely inspired, excelled all Grand Masters before him, and ordered the more skilful to meet him, as in a Grand Lodge, near the Tabernacle in the Passover-Week, and gave them wise Charges, Regulations, &c. though the Tradition thereof has not been transmitted down to us so perfect as might have been wished.

JOSHUA succeeded in the Direction with KALEB his Deputy, and ELEAZAR the High-Priest, and Phinneas his Son, as Grand Wardens: He marshalled Flood 897. the Israelites, and led them over Jordan, which GOD made dry for their March, into the promised 1451.

Land: The Canaanites had so regularly fortified their great Cities and Passes, that without the special Intervention of Elshaddal, in behalf of his Peculiar, They were impregnable and invincible. And having finished his Wars with the Canaanites, he fixed the TABERNACLE at Skiloe, in Ephraim, ordering the Chiefs of Israel to serve their God, cultivate the Land, and carry on the grand Design of Architecture in the best MOSAICK STYLE.

THE Ifraelites made a prodigious Progress in the Study of Geometry and Architecture, having many expert Artists in every Tribe that met in Lodges or Societies for that Purpose, except when for their Sins they came under Servitude; but their occasional Princes, called Judges and Saviours, revived the Mosaic Style along with Liberty, and the Mosaic Constitution. But they were exceeded

exceeded by the Canaanites, Phanicians, and Sidonians in the SACRED Architecture of Stone, who being a People of a happy Genius, and Frame of Mind, made many great Discoveries and Improvements in the Sciences, as well as in Point of Learning; though it is very probable they excelled much more in the Labours of the Hand, than those of the Head. The Glass of Sidon, the Purple of Tyre, and the exceeding fine Linen they wove, were the Product of their own Country, and their own Inventions: And for their extraordinary Skill in working of Metals, in hewing Timber and Stone; in a Word, for their perfect Knowledge of what was folid, great, and ornamental in Architecture, it need but be remembered, the great Share they had in erecting and decorating of the Temple at ferufalem; than which nothing can more redound to their Honour, or give a clearer Idea of what their own Buildings must have been. Their Fame was such for their just Taste, fine Design, and ingenious Invention, that whatever was elegant, great, or pleasing, was distinguished by way of Excellence, with the Epithet of Sidonian; or for the Artists to be Men of Tyre; and yet the one Temple or Tabernacle of the one true God at Shiloh exceeded them all in Wisdom and Beauty, though not in Strength and Dimensions.

MEAN while, in Lesser Asia, about 10 Years before the Exodus of Moses, Troy was founded and Rood sublime till destroyed by the emulous Greeks, about the 12th Year of Tola Judge of Israel. A. M. 2819.

AND soon after the Exedus, the famous Temple of JUPITER HAMMON in Libyan Africa was erected, that stood till demolished by the first Christians in those Parts.

THE City of Tyre, Sor, or Tfor, was built by a great Body

In after Times, Abibal, King of Tyre, repaired and beautifed that City, and so did his Son HIRAM; under Year of the whom the Kingdom of Tyre was in a very flou-Flood 1292. Before Christ He also built two Temples, one to HERCULES, 1046. and the other to ASTARTE; with many other rich and splendid Buildings.

During all this Period, the Ifraelites, by their Vicinity to the Artists of Tyre and Sidon, had great Opportunities of cultivating the royal Art, which they failed not diligently to pursue, and at last attained to a very high Perfection, as well in operative Masonry, as in the Regularity and Discipline of their well formed Lodges, which through all succeeding Ages has hitherto suffered no Change,

CHAP. III.

The State of MASONRY from the Foundation to the Consecration of the Temple.

DAVID, King of Israel, through the long Wars he had with the Canaanites, had not Leisure to employ his own Craftmen, or those he had obtained from his steady Friend and Ally, King HIRAM of Tyre; for almost his whole Reign was one continued Series of Wars, Fatigues, and Missortunes. But at length,

Year of the Flood 1301. Before Christ 1047. having taken the City of Jebus, and Strong-hold of ZION from his Enemies, he set the Crast about repairing and embellishing the Walls; and public Edifices, especially in Zion, where he fixed his Re-

fidence; and which was from him called the City of *David*: As also by him, or in his Time, the *Old Jebus* obtained the Name of Jerusalem. And being denied the Honour of building that Temple therein, on Account of his being a Man of Blood; worn

Year of the Flood 1333. Before Christ 1015. down with Years and Infirmities, and drawing near his End, he assembled the Chiefs of his People, and acquainted them with his Design to have built a magnificent Repository for the Ark of GOD; having

made great Preparation for it, and laid up immense Quantities of rich Materials; as also Plans and Models for the different Parts of the Structure, with many necessary Regulations for its suture Establishment; but found it was the Divine Will, this great Work was to be accomplished by his Son Solomon. He requested them to affist in so laudable a Work.

THE King died soon after, in the 70th Year of his Age, after having reigned seven Years in *Hebron*, over the House of Judah, and thirty-three over all the Tribes.

UPON

Upon the Death of David, and the Succession of Solomon to the Throne, the Affection Hiram had ever maintained for the Father, prompted him to send a gratural strained for the Father strained for

King Solomon to King HIRAM GREETING.

DE it known unto thee, O King, that my Futher David had it a long Time in his Mind to erect a Temple to the "Lord, but being perpetually in War, and under a Necellaw of " clearing his Hands of his Enemies, and make them all his Tri-" butaries, before he could attend to this great and holy Work. "he hath left it to me in Time of Peace, both to begin, and to " finish it, according to Direction, as well as the Prediction of " AL MIGHTT GOD. Bleffed be his great Name for the " present Tranquillity of my Dominions I and, by his gracious "Affiftance, I fliall now dedicate the best Improvements of " this Liberty and Leisure to his Honour and Worthip. Where's " fore I make it my Request, that you will let some of your People " go along with some Servants of mine to Mount Lebanon, to " affift them in cutting down Materials towards this Building; " for the Sidonians understand it much better than we do. As " for the Workmens Reward, or Wages, whatever you think " reasonable shall be plinetually paid them."

HIRAM was highly pleased with this Letter, and returned the following Answer:

King Hiram to King Solomon.

"OTHING could have been more welcome to me, than to understand that the Government of your blessed Father D "is

"is devolved, by God's Providence, into the Hands of so excellent, fo wise, and so virtuous a Successor: His holy Name be praised for it: That which you write for, shall be done with all Careand Good-Will: For I will give Order to cut down and export such Quantities of the fairest Cedars, and Cypress-Trees, as you shall have Occasion for: My People shall bring them to the Sea-side for you, and from thence ship them away to what Port you please, where they may lie ready for your own Men to transport them to ferusalem. It would be a great Obligation, after all this, to allow us such a Provision of Corn in Exchange, as may stand with your Convenience; for that is the Commodity. We Islanders want most."

SOLOMON was highly pleased with this Answer of the Tyrian King, and, in Return for his generous Offers, ordered him a yearly. Present of 20,000 Measures of Wheat, and 20,000 Measures of fine Oil for his Houshold; besides the same Quantity of Barley, Wheat, Wine and Oil, which he engaged to give Hiram's Masons, who were to be employed in the intended Work of the Temple. Hiram was to fend the Cedars, Fir, and other Woods, upon Floats to Joppa, there to be delivered to whom Solomon should direct, in order to be carried to Jerusalem. He sent him also a Man of his own Name, a Tyrian by Birth, but of Israelitish Descent, who was a fecond Bezaleel, and honoured by his King with the Title of Father; and in 2 Chron. ii. 13. is called HIRAM ABBIF, the most accomplished Designer and Operator upon Earth, who in Solomon's Absence filled the Chair as Deputy Grand Master, and in his Presence was the Senior Grand Warden, or principal Surveyor and Master of the Work*.

THIS

^{*} In 2 Chron. II. 13. HIRAM King of Tyre (called there HURAM) in his Letter to King Solomon, fays, I have fent a Cunning Man, el Huram Abbi; which is not to be translated, like the Vulgate Greek and Latin, HURAM my. Father; for his De-

THIS inspired Master was, without Question, the most cunning, skilful, and curious Workman that ever lived, whose Abilities were not confined to Building only, but extended to all Kinds of Work, whether in Gold, Silver, Brass, or Iron; whether in Linen, Tapestry, or Embroidery; whether considered as an Architect, Sta-D 2

Description, verse 14, refutes it; and the Words import only HURAM of my Father's, or the Chief Master Mason of my Father Abibalus. Yet some think that King HIRAM might call the Architect HIRAM his Father, as learned and wife Men were wont to be called by Royal Patrons in old Times: Thus Joseph was called ABRECH, or the King's Father; and this fame HIRAM the Architect is called So-LOMON's Father, 2 Chron. iv. 6.

Onalah Thuram Abbif la Pelech Shelomoh

Did HIRAM bis Father make to King SOLOMON.

But the Difficulty is over at once by allowing the Word ABBIF to be the Surname of HIRAM the Artist, called above Hiram Abbi, and here called Huram Abbis, as in the Lodge he is called HIRAM ABBIF, to distinguish him from King HIRAM: For this Reading makes the Sense plain and compleat, viz. that HIRAM, King of Tyre, fent to King Solomon the cunning Workman called HIRAM ABBIF.

He is described in two Places, I Kings vii. 13, 14, 15. and 2 Chron. ii. 13, 14-In the first he is called a Widow's Son of the Tribe of Naphtali, and in the other he is called the Son of a Woman of the Daughters of Dan; but in both, that his Father was a Man of Tyre: That is, the was of the Daughters of the City Dan, in the Tribe of Naphtali, and is called a Widow of Naphtali, as her Husband was a Naphtalite; for he is not called a Tyrian by Descent, but a Man of Tyre by Habitation, as Obed Edom the Levite is called a Gittite, and the Apostle Paul a Man of Tarlus.

But the HIRAM ABBIF had been a Tyrian by Blood, that derogates not from his vast Capacity; for the Tyrians now were the best Artificers, by the Encouragement of King HIRAM: and those Texts testify that God had endued this HIRAM ABBIF with Wisdom, Understanding, and mechanical Cunning to perform every Thing that SOLOMON required, not only in building the TEMPLE with all its coffly Magnificence; but also in founding, fashioning, and framing all the holy Utenfils thereof, according to Geometry, and to find out every Device that shall be put to him! and the Scripture assures us, that He fully maintained his Character in far larger Works than those of Aboliab and Bezaleel, for which he will be honoured in the Lodges till the End of Time.

tuary,

tuary, Founder or Designer, separately or together, he equally excelled. From his Designs, and under his Direction, all the rich and splendid Furniture of the Temple, and its several Appendages, were begun, carried on, and finished. Solomon appointed him, in his Absence, to fill the Chair, as Deputy-Grand-Master; and, in his Presence, Senior Grand-Warden, Master of Work, and general Overseer of all Artists, as well those whom David had formerly procured from Tyre and Sidon, as those Hiram should now The Fellow-Crafts were ordered to be partitioned into Lodges, of a certain Number, with a Master and Wardens in each, to be duly paid, fed, and cloathed, and to take Care of their Succession: Thus a lasting Foundation was laid of perfect Harmony, Love, and Friendship; each knew his peculiar Business and Duty, and the grand Defign was vigorously pursued. The Alliance between these wise and learned Princes ended only with their Lives.

DIUS, the Historian, tells us, that the Love of Wisdom was the chief Inducement to that Tenderness of Friendship betwixt HIRAM and SOLOMON; that they interchanged difficult and mysterious Questions, and Points of Art, to be solved according to the true Reason and Nature of the Matter in Hand. Menander, of Epbesius, who translated the Tyrian Annals, out of the Philistine Tongue, into Greek, also relates, that when any of these Propositions proved too hard for those wise and learned Princes, Abdeymonus, or Abdomenus, the Tyrian, called, in the old Constitutions, Amon, or Hiram Abbis, answered every Device that was put to him, 2 Chron. ii. 14; and even challenged Solomon, though the wisest Prince on Earth, with the Subtlety of the Questions he proposed.

To carry on this stupendous Work with greater Ease and Speed, Solomon caused all the Craftsmen, as well Natives as Foreigners, to be numbered, and classed as follows, viz.

Solomon partitioned the Fellow Crafts into certain Lodges, with a Master and Wardens* in each; that they might receive Commands in a regular Manner, might take Care of their Tools and Jewels, might be regularly paid every Week, and be duly fed and cloathed, &c. and the Fellow Crafts took Care of their Succession by educating Entered Prentices.

Thus a folid Foundation was laid of perfect Harmony among the Brotherhood: the Lodge was strongly cemented with Love and Friendship: every Brother was duly taught Secresy and Prudence, Morality and good Fellowship: each knew his peculiar Business, and the Grand Design was vigorously pursued at a prodigious Expence.

WHEN they were all duly marshalled, Solomon, who had been still adding immense Quantities of Gold, Silver, precious Stones, and

and other rich Materials to those, which David had laid up before the h, put them into proper Hands, to be wrought into an it wit. Variety of Ornaments. The vast Number of Hands employed, and the Diligence, Skill, and Dexterity of the Master of the Work, the Overseers and Fellow-Crasts, were such, that he was able to level the Foot-Stone of this vast Structure in the fourth Year of his Reign, the third after the Death of David, and the 480th after the Children of Israel's passing the Red-Sea. This

magnificent Work was begun in Mount Moriah, on Monday, the second Day of the Month Zif, which answers to the twenty-first of our April, being the second Month of the sacred Year; and was carried on with such prodigious Speed, that it was si-

nished in all its Parts in little more than seven Years, which happened on the eighth Day of the Month Bul, which answers to the twenty-third of our October, being the seventh Month of the sacred Year, and the eleventh of King Solomon. What is still more astonishing, is, that every Piece of it, whether Timber, Stone, or Metal, were brought ready cut, framed, and polished to ferusalem; so that no other Tools were wanted, or heard, than what were necessary to join the several Parts together. All the noise of Ax, Hammer, and Saw, was confined to Lebanon, the Quarries and Plains of Zeredathah, that nothing might be heard among the Masons of Sion, save Harmony and Peace.

THE Length of the Temple, or Holy Place, from Wall to Wall, was fixty Cubits, of the facred Measure; the Breadth twenty Cubits, or one third of its Length; and the Height thirty Cubits to the upper Cieling, distinct from the Porch; So that the Temple was twice as long and large every Way as the Tabernacle. The Porch was 120 Cubits high; its Length twenty; and Breadth ten Cubits. The Harmony and Symmetry of the three Dimensions in the Templeare very remarkable, which are the Proportions congruous to the three great Concords in Musick, which must be a grateful Proportion to the Eye, as that Harmony in Musick is so

T 23]

exceedingly ravishing to the Ear. The Oracle, or Most Holy Place, was a perfect Cube of twenty Cubits, thereby shadowing the Perfection of Happiness: The great Philosopher, Aristotle, says, that he who bears the Shocks of Fortune valiantly, and demeans himself uprightly, is truly good, and of a square Posture witbout Reproof. Besides, as the square Figure is the most firm in Building, so this Dimension of the Oracle was to denote the Constancy, Duration, and Perpetuity of Heaven. The Wall of the Outer Court, or that of the Gentiles, was 7700 Feetin Compass, and all the Courts and Apartments would contain 300,000 People: The Whole was adorned with 1453 Columns of Parian Marble, twisted, sculptured, and voluted, with 2906 Pilastres, decorated with magnificent Capitals, and about double that Number of Windows, besides those in the curious Pavement. The Oracle and Sanctuary was lined with massy Gold, adorned with all the Embellishments of Sculpture, and fet with numerous, most gorgeous, and dazzling Decorations of Diamonds and all Kinds of precious Stones,

No Structure was ever to be compared with the Temple, for its exactly proportioned and beautiful Dimensions, from the magnificent Portico on the East, to the glorious and reverend Sanctum Sanctorum on the West; with the numerous Apartments for the Kings, Princes, Sanhedrim, Priests, Levites, and People of Israel; and the Outer Court for the Gentiles, it being an House of Prayer for all Nations. The Prospect of it highly transcended all that we are now capable to imagine, and has ever been esteemed the finest Piece of Masonry upon Earth, before or since:

The old Constitutions aver, that, some short Time before the Consecration of the Temple, King HIRAM came from Tyre, to take a View of that mighty Edifice, Flood 1356. and to inspect the different Parts thereof, in which he was accompanied by King Solomon, and the Deputy Grand-Master, HIRAM ABBIF; and after his View there-

of, flechared the Temple to be the utmost Stretch of human Art. So Lomon here again renewed the League with HERAM, and made him a Present of the Sacred Scriptures, translated into the Syriac Tongue, which, it is said, is still extant among the Maronites, and other Eastern Christians, under the Name of the old Syriac Version.

THE Temple of JEHOVAH being fruished, under the Aufpices of the wise and glorious King of Israel, Solomon, the Prince of Architecture, and the Grand-Master Mason of his Day, the Fraternity celebrated the Cape-Stone with great Joy; but their Joy was soon interrupted by the sudden Death of their dear and worthy Master Hiram Abbit; nor less was the Concern of King Solomon, who, laster some Time allowed to the Crast to vent their Sorrow, ordered his Obsequies to be performed with great Solemnity and Decency, and buried him in the Lodge, near the Temple, according to the ancient Usages among Masons; and long mourned for his Loss.

AFTER HIRAM ABBIF was mourned for, the Tabernacle of Moses and its holy Reliques being lodged in the Temple, Solomon, in a General Assembly, dedicated, or consecrated It by solemn Prayer, and costly Sacrifices past Number, with the finest Music, vocal and instrumental, praising JEHOVAH, upon fixing the Holy Ark in its proper Place, between the Cherubims; when JEHOVAH filled his own Temple with a Cloud of Glory!

But leaving what must not, and, indeed, what cannot be committed to Writing, we may certainly affirm, that, however ambitious and emulous the Gentiles were in improving the Royal Art, it was never perfected till the building of this Gorgeous House of Gon, fit for the special Refulgence of his Glory upon Earth, where he dwelt between the Cherubims, on the Mercy-Seat, above the Ark, and from thence gave his People frequent oraculous Responses.

THE

[25].

THE Fame of this grand Edifice soon prompted the Inquisitive of all Nations to travel, and spend some Time at Yerusalem, and furvey its Excellencies, as far as was allowed to the Gentiles: and they foon found, that the joint Skill of all the World came infinitely short of the Israelites, in the Wisdom, Strength, and Beauty of their ARCHITECTURE; when the wife King SOLOMON was Grand Master of all Masons at Jerusalem, and the learned King HIRAM * was Grand-Master at Tyre, and inspired HIRAM ABBIF had been Master of Work; when true compleat Masonry was under the immediate Care and Direction of Heaven; when the Noble and the Wife thought it their Honour to be the Associates of the ingenious Craftsmen in their well formed Lodges; and so the Temple of JEHOVAH, the one true GOD, became the just Wonder of all Travellers, by which, as by the most perfect Pattern, they resolved to correct the Architecture of their own Countries upon their Return.

CHAP. IV.

The State of Masonry from the Consecration to the Destruction of Solomon's Temple, and Captibity of the Jews.

SOLOMON next employed the Fraternity in carrying on his other Works, viz.—His two PALACES at ferusalem, for himself and his Queen.—The stately HALL of Judicature, with

* The Tradition is, that King HIRAM had been Grand Master of all Masons; but when the Temple was finished, HIRAM came to survey It before its Consecration, and to commune with Solomon about Wisdom and Art; and, finding the Great Architest of the Universe had inspired Solomon above all mortal Men, HIRAM very readily yielded the Pre-eminence to Solomon Jedidian, the Beloved of God.

with his Fvory Throne, and Golden Lions. --- MILLO, or the Royal Exchange, made by filling up the Great Gulf, between Mount Moriab and Mount Zion, with strong Arches, upon which many beautiful Piazzas were erected, with lofty Collonading on each Side, and between the Columns a spacious Walk from Zion Caffle to the Temple, where Men of Business met.— The House of the Forest of Lebanon, built upon four Rows of Cedar-Pillars, his Summer-House to retire from the Heat of Business, with a Watch-Tower that looked to the Road to Damascus. Several Cities on the Road between Jerusalem and Lebanon. Many Store-Houses West of the Jordan, and several Store-Cities East of that River, well fortified: And last of all Tadmor, in the Defart towards Syria, one Day's Journey from the Euphrates, and fix from BABYLON, called in later Times by the Greeks PALMYRA, with a lofty Palace in it: The vast and glorious Ruins of this once great City, in Marble Pillars, Arches, and other grand Remains, have been at large defcribed, and are feen by Travellers to this Day.

All these, and many more costly Edifices, were finished in the short Space of thirteen Years after the Flood 1369.

Before Christ of Work: For Masonry was carried on throughout all the Kingdom of Israel, and many Lodges were constituted under Grant Master Solomon, who, as the old Constitutions relate, annually assembled the Grand Lodge, at Jerusalem, to preserve the Cement of the Fraternity, and transmit their Affairs to the latest Posterity.

And even during his Idolatry he built some curious Temples to Chemos, Moloch, and Ashtaroth, the Gods of his Concubines, till about three Years before he died, when he composed his penitential Song, the Ecclesiastes; and fixed the true Motto on all earthly Glory, viz. VANITY of VANITIES, ALL

is VANITY, without the Fear of GOD, and the keeping of his Commands, which is the whole Duty of Man! and A. M. 3029. died aged 58 Years.

A. C. 975.

Many of Solomon's Masons, before he died, began to travel, and carried with them the High Taste of Architecture, with the Secrets of the Fraternity, into Syria, Lesser Asia, Mesopotamia, Scythia, Assyria, Chaldaa, Media, Bactria, India, Persia, Arabia, Egypt, and other Parts of great Asia, and Africa; also into Europe, no doubt, though we have no History to assure us yet of the Transactions of Greece and Italy: But the Tradition is, that they travelled to Hercules's Pillars on the West, and to China on the East: And the old Constitutions affirm, that one called Ninus, who had been at the building of Solomon's Temple, brought the refined Knowledge of the Science, and the Art into Germany and Gaul.

In many Places being highly esteemed, they obtained special Privileges; and because they taught their liberal Art only to the Free-born, They were called FREE MASONS; constituting Lodges in the Places where they built stately Piles, by the Encouragement of the Great and Wealthy, who soon requested to be accepted as Members of the Lodge, and Brothers of the Crast; till by Merit those Free and accepted Masons came to be Masters and Wardens.

NAY Kings, Princes, and Potentates became Grand Masters, each in his own Dominion, in Imitation of King Solomon, whose Memory, as a Mason, has been duly worshipped, and will be, till Architecture shall be consumed in the general Conflagration; for he never can be rivalled, but by one equally inspired from above.

The Division of Solomon's Dominions into the Kingdoms of Ifrael and Judah did not much affect the Fraternity, or disturb their Lodges: For Jeroboam or- Flood 1374. dered them to build him two Palaces, the one

E 3 at

at Sichem, and the other at Penuel; and also to make and erect the two curious Statues of the Golden Calves, with Temples for their Worship, the one in Bethel, and the other in Dan, which were worshipped by the Israelites, till they were taken and carried away by Salmanesar and Tiglath-Pileser. King Baasha built Tirzah for his Palace; and King Omri built Samaria for his Capital; where his Son, King Ahab, built a large and sumptuous Temple for his Idol Baal, afterwards destroyed by King Jehu, and a Palace of Ivory, besides many Castles and senced Cities.

SOLOMON'S Royal Race, the Kings of Judah, succeeded him also in the GRAND MASTER'S Chair, or deputed the High Priest to preserve the Royal Art. Their Care of the Temple with the many Buildings they raised, and strong Forts, are mentioned in holy Writ down to Josiah the last good King of Judah.

SOLOMON'S Travellers improved the Gentiles beyond Expression. Thus the Syrians adorned their Damascus with a lofty Temple and a Royal Palace. Those of Lesser Asia became excellent Masons, particularly at Sardis in Lydia, and along the Sea Coasts in the mercantile Cities, as at Ephsius.

THERE the old Temple of Diana, built by some Japhetites about the Days of Moses, being burnt down about 34 Years after Solomon's Death, the Kings of Lesser Asia resounded and adorned it with 127 Columns of the best Marble, each so Feet high, and 36 of them were of the most noble Sculpture, by the Direction of Description and Archipheon, the Disciples of Solomon's Travellers; but it was not sinished till after 220 Years in the 7th Year of Hezekiah King of Judah, under the Direction of the Grand Ephesian Masters in this Royal Crast, Demetrius and Polonius, A. M. 3283.

This Temple of the *Ionic* Order was in Length 425 Feet, and in Breadth 220 Feet, with a duly proportioned Height, so magnificent, so admirable a Fabrick, that it became the third of the seven Wonders of Art, the charming Mistress of Lesser Asia, which even Xerxes,

Xerxes, the avowed Enemy of Image Worship, left standing, while he burnt all the other Temples in his Way to Greece.

But, at last, it was burnt down by a vile Fellow only for the Lust of being talked of in after Ages (whose Name therefore shall not be mentioned here) on the Birth-Day of Alexander the Great, after it had stood 365 Years, about A. M. 3680. when jocose People said, The Goddess was so deeply engaged at the Birth of her Hero in Pella of Macedonia that she had no Leisure to save her Temple at Ephesus. It was rebuilt by the Architect Denocrates at the Expence of the neighbouring Princes and States.

THE ASSYRIANS, ever fince NIMROD and NINUS, had cultivated the Royal Art, especially at their Great NINIVEH, down to King Pul (to whom Jonah preached) and his Son Sardan Pul or SARDANAPALUS, called also Tonos Concoleros, who was besieged by his Brother Tiglath Pul Eser and his General-Nabonassar, till he burnt himself with his Concubines and Treasure in old Nimrod's Palace in the 12th Year of Jotham King of Judah, A. M.—3257, when the Empire was partitioned between TIGLATH PUL ESER who succeeded in NINIVEH, and NABONASSAR who got CHALDEA.

NABONASSAR, called also Belesis or Baladan, an excellent Astronomer and Architect, built his new Metropolis upon the Ruins of a Part of old Nimrod's Works near the Great old Tower of Babel then standing, and called It Babylon, founded in the first Year of the Nabonassarian, or famous astronomical Æra, A. M. 3257.

FOR this City BABYLON is not mentioned by any Author before Isaiab, who mentions both Its Rise and Its Ruin.

THE Science and the Art did not only flourish long in Eastern Asia to the farthest East Indies; but also before the Days of Nebuchadnezzar the Great, we find that old Masonry took a Western Course: For the Disciples of Solomon's Travellers, by the Encouragement of Princes and States West of the Assyrian Bounds, built, enlarged, and adorned Cities past Number.

SUCHE

SUCH as Boristhenes and Sinope in Pontus: Nicomedia, Prusias, and Chalcedon in BITHYNIA: Bizantium (now Constantinople) Cizicus also and Lampsacus in the Hellespont: Abdara in Thrace: Many Cities in Greece, Tarentum, Regium, Rome, Ravenna, Crotona, Florence, and many more in Italy: Granada, Malaga, Gades, &c. in Spain: Massilia and others on the Coast of Gaul: while Britain was unknown.

THE Syrians adorned Damascus, by the Assistance of Solomon's

Masons, with a losty Temple, a Royal Palace,
and a public Altar of most admirable Workmanship,
which last so ravished Ahaz, King of Judah, that
he caused a Pattern thereof to be taken, and sent it
to Urijah, the High-Priest of Jerusalem; and upon his Return,
having removed the Altar of the Lord out of its Place in the
Temple, ordered this new Altar to be set up in its Stead.

AFTER godly Josiah King of Judah fighting for his superior Nabopolassar, was slain in the Battle of Hadah Rimmon by Pharaoh Necho, A. M. 3394. all Things went wrong in Judah.

For the Grand Monarch Nebuchadnezzar, first his Father's Partner having defeated Necho, made Josiah's Son Jehoiakim his Vassal, and for his revolting He ruined him, and at length captivated all the remaining Royal Family of Judah with the Flower of the Nobles, especially of the more ingenious Craftsmen; laid waste the whole Land of Israel, burnt and demolished all the fine Edifices, and also the glorious and inimitable Temple of Solomon after It was finished and consecrated 416 Years.

FOR in the fifth Month, on the seventh Day of the Month, i. e. towards the End of our July, came Nebuzaradan, Captain of the Guards to the King of BABYLON, to JERUSALEM, and after having taken out all the sacred Vessels, and the Two samous Dillars, that were in the Temple, and all the Riches that could be found in the King's Palace, and the City: He did, pursuant

f 31]

to the Command of his Master, on the tenth of the same Month, set both the TEMPLE and CITY on Fire, overthrew all the Walls, Fortresses, and Towers belonging thereto, wholly rasing and levelling it to the Ground, till he had brought all to a thorough and perfect Desolation.

NEBUCHADNEZZAR being now at Rest from all his Wars, and being in full Peace at home, he applied himself with great Industry to the carrying on this grand Design in finishing of his Buildings at BABY-LON, and employed therein all the able Artists of

JUDEA, and other Captives to join his own Chaldean MASONS; who by their joint Labour made it the fourth of the seven Wonders of Art. The most famous Works therein were the WALLS of the City, the Temple of Belus, in which were placed the Brazen Sea, the Pillars, &c. brought from Jerusalem, the Palace and hanging Gardens, the River and the artificial Lake and Canals, made for draining that River. In the Magnificence and Expence of which Works, he much exceeded whatsoever had been done by any King before him: And excepting the amazing Wale of China, nothing like it has been since attempted whereby any one else can be equalled to him. This sumptuous Grand Master, also, caused to be erected in the Plains of Tura a Golden Image of their GodBaal, sixty Cubits high, and six broad; containing 7000 Attic Drachma's of Gold, according to Diodorus, which amounts to three Millions and a half of our Money.

THE MEDES and PERSIANS had much improved in the Royal Art, and had rivalled the Asyrians and Chaldeans in Masonry at Exhauma, Suliana, Dersepolis, and many more fine Cities, before They conquered them in War; tho' They had nothing so large as Minibeh and Babylon, nor so accurate as the Temple, and the other Structures of Solomon.

THE Jewish Captives, after Nebuchadnezzar's Death, kept themselves at Work in REGULAR Lodges, waiting the appointed Time

[32]

of their Deliverance; and were thus the more capable, at the Reduction, or Rebuilding the Holy Temple and City of Salem upon the old Foundations; which was ordered by the Decree of Cyrus, according to God's Word that had foretold his Exaltation and that Decree, for, Belshazzar being slain, Cyrus, the Persian, soon after removed the imperial Seat to Flood 1810.

Susiana, in Persia, and thereby put an End to the Babylonian Empire, after it had stood 209 Years; and promised the Israelites great Favour, and a speedy Restoration to their own Land.

THE Medes and Persians had much improved in the Royal Art, and had even out-done the Assury Year of the at Echatana, which being repaired, beautified, and Flood 1641. vastly enlarged by Deioces, King of the Medes, . B. C. 707. who reigned there with great Wisdom, Honour, and Prosperity for above fifty Years; during which Time he constantly employed THE FRATERNITY, and it becoming a great City, he is for this Reason, by the Greeks, thought to be the Founder of it. Also Susiana and Persepolis, with many more fine Cities, were built before the *Perfians* had overcome the *Affyrians* and Babylonians in War, where they had shewn admirable Skill; but yet did not come up to the Accuracy of the Cemple, and other Structures of Solomon.

The State of MASONRY from Grand-Master Cyrus, to Grand-Master Seleucus Nicanor.

GRAND MASTER in the Land of JUDEA, the lineal Heir of DA-VID's Royal Race and Prince of the Reduction, with the High Priest Is support to Deputy; under the Title of TIRSHATHA, by immediate Commission from him: And all the Vessels of Gold and Silver brought to Babylon from Jerusalem, were, by this Decree, ordered to be delivered by Mithredath, the King's Treasurer, to Zerubbabel, who carried them back to Jerusalem; the Vessels that were at this Time restored amounted to 5400, the Remainder was brought back by Ezra, in the Reign of Artaxerxes Longimanus many Years after. But, before the Temple was half sinished, Cyrus died, which then put a Stop to the Work.

CAMBYSES the Successor of Cyrus neglected the Temple; being wholly intent upon the Conquest of Egypt, that had revolted under AMASYS, the last of Mitzraim's Race, a learned Grand Master, for whom the Fellow Crasts cut, out of a Rock, an House all of one Stone 21 Cubits long, 12 broad and 8 deep, the Labour of 2000 Masons for three Years, and brought it safe to Memphis.

He had built many costly Structures, contributed largely to the Rebuilding of **Apollo's** famous *Temple* at *Delphi* in *Greece*, and died much lamented just as *Cambyses* had reached to *Egypt*, A. M. 3478.

CAMBYSES conquered the Land, and destroyed many Temples, Palaces, Obelisks, and other glorious Monuments of the antient Egyptian Masonry, and died on his Way home, A. M. 3482.

THE false Smerdis, the Magian, taking Advantage of this Event, insurped the Throne by the Name of Artaxerxes, according to Ezra, and stopt the building of the Temple: But was soon dethroned and succeeded by

In his 6th Year, just 20 Years after the Founding of the Temple, ZERUBBABEL finished it * and celebrated the Cape Stone; and next Year its Consecration or Dedication was solemnized.

And tho' it came far short of Solomon's Temple in Extent and Decorations, nor had in it the Cloud of Glory or Divine Spechman, and the holy Reliques of Moses; yet being reared in the Solomonian Style, it was the finest Building upon Earth.

THE Sidonians were frank and liberal towards this Work, as in the Days of HIRAM, bringing down Cedar-Planks in Abundance from Libanus to the Sea-Shore, and from thence into the Port of Joppa, as they had been ordered first by Cyrus, and after him by Darius. Here, also, the curious Craftsmen held stated and regular Lodges, as in the Days of Solomon; associated with the Master-Masons, giving Lectures, and strictly adhering to good old Usages.

In this Reign Zozoastres flourished, the Archimagus or Grand Master of the Magians (who worshipped the Sun and the Fire made by his Rays) who became famous every-where, called by the Greeks, the Teacher of all human and divine Knowledge; and his Disciples were great Improvers of Geometry in the liberal Arts, erecting many Palaces and Fire Temples throughout the Empire, and long flourished in Eastern Asia, even till the Mahometans prevailed; and a Remnant of them are scattered in those Parts to this Day, who retain many of the old Usages of the Free Masons, for which they

Zoroaftres was slain by Argasp the Scythian, A. M. 3517; and Hystaspes died 3518.

This Temple stood in Splendor till demolished by John Hyrcanus, who levelled the City and Temple with the Ground; and compelled all the Idumaans to conform to the Law of Moses. After Nehemiah, the High-Priest of Jerusalem, was usually the Provincial Grand Master of Judea, as well under the Persians, as the Greeks and Romans.

Under Darius Ochus, Mausolus King of Caria, in Lesser Afia, died, which Accident was rendered famous by the great Grief which Artemisia, who was both his Sister and his Wife, expressed at his Loss. Before she died, she took Care for the erecting that famous Monument for him, at Ha-Year of the licarnassus, which was reckoned the sist of the Flood 1995. feven Wonders of the World, and from whence all Monuments of more than ordinary Magnificence are called Maufoleums. It was in Length, from North to South, fixtythree Cubits, in Circuit 411 Feet, and in Height 140 Feet, surrounded with 136 Columns of most admirable Sculpture; and the Fronts, East and West, had Arches seventy-three Feet wide, with a Pyramid on the fide Wall, ending in a pointed Broach, on which was a Coach with four Horses of one Marble Stone. All was performed by the four best Masons of the Age, Scopas, Leochares, Timotheus, and Briax.

INDEED, we read of the old Dedalus, and his Sons, the Imitators of the Egyptians and Phanicians, of the little Labyrinth in Crete, and the larger at Lemnos, of the Arts and Sciences early at Athens and Sicyon, Candia and Sicily before the Trojan War; of the Temples of Jupiter Olympius, Esculapius, &c. of the Trojan Horse, and other Things: But we are all in Darkness, Fable and Uncertainty, till the Olympiads: Which began in the 35th Year of Uzziah, King of Judah, when some of their bright Men began to travel. C. 547. and, the same Year 3457, PYTHAGORAS, his Scholar, travelled into Egypt; while PISISTRATUS, the Tyrant of Athens, began to collect the first Library in Greece.

PYTHAGORAS lived twenty-two Years among the Egyptian Priests, till sent by Cambyses to Babyson and Persia; A. M. 3480, where he pickt up great Knowledge among the Chaldaan

Chaldean Magians, and Babylonish Jews; and returned to Greece the Year that Zerubbable's Temple was finished, A. M. 3489.

HE became, not only the Head of a new Religion of Patch-Work, but likewise of an Academy, or Lodge of good Geometricians, to whom he communicated a Secret*, viz. That amazing Proposition which is the Foundation of all Masonry, of whatever Materials or Dimensions, called by Masons his HEUREKA; because They think It was his own Invention.

BUT, after Pythagoras, GEOMETRY was the darling Study of the Greeks, and their learned Men reduced the noble Science to the Use of the ingenious Mechanics of all Sorts, that perform by Geometry, as well as the Operators in Stone or Brick.

AND as MASONRY kept pace with Geometry, so many Lodges appeared, especially in the Grecian Republics, where Liberty, Trade, and Learning slourished; as at Sicyon, Athens, Corinth, and the Cities of Ionia, till They arrived at their beautiful Doric, Ionic, and Corinthian Orders.

FROM this Time we date the first Union between the FREE and the ACCEPTED MASONS, which has subsisted ever since in all REGULAR LODGES.

GREECE now abounded with the best Architects, Sculptors, Statuaries, Painters, and other fine Defigners; most of them educated at the Academies of Athens and Sicyon, who instructed many Artists, and Fellow Crafts, to be the best Operators upon Earth: So that the Nations of Asia, and Africa, who had taught the Greeks, were now taught by them.

No Country but Greece could now boast of such Men as Mycon, Phidias, Demon, Androcides, Meton, Anaxagoras, Dipænus, and Scyllis, Glycon, Alcamenes, Praxitles, Polycletus, Lysippus, Peneus, Euphronor, Perseus, Philostratus, Zeuxis, Apollodorus, Parbasius, Timanthes, Eupompus, Pamphilus Apelles, Artemones, Socrates, Eudoxus, Metrodorus (who wrote of Masonry) and the excellent Theo-

THE learned Greeks rightly judging, that the Rules of the beautiful Proportions in Architecture should be taken from the Proportions of the Human Body, their fine Painters and Statuaries were esteemed Architects, and were then actually so (even as by the Painters) nor could They have been fine Painters without being Architects.

THEREFORE several of those excellent Painters and Philosophers are in the List of antient Architects: Nay They all openly taught Geometry, and many of them practised Masonry; and being Gentlemen of good Repute, They were generally at the Head of the Craft, highly useful to the Fellow Crafts, by their Designs and fine Drawings, and bred them up clever Artists: Only by a Law in Greece, no Slave was allowed to learn the seven liberal Sciences, or those of the Free-born; so that in Greece also They were call'd FREE MASONS, and, in their many Lodges, the Noble and Learned were ACCEPTED as Brothers.

The Ambition of Alexander prompted him to the Building of a new City in Egypt, in a very convenient Place over-against the Island of *Pharos*, and called it ALEXANDRIA, which thenceforth became the Capital of that Kingdom. It is remarked by Varro, that, at the Time of building Alexandria, the Use of the Papyrus was first found out, and used in that City by the FELLOW-CRAFTS to draw out their Designs and Plans upon, for different Parts of their Work, and other Uses. The Papyrus, in its proper Signification, is a Sort of great Bulrush, growing in the Marshes of Egypt, near the Nile. It runs up into a triangular Stalk to the Height of about fifteen Feet, and is usually a Foot and half in Circumference. These, when slaked and separated from the Stalk, made the Paper used by the Antients, and which, from the Name of the Tree that bore it, they called, The Manner how it was fitted for Use may be also, Papyrus. feen in the eleventh and twelfth Chapters of the thirteenth Book of Pliny's Natural History.

CHAP. VI.

The State of MASONRY from Grand Master Seleucus Nicanor to the Death of Herod the Great.

SELEUCUS Nicanor proved an excellent Grand Master, founded the Great Seleucia on the Euphrates for his Deputy in the East, and in the West He built his stately Capital City the famous Antioch in old Syria, with the great Grove of Daphne, a sacred Asylum; in the Middle of which he reared the Temple of APOLLO and DIANA (tho' it proved afterwards the Temple of Denus and Bacchus) and also the lesser Cities of old Syria, as Apamia, Beræa, Seleucia, Laodicea, Edessa, Pella, &c.

MASONRY flourished most in Egypt, where the Grecian ARCHITECTURE was highly admired, and where Flood 2044. PTOLEMY SOTER, another of Alexander's Generals, B. C. 304. had fet up his Throne. Euclid, the famous Geometer of Tyre, who had in his Travels collected the scattered Elements of Geometry, came to the Court of Ptolemy Soter, and was by him encouraged to restore and teach that noble Science, especially to the Children of the great Lords and Estates of the Realm, who by the continual Wars and Decay of the Sciences in former Reigns were reduced to great Necessities for want of means to get an honourable and competent Livelihood. For this Purpose, lays an old Record of MASONRY, 'Euclid having received Com-' mission, he taught such as were committed to his Charge the ' Science of Geometry in Practice to work in Stone, all Manner of 'worthy Work that belongeth to building of Altars, Temples, Towers, and Castles, and all other Manner of Buildings, and gave them a Charge in this Form:

'FIRST that they should be true to their King and to the Lord they serve, and to the Fellowship whereof they are admitted: and G 'that

- that they should be true to and love one another: and that they
- ' should call each other his Fellow or Brother; not Servant, nor
- 'Knave, nor any other foul Name: and that they should truly
- deserve their Pay of their Lord, or the Master of the Work, that they serve,
- 'SECONDLY, That they should ordain the wisest of them to be the
- 'Master of the Work, and neither for Love nor Lineage, Riches nor
- ' Favour, to fet another that hath but little Cunning to be Master of
- ' the Lord's Work; whereby the Lord should be evil served, and
- ' they ashamed: And also that they should call the Governor of
- the Work MASTER, in the Time that they work with him.
- 'And many other Charges he gave them that are too long to
- ' relate; and to all these Charges, says my Author, he made them
- ' fwear a great Oath, that Men used at that Time.
- And he ordained for them a reasonable Pay, whereby they might live honestly: and also that they should come and affemble
- ' together every Year once, to consult how they might work best
- to serve the Lord, for his Profit and to their own Credit; and to
- to leave the Lord, for his I folit and to then own Clent; and to
- correct, within themselves, him that had trespassed against the CRAFT.
- 'And thus was the Craft grounded there: And that worthy 'Clerk Euclid gave it the Name of GEOMETRY, which now 'is called MASONRY.'

AND he accordingly digested his Instructions into such Order, improved and demonstrated them so accurately, as to have left no Room for any others to exceed him in Geometry; for which his Memory will ever be fragrant in the Lodges. According to the old Constitutions, PTOLEMY, GRAND-MASTER, with his Wardens, Euclid the Geometrician, and STRATON the Philosopher, built his Palace at Alexandria, and the curious Museum or College of the Learned, with the Library of Bruchium, near the Palace, that was filled with 400,000 Manuscripts, or valuable Volumes, before it was burnt in the Wars of Julius Cæsar.

PTO-

PTOLEMY PHILADELPHUS succeeded his Father in the Throne and Solomon's Chair too: And in his second Year he carried on the great Tower of Phazo, founded by his Father, * the fixth of the seven Wonders of Art, built on an Island, as the Light-House for the Harbour of Alexandria, (whence Light-Houses in the Mediterranean are called Faros) a Piece of amazing Architecture, by the Care of his Grand Wardens Deriphanes and his Son Soltratus: the Father built the Heptastadium for joining the Island to the Continent, while the Son reared the Tower.

PHILADELPHUS founded the City Myos Hormus on the Red Sea for the East-India Trade, built the Temple of the Zephyrian Denug in Crete, Ptolemais in Palestine, and rebuilt old Rabbab of the Ammonites, calling it Philadelphia. Nay he was so accurate an Architect that for a long Time all fine Masonry was called Philadelphian, or after the Style of Philadelphus.

PTOLEMY, the Son of Philadelphus, called EUERGETES, succeeded, and was the last good GRAND MASTER in EGYPT; His Wardens were his two learned Librarians. ERATOSTHENES; of Cyrene; and Apollonius, of Year of the Flood 2102. Rhodes. The Library of Bruchium being near full, Before Christ he erested another at Seraphium, which in Time 246. contained 300,000 Manuscripts, and Cleopatra afterwards added 200,000 more, from the Library of Pergamus, given to her by Mark Anthony: But all this vast Library was burnt by the ignorant, stupid, and besotted Saracens, when they took the City of Alexandria, to the irreparable Loss of the Learned. It had often been rifled on the Revolutions and Com-G 2 motions

motions that happened in the Roman Empire, yet it was as often repaired and replenished again with its full Number of Books, till this its final Destruction by the Saracens. This happened as follows: Johannes Grammaticus, the famous Aristotelian Philosopher, being then living at Alexandria, and having much ingratiated himself with Amrus Ebnol As, the General of the Saracen Army, and, by Reason of his great Learning, made himself acceptable to him, he begged of him the royal Library; to this Amrus replied, that it was not in his Power, but was wholly at the Disposal of the Caliph, or Emperor of the Saracens, to whom he would write about it, who returned for Answer, that if those Books contained what was agreeing with the Alcoran, there was no Need of them, for that alone was sufficient of itself for all Truths; but if they contained what difagreed with the Alcoran, they were not to be endured; and therefore he ordered that, whatfoever the Contents of them were, they should all be destroyed; whereon being distributed among the public Baths, they ferved as Fuel for fix Months to heat all the Baths of Alexandria; which shews how great the Number of them was, and what an inestimable Treasure of Learning was wholly destroyed.

EUERGETES was the last good Grand Master of Egypt; and therefore we shall sail over to the Hellespont to view the glorious Temple of Cyzicus, with Threads of beaten Gold in the Joints of the Insides of the Marble Stones, that cast a fine Lustre on all the Statues and Images: Besides the curious Eccho of the seven Towers at the Thracian Gate of Cyzicus, and a large Bouleutarion or Town-House, without one Pin or Nail in the Carpenters Work; so that the Beams and Rafters could be taken off, and again put on, without Laces or Keys to bind 'em.

THE Rhodians employed the famous Architect, CHARES, of Year of the Flood 2048.

B. C. 300.

Lindus, to erect the great Colossus, at Rhodes, which employed him and his CRAFTSMEN for twelve Years. It was esteemed the last of the seven

feven Wonders of Art, and the greatest human Statue under the Sun, to which it was dedicated. It was 70 Cubits high, and duly proportioned in every Part and Limb, striding over the Harbour's Mouth, and wide enough to receive between its Legs the largest Ships under sail, and appeared at a Distance like a high Tower. It was thrown down by an Earthquake after it had stood 66 Years, and lay where it fell 894 Years more; till at length, in the Year of Christ 672, Moawias the sixth Caliph of the Saracens, having taken Rhodes, sold the Brass to a Jew Merchant, who loaded with it 900 Camels, and allowing only 800 Pounds Weight to every Camel's Burden, the Brass of this Colossus, after the Waste of so many Years, by the Rust and Wear of the Brass itself, and the Purloinings and Embezzlements of Men, amounted to 720,000 Pounds Weight.

WHILE the Greeks were propagating the Science and the Art. in the very best Manner, founding new Cities, repairing old ones, and erecting Statues past Number, the other Africans imitated the Egyptians, Southward in Ethiopia down to the Cape of Good Hope; and also Westward to the Atlantic Shore: though History sails, and no Travellers have yet discovered the valuable Remains of those many powerful Nations. Only we know that

THE CARTHAGINIANS had formed a magnificent Republic long before the Romans; had built some thousands of stately. Cities and strong Castles, and made their great Capital CARTHAGE the Terror of Rome, and her Rival for universal Empire. Great was their Skill in Geometry and Masonry of all Sorts, in Marble Temples, golden Statues, stately Palaces, regular Forts, and stout Ships that sailed in all the known Seas, and carried on the Chief Trade of the known World: Therefore the Emulous Romans long designed its Destruction, having a prophetical Proverb, Delenda est Carthage suff be demolished; which they accomplished, as in the Sequel.

THUL

THUS HANNIBAL the Warlike, in his Retreat from Carthage to Armenia, shew'd his great Skill in drawing for King Artaxes the Plan of the City Artaxata, and survey'd the Palace, Temples, and Citadel thereof.

The learned Sicilians, descended from the Greeks, sollowed their Instructions in Architecture throughout the Island very early, at Agrigentum, Messana, Gela, &c. especially at Syracuse; for when It was besieged by the Romans It was 22 Miles round, and Marcellus could not storm it, because of the amazing Devices of the learned Geometrician, Architect, Mechanic, and Engineer, the Noble* ARCHIMEDES, till, by mastering an ill-guarded Tower, the City was taken by Surprize on a Festival Day. But, tho Marcellus gave a strict Charge to save Archimedes, a common Soldier slew him, while, not minding the Uproan, the noble and learned Man was deeply engaged in mechanical Speculations and Schemes to repulse the Romans and save Syracuse. Marcellus shed Tears for him as a public Loss to the Learned, and gave him an honourable Burial in the Year of Rome 537.

B. C.—212.

MANY of the Grecian, Carthaginian, and Sicilian Masons had travelled into the North and West of Gurope, and propagated their useful Skill, particularly in Italy, Spain, the Balearic Hands, and the Coast of Gaul; but History fails, till the Roman Armies came there. Nor have we certain Accounts of the Chinese and other East-Indians, till the Europeans navigated thither in these later Times; only the Wall of China makes a Figure in the Map, thow we know not yet when It was built: Also their Great Cities and most splendid Palaces, as described by Travellers, evidently discover that those antient Nations had long cultivated Arts and Sciences, especially Geometry and Masonry.

THUS

^{*} Called by the old Masons the Noble and Excellent Grand Master of Syracuse.

[47]

THUS hitherto the MASONS, above all other Artists, have been the Favourites of the Eminent, who wifely joined the Lodges for the better conducting of their various Undertakings in old Architecture: and still great Men continued at the Head of the Craft.

From Sicily we foon pass into ITALY, to view the first Improvements of the ROMANS, who for many Ages affected nothing but War, till by Degrees They learned the Science and Art from their Neighbours. But

THE HETRURIANS, or Tuscans, very early used their own natural Tuscan Order, never used by the Greeks, and were the first in Italy that learned from the Greeks the Doric, Ionic, and Corinthian Orders; till the Royal Art was there confpicuous under their King Porsenna, who built a stately Labyrinth, not inferior to That of Lemnes, and the highest Mausoleum on Record.

Porsenna died in the Year of Rome 303, A.M. 3558 the 19th Year of Artaxernes Longimanus, while B. C. 446 the Romans were only engaged in subduing their Neighbours in Italy, and their Taste was as yet but low; till

TURRENUS, the last King of the Tuscans, bequeathed his Kingdom to the Romans, in the 6th Year of Philadelphus, while Pyrrbus distressed Italy. Turrenus died A. M. —— 3725 The Tuscans had built many fine strong Places; and now their Disciples were invited to Rome, and taught the Romans the Royal Art, tho' still their Improvements were not considerable, till

MARCELLUS, who triumphed in the splendid Spoils of Syracuse, upon the Death of the Great Archimedes, becoming the Patron of Arts and Sciences, employed his Fellow-Crasts to build at Rame his samous Theatre, with a Temple to Dirtue, and another to potents; yet the High Taste of the Romans was not general till

And so they went on Improving, till

Scipio Africanus (who had always a fet of the Learned attending him as their Patron) took in the great Rival of Rome the glorious Carthage, which he demolished against his own Inclination by Command of the Senate; for

while Conful Mummius the same Year sacked Corinth, the wealthy Queen of Greece: who discovered his Ignorance, when he threatened those that carried home, from Corinth, the Inimitable Pictures of Dercules and Bacchus, that if they lost them, They must make them good with new ones.

BOTH these Generals triumphed at Rome in the portable Monuments of Art, brought from those Cities, that had been the most opulent and glorious upon Earth. But now the ROMANS were so wise as to bring home too the ablest Professors of Science, and Practitioners of Art. After which we read of several stately Edifices at Rome, built in the finest Grecian Style; as the samous Palace of Paulus Emilius of the best Phrygian Marble; the Triumphal Arch of Marius at Orange in Gaul, the Three surprizing Theatres of Scaurus at Rome, &c.

of Crystal, and the third of Gilded Wood: between the Columns were 3000 Statues of Brass.

THE other two Theatres were of Wood, fustained on great Axles, whereby They could be turned round, and joined in one great Amphitheatre.

THE mighty SYLLA brought the Columns of the Temple of **Supiter** Olympius from Greece, to adorn the Temple of **Supiter** Capitolinus at Rome, after the old one, built by Tarquinius Superbus, was burnt; in whose Time Jupiter was only of Clay, but now of pure Gold.

LUCULLUS, the learned and brave, erected a fine Library, and a splendid House with Gardens, in the Asiatic Style.

Pomphy the Great built a Theatre that held 40,000 People at the Shows, near his fine Palace, and his Temple of Difforp.

THESE and other great Men, during the Roman Republic, much encouraged Architects and Masons as their Patrons; and, in their Absence, the Consul Resident, or the High Priest of Rome, or the Arch Flamin, or some other Great Man on the Spot, thought it his Honour to be the Patron of Arts and Sciences (what we now call Grand Master) attended duly by the most ingenious of the Fraternity, till the Republic was near its Exit by the Competition of Pompey and Cæsar for Pre-eminence.

HE and his Legions had built much in Gaul, and at Rome he raised his great Circus or Square, a true Oblong, three Furlongs in Length, and one in Breadth, that held 260,000 People at the Shows: also his stately Palace, and lovely Temple of Cienus, and ordered Carthage and Corinth to be rebuilt, about 100 Years after They were demolished*.

But CESAR, intending first to quell the Partbians, and then, as Grand Master of the Roman Republic, to encourage the Science and the Art beyond all before him in universal Peace, was basely murdered by his ungrateful Brutus under Pompey's Statue \{ A. M. 3960 \\ B. C. 44 \\
His Death was soon followed by the Conquest of Egypt, the Death of Cleopatra, and End of the Grecian Monarchy; and the Commencement of the Roman Empire, by the Victory Augustus gained over Pompey at Actium.

ROME became now the Center both of Learning and supreme Power, under Augustus, the illustrious Grand-Master, with his Deputy AGRIPPA; who erected the great Por-Year of the tico of the PANTHEON; and his principal Warden, Flood 2319. This mighty Patron first employed his Fellow Crafts in repairing all the public Edifices (a most needful Work after the Wars) and in rebuilding some of them. But also he built the Bridge of Arminium; and at Rome the Temple of MARS the Avenger, the Temple of Apollo, the Rotunda called Galucio, the great and sumptuous Forum, the principal and magnificent Palace of Augustus, with some lesser Palaces; the fine Mausoleum, the accurate Statue in the Capitol, the curious Library, the Portico, and the Park for People to walk in, &c. Nay, he filled the Temples of Rome with the most costly Statues, and

and wittily set up That of CLEOPATRA (of massy Gold brought from Egypt) in the Temple of VENUS.

In those Golden Days of Augustus, the Eminent following his Example, built above 100 Marble Palaces at Rome, fit for the greatest Kings; and every substantial Citizen rebuilt their Houses too in Marble, all joining in the same Disposition of adorning Rome: whereby many Lodges appeared, in City and Suburbs, of the Free and Accepted Masons: so that Augustus, when a dying, justly said, I found Rome built of Brick, but I leave it built of Marble!

THEREFORE the present Remains of antient Rome in his Time, and of some following Emperors, are so accurate, that They are the best Patterns of true Masonry extant, the Epitome of all the old Grecian Architecture, commonly expressed by the Augustan Style: and we now wish to arrive at its glorious Persection in Wisdom, Strength, and Beauty.

But, before the Death of Augustus, we must travel into Judea. The High Priests of Jerusalem had been Provincial Grand Masters there, under the Kings of Egypt, then Sovereigns of the Jews, till Seleucus A.M. 3824. Philopater King of Syria seized Judea, or B.C. 180. Palestine. His Son, viz.

ANTIOCHUS Epiphanes cruelly persecuted the Jews till rescued by the valiant Asmonæn Priest Judas Maccabæus: for long after Zerubbabel and Joshua the High Priest, an ordinary Priest, called Asmonæus, appeared, not of the House of Jeshua, but only of the Course of Joarib, the Great Grand Father of Mattathias, the brave Priest of Modin and Father of Maccabæus.

For the lineal Successor of Jestua was Onias IV. (Son of Onias III. the last good High Priest) who, being deprived of his Right by the Syrian Kings, went to Egypt, where He got leave to build a Cemple at Heliopolis, like That of Jerusalem, for the H 2

He got rid of all the Afmodæans, made the Sanbedrim useless, and set up High Priests at his Pleasure. But, for all his great Faults.

HEROD became the greatest Builder of his Day, the Patron or Grand Master of many Lodges, and sent for the most expert Fellow Crasts of Greece to assist his own Jews: For, after the Battle of Attium B. C. 30, before Christ's Birth 26,

HEROD, being reconciled to Augustus, began to shew his mighty Skill in Masonry, by erecting a splendid Grecian THEATRE at Jerusalem, and next built the stately City Sebaste, (so called from Sebastos or Augustus) formerly Samaria, with a curious little Temple in It like That of Jerusalem. He made the City Casarea the best Harbour in Palestine, and built a Temple of white Marble at Paneas—the Cities Antipatris, Phasaelis and Cypron, and the Tower of Phasael at Jerusalem, not Inserior to the Phasas of Alexandria, &c.

But his most amazing Work was his Rebuilding of the Cemple of Zerubbabel.

HEROD,

HEROD, being in full Enjoyment of Peace and Plenty, formed a Design of new building the Temple at Jerusalem, whereby he thought he should not only reconcile to himself the Affections of the Jews, but also erect a Monument of lasting Honour to his own Name. The TEMPLE built after the Return of the Jews from the Babylonish Captivity, though an admirable Building, 500 Years being elapsed since its Erection, was greatly decayed, both by the Length of Time, and also by the Violence of Enemies. Herod proposed to build the whole TEMPLE a-new, and, in a general Assembly of the People, offered to them what he intended. But when he found them startled at the Proposal, to deliver them from their Fears, he told them that he would not take down the OLD Temple till he had all the Materials ready for erecting a NEW one in its Place; and accordingly he did forthwith set himself to make all Manner.

he did forthwith fet himself to make all Manner of Preparations for it; employing therein 1000 Waggons for carrying of the Stone and Timber;

In two Years Time, he had got all Things ready for the Building; and then, and not before, did he pull down the old Temple to the very Foundations.

THE Foot-Stone of the NEW Temple was levelled just forty-six Years before the first Passover of Christ's personal Ministry, at which Time the Jews told him, John ii. 20. TERNITY celebrated the Cape-Stone, with great Joy and in due Form; and the King solemnized its Dedication with great Pomp and Expence. And the Day appointed for it, salling in with the Day of the Year, when he first received the Crown, augmented the Solemnity.

A GREAT Number of MASONS were continued at Work for the carrying on the Out Buildings, all the Time of our Saviour's being here on Earth, and for some Years after, till the Coming of Gesius Florus to be Governor of Judea; when he caused 18,000 Masons to be discharged at one Time, which gave great Offence to the Jews, and, perhaps, was one Cause of those many Mutinies and Seditions, which at last drew on the Destruction of Jerusalem and the Temple with it; so that it seems very unjust to charge the Masons with being the Fomenters of those Disturbances, for the Want of Employment; when all the Jews looked upon this Behaviour of the Roman Governor as levelled not only against their Temple but their Worship also.

JOSEPHUS describes the TEMPLE of HEROD (Lib. 15. Cap. 14.) as a most admirable and magnificent Fabric of Marble, set off with the greatest Profusion of rich and costly Decorations, and the finest Building upon Earth, since the Days of Solomon; being much larger than the Temple of Zerubbabel; besides the Advantage of the Grecian Style, and the Corintbian Order of Architecture, with all its later Improvements.

But it was not completely finished, in all its Apartments, till about six Years before it was destroyed, viz. A. D. 64.

The State of MASONRY from the Birth of CHRIST, and Death of HEROD the Great, to the Restoration of the Augustan Style in Italy.

IBERIUS, the Collegue of Augustus, having attained to the Imperial Throne, became a Patron and Encourager of the Fraternity. THE AUGUSTAN Style was much cultivated, and the expert. Craftsmen met with great Encouragement; even

NERO raised his own Statue of Brass, 110 Feet high, and built a most glorious gilded Palace.

VESPASIAN sent his brave Son Titus to subdue the Jews, and take Jerusalem; when a Soldier in the Sack of the Town, contrary to the Orders of that generous and noble Conqueror, set Fire to the Tample: Soon after that the whole City was levelled with the Ground, not one Stone being left upon another; and the Conqueror ordered a Plow to pass over the Ruins thereof, as a Testimony of its irrecoverable State and final Desolation, agreeable to the Prophecies that foretold its Destruction.

Upon the Return of Titus from the Overthrow of the Jewish Nation, he caused a triumphal Arch, adorned with splendid Engravings and Sculptures, to be built, and soon after his noble Palace, with the samous Statue of LAOCOON of one Stone.

DOMITIAN built the Temple of MINERVA, and rebuilt that of CAPITOLINUS, which he over-laid with Plates of Gold: and had all the Columns cut out at Athens. He also built a Palace more rich and grand than that of Augustus, with stately Galleries in the Portico, besides Halls, Baths, and beautiful Apartments for his Women. He died A. D. 63, succeeded by NERVA, who died — 95, after he had adopted

TRAJAN, who by his Warden, the renowned Architett ArolLODGRUS, laid a wonderful Bridge over the Danube,
built a noble Circus and Palace, two triumphal
Arches, and his famous Column, that exceeds all
Admiration, being 128 Feet high, and the Ascent to the Top of

it by 123 Stairs, with forty-four Windows. The Ashes of this Emperor were put into an Urn, and reposited in the Top of this stately Column: It was moreover adorned with Figures in Basso Relievo, ascending in spiral Lines from the Base to the Capital. The Roman Columns were not wont to be raised without some mystical Signification, and in this Respect they followed the Inventions of the Solomonian and Egyptian Masons; some being Monuments of Stability and Firmness, some of famous and noble Atchievements; and others of Captivity, Repreach, and Overthrow. MARCUS AURELIUS countenanced the Artists till he died A. D. 178.

Commodus, though educated a Designer, turned vicious; and, in his Time, Painting and Sculpture began to decline at Rome, though not yet Architecture. He died A. D. 191.

Severus built his Corinthian Epizone at Rome, and Mursever in Britain. He died at York, A. D. 209.

CARACALLA erected his splendid Circus, and died A. D. 215. And thus flourished the Royal Art down to Constantine the Great, who reared, at Rome, the last triumphal Arch of the Augustan Style: For he removed his After Christ 306.

built, at a vast Rate, many artful Piles, Forums, Hippodromes, Temples or Churches, Porticoes, Fountains, a stately Imperial Palace and Senate-House, a Pillar of Porphyry of eight Stones, about 87 Feet high above the Pedestal, and the amazing Serpentine Pillar with his own Equestrian Statue, &c. He died A. D. 336.

Constans brought with him to Rome the famous Architect Hormisdas, the King of Persia's Son, who was justly astonished at the antient Structures and Statues, and declared them inimitable: For now all the Arts of Designing dwindled at Rome, as they slourished at Canstantinople. Nay the Christians, in Zeal against Heathen Idolatry, demolished many curious Things, till the Roman Empire was partitioned between two Brothers, VALENTINIAN and VALENS.

VALENTINIAN was Emperor of the West at Rome. He died A. D. 374, and this Empire was soon ingrossed by the Eastern; VALENS, Emperor of the East at Constantinople, was distressed by the Goths, and died without Issue, A. D.—378.

To the Empire of the East succeeded Theodosius the Great,

After Christ

who gloried in being a Patron of all the Designers
and Operators, the same as GRAND-MASTER; and
loved them so well, that by a Law he exempted all the CRAFT
from Taxation.

THE Northern Nations of Europe, the Goths, Vandals, Huns, Allemans, Herules, Sweves, Dacians, Alans, Franks, Gepidans, Saxons, Angles, Longobards, and many more, had gradually grown powerful as the Roman Empire decayed, and invaded Greece, Afia, Gaul, Spain, and Africa; nay Italy Itself; over-running the polite World like a Deluge, with warlike Rage and gross Ignorance, the Enemies of Arts and Sciences; thus

HE stopped their Career, who had over-run the polite World like a *Deluge*, with the most ferocious Rage, and the grossest Ignorance, defacing and destroying all the noble Monuments of Antiquity, and all Appearances of the *liberal* ARTS and Sciences, being the declared Enemies of *Literature*.

Theodosius

THEODOSIUS became sole Emperor of the East and West, but unhappily partitioned it again between his two Sons, Honorius and Arcadius, the latter of whom inriched the City of Constantinople with many superb Structures, and a losty Pillar, with a Flight of Stairs in the Heart of it, 147 Feet high: But much inferior to that Pillar called the Monument in London, designed by Sir Christopher Wren, Grand Master of Masons in England in 1674.

THEODOSIUS the Younger, also, inriched the same City with many Statues, Columns, and Obelifus; being the Spoils of War from Greece, Egypt, and Asia; and employed the CRAFT in repairing and erecting some additional Works to the great Church of St. SOPHIA.

JUSTINIAN the First supported the Lodges of Artists or Craftsmen, and restored the whole Roman Empire almost to its former Greatness and Glory: For in pure Zeal for the Augustan Style, and all noble Sciences, now

in the extremest Peril of being lost, he sent his

General, the brave and renowned Belisarius, with a powerful

Army against Totila, the Goth, who with a Multitude of Savages had taken old Rome, and set it on Fire; which continued burning for thirteen Days together; when about two Thirds of that lofty City was laid in Ashes, or levelled with the Ground; and must all have undergone the same Fate, but that the dastardly Crew were forced to sly on the

Approach of Belisarius. But what they had demolished, foon brought on the Destruction of the rest; so that at this Period may be fixed the total Departure of Arts and Learning from Italy and the West; the Augustan Style, with all its noble Improvements, the worthy Craft of Masonry, and the Harmony of the Lodges being by Gothic Ignorance overthrown and forgotten.

Justinianus, which by the Judgment and Industry of Trebonian, and other Coadjutors, was digested into the Form Millions of Gold, in rebuilding the Church of St. Sophia, which he intended should equal, if not excel, the Temple of Solomon; but in vain. This Emperor caused the Eyes of Belisarius to be put out, and otherwise so persecuted him, that he was forced to beg at the great Gate of St. Sophia, Date obolum Belisario, quem virtus extulit, invidia depression. Many great and noble Actions were personned by Justinian, but all of them will not wipe off his savage Ingratitude to so worthy a Man,

From this Period the Sciences and Arts began to decline a-pace in the East, as we have already observed it had done in the West. Bloody Persecutions and Wars were for After Christ feveral Ages carried on, and most of the Emperors 565. murdered by their Successors; with Millions of brutal Actions that degraded and difgraced the Christian Name: Their Wickedness did not, however, go unchastisfed; for the. mahomedang now began to be very powerful, After Christ landevery-where triumphed over their wretched and wicked Opponents, and with Fire and Sword overthrew all the glorious Monuments of ART in their Way. Every Thing that had the least Appearance of Elegance, or Places dedicated to learned Uses, were assuredly doomed to After Christ immediate Destruction. So that Arts and Sciences 710. with the CRAFT of MASONRY now suffered more in Afa and Africk, than at any Period of Time before; and the Augustan Style in the East is thereby, in all Probability, buried in Oblivion for ever.

Thus

^{*} Give a Halfpenny to Belisarius, whom Virtue had raised, and Envy depressed.

Thus that noble, just, and beautiful Manner of Building was quite lost, and the very Principles thereof forgotten; for, when the Gotiss and those conquered by them began to affect stately Structures, their Architecture, which probably they had but at second Hand from the Arabs and Moors, became so coarse and artless, that the greatest of their Architects knew nothing of just Designing; they wanted both Heads and Hands to imitate the Ancients; nor could They do it for many Ages: yet, not wanting Wealth and Ambition, they did their best: and so the more Ingenious gradually coalesced in Societies or Lodges, in Imitation of the Ancients, according to the remaining Traditions that were not quite obliterated, and hammered out a new Style of their own, called the GOTHIC.

THE remaining Monuments of which, loaded with vast Improprieties, are Evidences of the Ignorance of the Architects: So far indeed they differed from the Ancients in their Proportions and Ornaments, that its Columns are either too massy, in a Form of vast Pillars, or as flender as Poles, having Capitals without any certain Dimensions, carved with the Leaves of Branch-urfin. Thistles, Coleworts, &c. and likewise adorned with expensive Carvings, and costly, though lamentable Imagery, without any of that august Beauty and just Symmetry, which the Fabrics of the Ancren's entertain as with: Yet it must be owned, that the Endeavours of the GOTHIC Craftsmen to supply the Want of good old Skill, with their numerous and coftly Decorations for that Purpose, were very laudable, and manifested their great Esteem for the Royal Art: and have, it must be confessed, rendered their Structures very venerable and magnificent, though bearing no Comparison with the true bigh Taste of the GRECIAN or Roman Style.

The REVIVAL of OLD Architecture, or the Augustan Style.

After Christ Charles C

TRUE Malonty began to revive again in Tuscany, where Buschatto, the Greek, began a faint Imitation of the Ancients in the Church of St. John, at Pisa, and formed a new Lodge there. Il BUONO made a farther Progress therein at Ravenna, and built the Steeple of St. Mark, at Venice.

CHARLES of Anjou, King of Naples, was the first Prince that publicly encouraged the Revival of the Arts of Designing, by employing the said Cimaboius and Nicholas Pisan to build an Abby in the Plain of Taglia Cotzo, where Charles had deseated the Pretender Conradin. John Pisan, Son of Nicholas, built for

1298

for the King his new Castle of Naples. This Royal Patron (the same as Grand-Master) of the Revivers, died A. D. 1285. And his Successors inriched the Kingdom of Naples with learned Architects and splendid Edifices.

CIMABOIUS and the *Pifans* educated many fine *Masters* and *Fellow Crafts*; particularly,

GIOTTO the Architect; till the Florentines arrived at a pretty good Imitation of the Ancients, which was discovered in all the Parts of the Church in St. Miniate.

After Totila's Havoak 547

GIOTTO and his Pupils formed an Academy of Defigners, or a learned Lodge at Florence, who, like those of old at Athens and Sicyon, enlightened all Italy, by sending forth excellent Connoisseurs and dexterous Operators in all the Arts of Defigning.

ANDREW PISAN, one of them, was made a Magistrate of Florence; and many of them afterwards flourished Wealthy at Pisa, Ravenna, Venice, Urbino, Rome, and Naples.

LAURENTIO GHIBERTO, educated there, conducted for some Time the Raising of the said St. Mary Delsiore, and framed the Two Brazen Gates of St. John's, of which, long afterwards, Michael Angelo said in Rapture, that they were worthy of being the Gates of Paradise.

DONATELLO next appeared with Andrea Verrochio, the Master of Piedro Perrugino and Leonardo da Vinci, prodigious Men! Also Dominigo Ghirlandaio the Master of Michael Angelo and Maiano, and other sublime and profound Architects.

BUT the Sothic Style was not quite left off at Florence, where a learned Lodge of Designers was established, till BRUNELESCHI, having studied at Rome the Beauty and Justness of the OLD Roman Buildings, there standing or prostrate, established the compleat Use of the Darie.

Doric, Ionic, Corinthian, and Composite Orders; which Even happened 853 Years after the Devastation of Totila.

This happy Restoration of the Augustan Style was also much owing to the Princes of the House of Medicis; for John de Medicis, Duke of Florence, became the Patron or GRAND-MASTER of the aforesaid Lodge or Academy; and his Son Cosmo I.

COSMO I. de Medicis, educated in that same Academy, succeeded his Father as Duke of Florence, and Grand-Master of the Revivers. He erected a fine Library of the best Manuscripts brought from Greece and Asia, and a curious Cabinet of the rarest and most valuable Things that could be gathered. He established very great Commerce by Sea and Land, and justly acquired the Title of Pater Patrix, the Father of his Country, and died A. D. 1464.

PETER I. de Medicis upheld the Lodge, and died Duke of Florence A. D. 1472.

But he was not so Eminent as either his Father or his Son

JOHN JULIAN de Medicis, the most beautiful Youth and the most excellent Connoisseur in true old Architecture in all Florence. He was also an excellent Operative Mason, and died A. D. 1498.

HIS Grandson, LAURENZO I, inriched the same at a vast Expence, and built a great Gallery in his Garden for educating the most promising Youth, of whom Michael Angelo was his Favourite. His second Son John, elected Pope Leo the Tenth, was Grand Master in rearing the Cathedral of St. Peter at Rome. His Cousin Julius, afterwards Pope Clement the Seventh, also carried on St. Peter's, as Grand Master: And so that whole Family thought it their Honour to encourage Arts

and Sciences, and to promote the Interests of the Fraternity, down to Cosmo the Second, created Grand Duke of Tuscany, who was the Augustus of his Day, as the Patron of true Architecture.

Соѕмо

Cosmo II. de Medicis succeeded Duke Alexander 1537, as absolute Duke of Florence.

HE Instituted the Knights of the Order of St. Stephen, 1561, POPE PIUS V. and the Emperor Ferdinand I. gave him the Title of GREAT DUKE of Tuscany A.D. 1569.

HE was the chief Patron, or Grand Master, of all the Italian Designers and Crastsmen in Architecture, Painting, Sculpture, Statuary, Carving, and Plaistering. He Instituted the samous Academy or Lodge at Pisa for the Improvement of Disciples and Entered Prentices. He made such beautiful Alterations in the Buildings of Florence, that, like Augustus, when a dying, He said, I found the City built of Brick and coarse Stone, but I leave It built of Polished Marble. He died aged only 55 Years, A.D. 1574.

AFTER the Revival of the Augustan Style in Italy, A.D. 1400,

LEON BAPTISTA ALBERTI was the first Modern that wrote of Architecture: and many excellent Majons slourished in this 15th Century. But more were born and educated, who proved the Wonders of the World in the next Century, and will be ever mentioned in the Lodges with the greatest Honour, for Improving the Revival, as if the Augustan Age Itself had revived, under the generous Encouragement of the Popes, the Princes, and States of Italy, the Patrons of the many Lodges then constituted. Thus

BRAMANTE, the learned Monk of Urbino, studied MASONRY at Milan under CÆSARIANO; and, after having narrowly examined all the Remains of the Ancients throughout Italy, He was employed by three successive Popes to build at Rome the Choister of the Church of Peace, the Palace of the Chancery, and St. Laurence in Damaso. He adorned many old K. Churches.

Churches with Frontispieces of his own Designing, built the pretty little St. Peter's in Mont Orio, raised some Buildings in the Vatican and in the Palace of Belvidere.

POPE JULIUS II, the learned Patron or Grand Master of Rome, retained BRAMANTE as his Architect and Grand Warden, 1503; and ordered him, as Master of Work, to draw the Grand Design of St. Peter's new Cathedral in Rome, the largest and most accurate Temple now in all the Earth: And the said Pope with Bramante led a solemn Assembly of Cardinals, Clergymen, and Craftsmen, to level the Foot-Stone of Great St. Peter's in due Form, A. D. 1507.

BRAMANTE conducted that Work seven Years, till he died; and was buried in It by Pope Leo X, duly attended by his Craftsmen, A. D. 1514.

RAPHAEL of Urbino, the Prince of Painters, had learned Majonry of his Uncle Bramante, and succeeded him in surveying St. Peter's till he died, aged only 37 Years, on his own Birth-Day, April the 6th, 1520, when he was to be made a Cardinal by Pope Leo X. and with a universal Mourning was buried in the Rotunda or Pantheon.

' JOCUNDE of Verona and Antony San Gallo succeeded Raphael at St. Peter's, till They died A.D. 1535, when Pope Paul III. preferred to that office

MICHAEL ANGELO, the greatest Defigner of his Time, and in his last Years the greatest Architect, who, finding fault with San Gallo's Draughts, made a new Model of St. Peter's according to which that lofty Temple was finished.

This Grand Master, leaving his Warden Pirro Ligorio at St. Peter's, erected the new Capitolium, the Palace of Farnese, and other accurate Structures. He had before built the Mouso-leum in St. Peter's ad Vincula, with the curious Statue of Moses, the fine Front of St. Laurence at Florence, by order of Pope Leo

LEO X, the Sepulchre of the House of Medicis by order of Duke Alexander, and the Apostolical Chamber at Rome.

MICHAEL ANGELO certainly carried on Majorry to Its highest Perfection, till he died at Rome aged 90 Years, on the 17th of February, 1564, highly esteemed by all the Princes of Europe; and Cosmo, the Great Duke of Tuscany, stole his Corpse from Rome, resolving that since he could not have Angelo alive, He would have him dead, and solemnly buried him in St. Cross at Florence, attended by the Fraternity; and ordered Vasario to design his Tomb, inriched with the three great Marble Statues of Architecture, Painting, and Sculpture.

James Barotzi da VIGNOLA succeeded Michael Angelo at St. Peter's, by order of Pope Paul V. but Ligorio the Grand Warden, for altering Angelo's Design, was turned out by Pope Gregory XIII. Vignola, besides his accurate Edifices at Rome and elsewhere, designed for Philip II, King of Spain, the samous Escurial and St. Laurence, Master-pieces of Art. He published a Book of the Orders: and the Beauty of his Profiles is much admired. He designed the Church of Jesus at Rome, the Castle of Caprarola and the Side of the Palace of Farnese that is next the Tiber, and died at Rome, aged 66, A. D. 1573.

MADERNI succeeded Vignola at St. Peter's, and built the stately Frontispiece of that vast Temple, about the Time that Pope GREGORY III. made a New Calendar, or began the New Style called, from him, the Gregorian, the first Year of which is A.D. 1582. Gregory, dying 1585, was succeeded by Pope Sixtus Quintus, who employed

Dominico Fontana in many curious Buildings, and to move the Egyptian Obelisks into public Places erect. After which Fontana was chief Engineer of Naples, and built the magnificent Palace of the Viceroy.

'Tis

'Tis endless to mention the ingenious Co-temporaries of those great Masters, the other accurate Revivers and Improvers of the Royal Art, such as

BALDASSARE PERUZZI, who designed and made the Model of the Palace of Chighi, and his Disciple Sebastian Serglio.—

Julio Romano, the chief Disciple of Raphael, built for the Duke of Mantua his Palace of Δ Delta,—Lombard of Milan—

James Sansovino, recommended by Pope Leo X. to the Venetians—Jerom Genga built for Duke Guido Baldo his Palaces at Urbino and Pesaro.—Pellegrino Tibaldi built the great Church of Milan, and its Dome was made by John James de la Porta—Sir Baccio Bandinelli, who was knighted by Pope Clement VII. for being a most excellent Sculptor.—Benvenuto Cellini—Daniel da Volterra built pretty St. Helen's in the great Church of Trinity dell Monte at Rome.—Perrin del Vaga built at Genoa the Grand Palace of Prince Doria, and was an inimitable Plaisterer, a fine Art then much in Request.

AT Venice also the Revival was carried on; for Jocunde of Verona, above-mentioned, built the Stone Bridge, and erected the stately Gates of Verona.

WHEN CHARLES V. besieged Rome 1525, MICHAEL ANGELO retired to Venice, when the Doge got him to design the famous Bridge of Realto.

JAMES SANSOVINO constituted a Lodge of Architects (or Masters) at Venice, artfully supported the Dome of St. Mark then in Danger *, embellished the Palace and Treasury, and fortisted the whole Republic as Grand Master of Masons.

BUT at Venice the Augustan Style was also well improved by the learned VINCENT SCAMOTZI, DANIEL BARBARO, and the great

ANDREA PALLADIO.

PALLADIO'S excellent Genius was highly discovered by the facred Edifices, the Palaces, and Seats of Pleasure, and the other charming

charming Buildings of his, throughout the State of Venice. He wrote also with great Judgment of the Orders of Old Architecture, and of the Temples of the Ancients; which is a noble Monument of his Merit, useful to all Ages. He died renowned A.D. 1580.

Thus Italy was again the Mistress of the World, not for Imperial Power, but for the Arts of Designing revived from Gothic Rubbish.

But, from the first Revival, the Masons began to form New Lodges (called by the Painters Academies or Schools, as all true Lodges ought to be) read Lectures, communicated their Secrets and Hints of Knowledge, and performed all other good old Usages, that are preserved among Masons to this Day, and perhaps will be to the End of Time.

Upon the perfect Re-establishment of OLD Architecture, the Fraternity were not only supported in raising mighty Works, but the Great and Noble encouraged and patronized the Lodges, becoming Brethren of the Crast; which presaged them a happy Prospect of quietly enjoying their Freedom down to many Ages; so that here it will be very necessary to break off their Story, and pursue the History of Masonry into Britain, to the same happy Period of being patronized by the Good, the Great, and Brave, the Friends of Freedom and of Britain, down to our own Times,

The INTRODUCTION.

in the North and West of Europe, had lost their original fine Skill, that they brought from the Plains of Shinar; or how the Knowledge thereof came first into the British Isles; the most early Histories of our Country being so interlarded with Fables, and perplexed with Contrarieties, that Authors agree not where to begin, how to go on,

or where to end, that the Parts of it may with any tolerable Colour of Truth hang together.

YET it is certain, that the first Inhabitants of this Island must have brought with them no small Knowledge in Geometry or Masonry, as there are the strongest Reasons to believe they were not the meanest Proficients in the Art of Navigation.

THERE are some Remains of very admirable Skillin Architecture, much earlier than the Romans, but now so defaced by villainous Hands, and the Ruins of Time, that, from the remaining rude Structures thereof, it is hard to determine, what might have been their original Use, or in what a skilful Manner they might have been designed: or how far we may presume to six the Name of barbarous and rude, on what at this Day is infinitely beyond the Contrivance of any modern Invention; as the Means of performing those great Works were perhaps lost soon after the Age of those very Barbarians, who performed them.

THE DRUIDS, in BRITAIN, had many of the Uses of MASONS amongst them, probably gathered from the MAGIANS; they held the Immortality of Souls, held their Assemblies in Woods and Groves, or under some wide spreading OAK; which was also the Practice of the Patriarchs: And what they taught was committed to Memory, and not, on any Account, allowed to be written. They determined all Causes, ecclesiastical and civil; taught Philosophy, Astrology, Politics, Rites and Ceremonies, and Poetry; and in Songs set forth the heroic Deeds of great Men, to the Imitation of Posterity.

THE TROJAN Race of BRITONS built many Towns, amongst those was EBRANK, commended for a very great Year of the Flood 1318.

B. C. 1030. Builder; from whom we have the Cities of York and Edinburgh. His Successors in the CRAFT built Canterbury, Winchester, and Shaftsbury; with many Temples to Apollo, Diana, &c.

BLADUD

[73]

BLADUD is afferted to have been bred at Athens, and from thence, returning a great Mathematician and Architect, brought four Philosophers with him, whom he placed at Stamford, making that Town a Kind of University. Year of the Flood 1444. He also built Bath, and produced the hot Waters B. CHAP. I.

From Julius Cæsar to the first Arrival of the SAXONS in Britain.

ÆSAR in his Commentaries gives us the first certain Account of Britain. He landed on the Shore, betwixt Deal and Dover, A. M. — 3949 on the 20th of August; but did not B.C. or Christ. Æra 55 reach London till next Year, when he landed a second Time: Nor did he even then pursue his Conquests, because his Design was to be the GRAND MASTER of the Roman Republic.

THE Romans did not follow his Tract, till
AULUS PLAUTIUS came from the Emperor Claudius, A. D. 42.
Next Year

CLAUDIUS came himself, and afterwards he sent

OSTORIUS SCAPULA, who was succeeded by several Roman Lieutenants, that soon formed Lodges for building Castles and other Forts, to secure their Conquests. About the Year of L

CHRIST 77, the Emperor VESPASIAN fent his brave Lieutenant,

JULIUS AGRICOLA, who conquered as far as the Istomus, between the Firths of Chyde and Forth, which he fortified by a Wall of Earth against the Piets, a barbarous People, who from the North disturbed the new Settlers, and their Friends, with continual inroads, plunder, and murders. But, after he was recalled, the Northerns got over the Wall, and continued their bold incursions into the South, till

ADRIAN the Emperor came in Person*, and, finding the War tedious and hazardous, rather chose to sence the Roman Province from those Invaders by a RAMPART, called ADRIAN'S WALL, reaching from Tine-Mouth to Solway Firth. But afterwards Antoninus Pius sent

LOLLIUS URBICUS, who subdued the *Brigantes*, and repulsed the *Northerns*, even beyond *Agricola*'s Wall, which he fortified with Castles +. After this we read of

Lud, or Lucius, a British King under the Romans, who became Christian, and built Churches: while the War was carried on in the North with various Success, till the Northerns forced Virius Lupus to purchase Peace with a great Sum of Money. This inraged the Emperor

SEPTIMUS SEVERUS, who came ‡ with a great army, vowing to extirpate them; but could not, though he penetrated to the Northern Sea. For, having lost 50,000 Men in the Expedition, he was forced to retire within the old Rampart built by Adrian, which he raised into a Stone Wall, called of old. Mur Sever, or Wall of Severus; also Greme's Dyke, or Picts Wall.

WHEN || Nonnius Philippus came from the Emperor Gordian,

EMILIUS

* A. D. 120, † A. D. 131, ‡ A. D. 207. | A. D. 238.

EMILIUS CRISPINUS, his Master of Horse, a fine Architect, built a pretty Temple at Caërlisse, the Altar-Stone of which was lately found there, near the old Mur Sever.

THE South Britons had been long foftened in their Manners by the Romans, and affected their Politeness, wearing the Roman Dress, and speaking Latin; and abounding also in Commerce; they improved in Arts and Sciences, and found the Roman Conquest was a great Blessing to the Conquered, beholding with Pleasure their Country, formerly all grotesque and wild, now adorned with venerable Temples, solemn Courts of Justice, stately Palaces and Mansions, large and beautiful Cities, regular Forts and Castles, convenient Bridges, &c.

THE joint Emperors Dioclesian and Maximilian employed CARAUSIUS as their Admiral against the Saxon Pirates, who being at Peace with the Piets, and gaining the Army, assumed the Purple, and was recognized and admitted into Partnership of the Empire by the other Two*.

CARAUSIUS encouraged the Craft, particularly at VERULAM, (now St. Albans in Hertfordshire) by the worthy Knight, Albanus †. This Albanus was afterwards converted to the Christian Faith, by the preaching of Amphibalus, of Caërleon, who, hearing of his worthy Deeds and great Fame, came to him, and accomplished his Conversion.

After Christ 303.

St. Alban was the first who suffered martyrdom in Britain.

THE old Constitutions affirm, and the old English Masons as firmly believe it, that Carausius employed St. Alban to "Enwiron the City of Verulam with a Stone Wall, and to build him a fine Palace; for which that British King made St. Alban the Steward of his Houshold, and chief Ruler of the Realm.

L 2 "St.

* A. D. 287. † This is afferted by all the old Copies of the Constitutions, and the old English Masons firmly believed it.

"St. Alban also loved Masons well, and cherished them much, and he made their Pay right good, viz. two Shillings

" per Week, and three Pence to their Cheer: whereas before

"-that Time, through all the Land, a Mason had but a Penny

" a Day, and his Meat. He also obtained of the King a Charter

" for the Free-Masons, for to hold a general Council, and gave it

" the Name of Assembly, and was thereat himself as Grand-

" MASTER, and helped to make Masons, and gave them good.

" Charges and Regulations."

St. Alban was born at *Verulam*, of *Pagan* Parents: In his Youth he took a Journey to *Rome*, in Company with Amphibalus, of the City of *Caër-Leon*, supposed by many to be by Birth a *Roman*; and there served for seven Years in the Army of the Emperor *Dioclesian*. Leland tells us, that, at the Time St. Alban slourished,

LEARNING, and the Polite Arts,

had been lately introduced by the Romans into Britain; which was now become a Province of the Empire; and that the Youth of Quality and Distinction used to travel to Rome for Improvement in Knowledge and the Sciences*. Being returned home, he lived highly honoured in the Town of Verulam; where, through the Example and Instructions of his Fellow-Traveller, Amphibalus, he became a thorough Convert to the Christian Religion. In the tenth and last general Persecution of the Christians, in the Year 303, he was beheaded for the same; a Favour intended him, on the Account of his noble Birth +, at Holmburst, since called Derswald, where now the Town of St. Alban stands, to the lasting Honour of whose Name and Merits King Offa in after Times sounded a most magnificent Monastery.

THE Emperor CARAUSIUS governed the Empire of Britain, with an upright and unstained Reputation; and, above all, was a very great Encourager of Learning and learned Men, and improved the Country in civil Arts; was a Man of real Merit; and made a great Collection of Workmen, and other Artificers, from all Parts: The People enjoyed perfect Peace and Tranquillity under him for several Years. And his Builders, and other Artificers, were employed by him in very large Bodies.

' EUMBNIUS, the Panegyrist, setting forth what great Numbers of Masons had then left the Island; "Even your City of Autun, " fays he, most devoted to your Service, and in whose Name I. " am especially to congratulate you; has been well stored with. "Artificers (Architects and Masons) fince your Victory over " the Britons, whose Provinces abounded with them: and now, " by their Workmanship, the same City of Autun rises in Splen-"dor, by the rebuilding of their ancient Houses, erecting public "Works, and the Instauration of Temples: So that the ancient "Name of a Roman Brotherhood, which they long fince en-" joyed, is again restored, by having your imperial Majesty for "their second Founder+." From hence it is beyond all Doubt, that the Reduction of Britain occasioned many excellent Artificers to go over to the Continent, who had been entertained by Caraufus, and had so greatly contributed to the Beauty, Convenience, and Magnificence of the Island, that Constantius Chlorus chose to make it the Seat of his Empire.

WHEN Dioelesian and Maximian abdicated +,.

CONSTANTIUS CHEORUS succeeded Emperor of the West, a Lover of Arts and Sciences; and much encouraged the CRAFT, till he died || at York, the same Year that his British Empress. HELENA girt LONDON with a Stone Wall.

CONSTANTINE the Great, their Son, born at York, in Britain, succeeded; who partitioned South Britain into sour Provinces. During his Reign the Christian Religion sourished throughout his Empire; the Britans enjoyed Peace and Plenty, and old Roman MASONRY appeared in many stately and curious Piles, till he died, A. D. 336.

AFTER which, the Northerns, joining the Saxon Pirates, invaded the South, till ‡

THEODOSIUS (Father of the Emperor Theodofius the Great) came from the Emperor Valentinian I. and bravely beat them back, even over Agricola's Wall, which he fortified with new Cafles and Forts; and, recovering the Land of the old Meates between the two Walls, he made it a fifth Province, calling it VALENTIA. He also beautified London, repaired all the Cities and Forts, and left Britain, A. D. 374.

MAXIMUS came next from the Emperor Gratian. He assumed the Purple, sailed into Gaul, but was defeated in Italy by Theodosius Magnus, beheaded § and numbered among the Tyrants.

CONSTANTINE, a common Soldier, was, for the Sake of his fortunate Name, next chosen by the Sautherns of this Island to be their Leader; who also assumed the Purple, sailed into Gaul, and was there deseated and beheaded by the Emperor Honorius. And now

Honorius, not being able to protect the Southerns against the Northerns, fairly renounced his Sovereignty over Britain, the next Year after ALARIC had facked Rome: || yet

AETIUS, the General of Valentinian III, being victorious in Gaul, out of Compassion sent the Britons one Legion under Gallio, who repelled the Northerns beyond Mur Sever, which he rebuilt of Stone Work eight Feet broad, and twelve Feet high: but being recalled, he left the South Britons to defend themselves against the Northerns, and carried off his Legion, ** tho' the Roman Soldiers

DURING which Time, the ROMANS had propagated MASONRY in every Garrison; and had built fine Places past Number, even to the North Border, or the Wall of AGRICOLA; near which, at the Forth, they raised the little Temple of their God TERMINUS, that stands to this Day, now called by the vulgar Arthur's Oven, a curious Rotunda in Shape of the Pantheon at Rome, 20 Feet high, and near 20 Feet in Diameter. Nay, in Times of Peace the Northerns might learn of the Romans to extend the Art to the farthest North and West, or the ULTIMA THULE.

But true old Masonry departed also from Britain, with the Roman Legions: for the many Roman Families had settled in the South, and were blended with the Britons, who had been well educated in the Science and the Art; yet the subsequent Wars, Confusions and Revolutions in this Island, ruined ancient Learning, till the fine Artists were dead, without Succession. For the Northerns, hearing that the Roman Legions were never to return, broke through Mur Sever, seized all the Land North of the Humber, and ravaged the South the more easily, that the Southerns were divided by petty Kings, till + they chose

VORTIGERN their Sovereign or general Monarch, who, being unable to retrieve Affairs, got the Consent of his Nobles to invite the SAXONS of lower Germany to come over and help him, Upon which Invitation Prince Hengist with 2000 Saxonslanded in Thanet near the Kentish Shore. ‡‡

CHAP. II.

From the first ARRIVAL of the SAXONS, to WILLIAM the Conqueror.

HE SAXONS having affished Vortigern to drive the Scots and Picts beyond the Humber, built THONG CASTLE in Lincolnshire; and, being daily recruited from lower Germany, and the River Elb; resolved to settle in Britain, and after much Bloodshed, in many Battles between the Natives, they overpowered them, and sounded an HEPTARCHY, or Seven Kingdoms, viz.

1. Kingdom of Kent, founded by Hengist, A. D.	455.
2. Kingdom of Sussex, by Ella,	491.
3. Kingdom of Wessex, by Cherdick,	519.
4. Kingdom of Essex, by Erchenwyne,	527.
5. Kingdom of Northumbria, by Ida the Angle,	547.
6. Kingdom of East Angles, by Uffa,	571.
7. Kingdom of MIDDLE ANGLES OF MERCIA, by CRIDA	1,584.

As the Anglo-Saxons increased, the Britons lost Ground; for after the Death of Ambrosius Aurelius, and his brave Son King Arthür, the Britons had no Grand Monarch, but only a few petty Kings. Many of them submitted to Crida (as to other Saxon Kings) many fled to Cornwal, and by Sea to Armorica, (called still Bretagne in France) and many went to North Britain among the Scoto-Walenses; tho' the greater Part fled beyond the Severn, where they were cooped in between the Mountains and the Irish Sea*.

THE Anglo-Saxons, who had always called the Britons GUAL-ISH or Walishmen, now called their Settlement beyond the Severn WALISHLAND or WALES, called still by the French GALLES from

Digitized by GOO

from the GAULS their Progenitors. And here they elected the noble

CADWAN their King, the Progenitor of the Christian Kings and Princes of WALES.

During the horrid Wars, fince the Departure of the Roman Legions, about 160 Years, Majonry was extinguished: nor have we any Vestige of it, unless we reckon that of STONEHENGE, and allow, with some, that Ambrosius, King of the Britons, raised that famous Monument on Salisbury-Plain, by the Art of Marvellous MERLIN (whom the Populace counted a Conjurer and Prophet) in Remembrance of the bloody Congress, when Hengist murdered 300 British Nobles. Others think it an old Celtic Temple built by the Britons long before the Romans came here; and some have counted it only a Danish Monument. But the great Inigo Jones, Grand-Master of Masons in England, and his Kinsman Mr. John Web, have learnedly proved it to be a Roman Temple, the largest Piece of Antiquity in the Island*.

THE ANGLO-SAXONS were all rough, ignorant Heathens; and, despising every thing but War, gave the finishing Stroke to all the Remains of ancient Learning that their Brother Savages had by Accident lest undemolished; affecting only their own barbarous Manner of Life, till some pious Teachers from Wales and Scotland converted many to the Christian Faith: but none of their Kings, till Augustin the Monk, with forty more

Monks, amongst whom the Sciences at that Time were preserved, sent by Pope Gregory, baptized

After Christ

ETHELBERT King of KENT, and in 60 Years after all the Kings of the HEPTARCHY were converted. Then Churches, Monasteries, Palaces, and beautiful Mansions were built. And, although they too late lamented the ignorant and destructive Conduct of their Fore-Fathers, yet they knew not how to construct the OLD Architecture; but, being zealous to the utmost of what they knew,

M

followed the GOTHIC Style in building many Palaces, Caftles, fortified Cities, and Cathedral Churches, amongst which were

The Cathedral of Canterbury, - A. D. 600

And a great many more described in the Monasticon Anglicanum.

THEY also built many Palaces and Castles, and fortified their Cities, especially on the Borders of each Kingdom. This required many Masons, who soon formed themselves into Societies or Lodges, by Direction of Foreigners that came over to help them.

But, where the Welch dwelt, we find the earliest Accounts, at least, of Sacred Architecture; as at Glastonbury in Devon-shire; Padstow in Cornwall; Caër-Leon or Chester, afterwards translated to St. Asaph's in Flintshire; Llan Twit, or Church of Iltutus; Llan Cadarn Vawr, or Church of Great St. Patern; the Monastery of Llan Carvan; Bangor in Caernarvonshire; Holybead in Anglesey; Llandass in Glamorganshire; Menevia, or St. David's in Pembrokeshire; and many more Churches, Monasteries, and Schools of Learning.

THESE many Saxon Lodges continued to improve, till

Kenred, King of Mercia, and general Monarch of England, fent to Charles Martel, the right worshipful Grand Master of France, Father of King Pepin, who had been educated by Brother Mimus Græcus, for a Communication of worshipful and worthy Brethren to assist the Crast, now in a sourishing Condition in his Dominions, and to strengthen their Lodges. To which the royal Brother Martel willingly agreed; and sent from thence some expert Masons to teach the Saxons those Laws and Usages of the Craft, that had been preserved from the Havock of the Goths, but not the Augustan Style, for that was buried in its own Ruins in the West.

THE CLERGY now studied Geometry and Architecture, such as it was, because the Noble and Wealthy, the Kings and Queens, thought

[83]

thought it meritorious to build Churches and other pious Foundations, where many of them led a recluse Life, and ended their Days: Their holy Houses or Monasteries were under the Direction of the Clergy, where the Lodges usually were held. Yet at first they built those Houses mostly of Timber only, till

BENNET, the Abbot of Wirral, introduced the Use of Brick and Stone, about A. D. 680: So that even the Gothic Style was but in its Infancy during the Heptarchy, which lasted, from Hengist's

Danes out of Mercia, and fortified many Towns and Castles to prevent their Incursions. Next the King put his learned Brother ETHELWARD at the Head of the Fraternity, and sounded the University of Cambridge that had been long a Nursery of the Learned. The King died 924, leaving three Sons and a Queen.

8. Athelstan the eldest Son succeeded, tho only the Son of a Concubine, and at first left the Crast to the Care of his Brother Edwin, called in some Copies his Son: for in all the old Constitutions It is written to this Purpose, viz.

tion's It is written to this Purpose, viz. "THAT tho" the ancient Records of the Brotherhood in Eng-" land were most of them destroyed or lost in the Wars with the " Danes, who burnt the Monasteries, where the Records were kept; "yet King Athaffan (the Grandson of King Alfred) the first " anointed King of England, who translated the Holy Bible into the "SAXON Language, when he had brought the Land into Rest and "Peace, built many great Works, and encouraged many Masons " from France and elsewhere, whom He appointed Overseers there-" of: they brought with them the Charges and Regulations of the "foreign Lodges, and prevailed with the King to increase the Wages. "THAT Prince EDWIN, the King's Brother, being taught "Geometry and Masonry, for the Love he had to the said Craft, "and to the honourable Principles whereon it is grounded, pur-" chased a Free Charter of King Athelstan his Brother, for the Free "Majons having among themselves a Correction, or a Power and " Freedom to regulate themselves, to amend what might happen " amiss, and to hold a yearly Communication in a General Assembly. "THAT accordingly Prince EDWIN fummoned all the Free " and Accepted Masons in the Realm, to meet him in a Congre-" gation at YORK, who came and formed the Grand Lodge " under him as their Grand Master, A. D. 926. "THAT they brought with them many old Writings and

"Records of the *Craft*, some in *Greek*, some in *Latin*, some in "French, and other Languages; and from the Contents thereof they framed the CONSTITUTIONS of the English Lodges, "and

" and made a Law for Themselves, to preserve and observe the fame in all Time coming."

BUT good Prince EDWIN died before the King [A. D. 238] without Issue, to the great Grief of the Fraternity; though his Memory is fragrant in the Lodges, and honourably mentioned in all the old Constitutions.

Some English Historians say that, Edwin being accused of a Plot, the King set him adrift in a Boat without Sail and Oars; that Edwin, protesting his Innocence, went aboard and jumpt into the Sea; and that his Esquire was drove into Picardy.

THE Fact, as commonly received, is this: The King suspecting his younger Brother Edwin, of defigning to deprive him of his Crown, caused him, notwithstanding his Protestations of Innocency, to be put on board a leaky Ship, with his Armour-bearer and Page. The young Prince, unable to bear the Severity of the Weather, and Want of Food, desperately drowned himself; some time after, the King's Cup-bearer, who had been the chief Causer of this Act of Cruelty, happened, as he was serving the King at Table, to trip with one Foot; but recovering himself with the other, See, said he pleasantly, bow Brothers afford each other Help; which striking the King with the Remembrance of what himself had done, in taking off *Edwin*, who might have helped him in his Wars, he caused that Business to be more thoroughly examined, and, finding his Brother had been falfly accused, caused his Cupbearer to be put to a cruel Death, endured himself seven Years sharp Penance, and built the two Monasteries of *Middleton* and Michelness, to atone for this base and bloody Fact*. Dr. Howell, speaking of this Story, treats it as if very indifferently founded, and, on that Account, unworthy of Credit +. Abbot Brompton tells us the Story at large ‡, and after him most of the later Writers as usual, that is, with an Addition of various Circumstances: so that it cannot be faid this Story is without Foundation. Buchanan hath improved

^{*} Speed's Chronicle, Book vii. ch. 38. † Gen. Hist. P. iv. c 2. § 10. † Chron. p. 838.

improved it very happily. Thus it runs in his Writings: "They, " that is, the English Writers, make this Athelstan guilty of Parri-"cide, in killing his Father and his two Brothers, Edred and "Edwin, whose Right it was to succeed their Father in his King-"dom. Fame increases the Suspicion, that Edward was violently " put to Death, because it attributes to him the Title of Martyr *." Buchanan cites no Authority for this, because indeed there could be no Authority cited: Whatever he did with Edwin, most certainly Athelftan did not murder Edred, fince he not only furvived; but succeeded him in the Kingdom. As for the Murder of his Father, that is the Effect of Buchanan's Ignorance; he mistook Edward the Elder, who was really the Father of Athelftan, for Edward the Martyr, who began his Reign in 975, that is, five and thirty Years after Athelftan was in his Grave. Such is the Accuracy, such the Integrity, of this Writer! In like Manner Rapin gives us this Story, without the least Mark of Doubt or Hesitation +: and yet we presume, there are some stronger Reasons against the Credit of this whole Story, and still stronger against that Part of it, which alledges Edwin to have been unjustly put to Death. Simeon of Durham, and the Saxon Chronicle, fay no more, than that Edwin was drowned by his Brother's Command, in the Year 993‡. Brompton places it in the first, or at faithest in the second, Year of his Reign; and he tells us the Story of the rotten Ship, and of his punishing the Cup-bearer ||. William of Malmsbury, who is very circumstantial, says he only tells us what he heard **; but Matthew, the Flower-gatherer 4, stamps the whole down as an indubitable Truth. Yet these discordant Dates are not to be accounted for. If he was drowned in the second, he could not be alive in the tenth Year of the King. The first is the more probable Date, because about that Time there certainly was a Conspiracy against King Athelstan,

flan, in order to dethrone him, and put out his Eyes; yet he did not put the Author of it to Death: is it likely then that he should order his Brother to be thrown into the Sea upon bare Suspicion? But the Reader must remember that we cite the same Historians, who have told us this Story, to prove that Athelftan was unanimously acknowledged King, his Brethren being too young to govern: one would think then they could not be old enough to conspire. If we take the second Date, the whole Story is destroyed; the King could not do feven Years Penance, for he did not live so long; and as for the Tale of the Cup-bearer, and his stumbling at the King's Table, the same Story is told of Earl Goodwin, who murdered the Brother of Edward the Confessor. Lastly, nothing is clearer from History. than that Athelstan was remarkably kind to his Brethren and Sisters, for whose Sakes he lived single, and therefore one would think his Brother had less Temptation to conspire against him.

KING ATHELSTAN built many Castles in Northumbria to bridle the Danes (whom he had subdued) and the famous Abby of St. John at Beverley in Yorkshire, and Melton Abby in Dorsetshire; He rebuilt the City of Exeter, and repaired the old Church of the Culdes at York. He died without Issue, 940.

MASONRY in England, from WILLIAM the Conqueror to King HENRY IV.

WILLIAM I. the Conqueror, having settled England, appointed Bundulph Bishop of Rochester, Roger de Montgomery, Earl of Shrewsbury and Arundel, and other good Architects, to be at the Head of the Fellow-Crasts, first in civil and military Architecture, building for the King the Tower of London, and the Castles of Dover, Exeter, Winchester, Warwick, Hereford, Stafford, York, Durbam, Rochester, and Newcastle upon Tine; whereby the proud Normans bridled the English.

THEN, in facred Architecture, building Battle-Abby near Hastings, in Memory of his Conquest; St. Saviour's Southwark, and 9 more Religious Houses: While others built 42 Monasteries, and 5 Cathedrals. The King brought many expert Masons from France, and died in Normandy, A. D. 1087.

- 2. WILLIAM II. Rufus, succeeded his Father, and employed his Architects and Crastsmen in building a new Wall round the Tower, and in rebuilding London-Bridge; and, by Advice of his Grand Lodge of Masters, He built the Great Palace of Westminster, with large Westminster-Hall, 270 Feet long, and 74 Feet broad, the largest one Room upon Earth; and 4 Religious Houses: While others built 28 such. He died without Issue, A. D. 1100.
- 3. HENRY I. Beau Clerc, born at Selby in Yorkshire, succeeded his Brother William, though the eldest Brother, Robert Duke of Normandy, was yet alive.

Now the Norman Barons perceiving their great Possession England depended only on Royal Pleasure; and sinding the Laws of the Anglo-Saxons to be better for securing Property than the Laws of Normandy; the Mormans began to call themselves

N

ENGLISHMEN,

ENGLISHMEN, to affert the Saxon Rights, and prevailed with this King to grant them the first Magna Charta, or GREAT CHARTER and Deed of Rights, in this first Year of his Reign, A. D. 1100.

THIS KING built the great Palace of Woodstock, and a little one at Oxford to converse with the Learned, and 14 Religious Houses; while others built about 100 such, besides many fine Mansions. He died A.D. 1135, and was succeeded by his Nephew,

4. STEPHEN, Count of Bulloign, Son of ADELA, Daughter of William the Conqueror, by the Power of the Clergy. During the Civil Wars between him and MAUD the Empress, the Nobles and Gentry, being courted by both, laid hold of the Occasion to build about 1100 Castles, that proved afterwards very convenient for them in the Barons Wars; so that the Masons were as much employed as the Soldiers, under their Grand Master Gilbert de Clare, Marquis of Pembroke; by whom the King built four Abbies and two Nunneries, with St. Stephen's Chapel in the Palace of Westminster; while others built about 90 Religious Houses. King Stephen died without Issue Male,

The PLANTAGENETS of Anjou commenced, viz.

- I. HENRY II. Plantagenet, Count of Anjou, became King of England, A. D. 1154, who fortified some Castles against the Welch and Scots, built some little Palaces, and 10 Religious Houses; while others built about 100 such. The Grand Master of the Knights Templars erected their Society, and built their Temple in Fleetstreet, London. The King died A. D. 1189.
- 2. RICHARD I, much abroad, died without Issue 1199; yet in this Reign about 20 Religious Houses were built.
- 3. King John succeeded his Brother Richard, and first made his Chaplain Peter de Cole-Church Gand Master of the Masons in rebuilding London-Bridge of Stone, which was finished by the next Master

Master William Almain, A. D. 1209. Next Peter de Rupibus Bishop of Winchester was Grand Master, and under him Geoffrey Fitz Peter was chief Surveyor or Deputy Grand Master, who built much for the King; while others built about 40 Religious Houses. The King died A. D. 1216, and was succeeded by his Son,

4. HENRY III. a Minor of nine Years. When Peter de Rupibus, the old Grand Master, came to be the King's Guardian, he levelled the Footstone of Westminster Abby, in that Part called Solomon's Porch, A. D. 1220.

PETER Count of Savoy (Brother of the Queen's Mother) built the Palace of Savoy in the Strand, London: And John Baliol, Lord of Bernard Castle, in the County of Durham (Father of John King of Scotland) founded Baliol College in Oxford. The Templars built their Domus Dei at Dover, and others built 32 Religious Houses. The King died A. D. 1272, and was succeeded by,

5. Edward I. who being deeply engaged in Wars, left the Craft to the Care of several successive Grand Masters, as Watter Gistard Archbishop of York, Gilbert de Clare Earl of Gloucester, and Salph Lord of Mount Hermer, the Progenitor of the Montagues: And by these the King fortisted many Castles, especially against the Welch, till they submitted to him, A. D. 1284, when Edward the King's Son and Heir was born at Caermarthen, who was the first English Prince of Wales.

THE King celebrated the Cape-stone of Westminster Abby, A.D. 1285, just 65 Years after it was sounded. But that Abby and the Palace being burnt down, 1299, the King ordered the Palace to be repaired; but was diverted from repairing the Abby by his Wars in Scotland. In this Reign Merton College Oxford, the Cathedral of Norwich, and about 20 more Religious Houses were founded. The King died in his Camp on Solway Sands, the 7th of July, 1307, and was succeeded by,

6. EDWARD II. who made Walter Stapleton, Bishop of Exeter, Grand Master, who built Exeter and Oriel Colleges in N 2 Oxford;

Oxford; while others built Clare-Hall in Cambridge, and 8 Religious Houses. The King died A.D. 1327, and was succeeded by,

- 7. EDWARD III. who became the Patron of ARTS and SCIENCES. He fet up a Table at Windfor, 600 Feet round, for feafting the gallant Knights of all Nations, and rebuilt the Caftle and Palace of Windfor, as a Royal Grand Master, by his several Deputies or Masters of Work, viz.
- 1. **John** de Spoulee, called Master of the Ghiblim, who rebuilt St. George's Chapel; where the King constituted the Order of the Garter, A. D. 1350.
- 2. William of Wickham, at the Head of 400 Free Masons, rebuilt the Castle strong and stately, A. D. 1357, and when he was made Bishop of Winchester, A. D. 1367, then next
- 3. Robert of Barnham succeeded at the Head of 250 Free Masons, and finished St. George's Great Hall, with other Works the Castle, A. D. 1375.
- 4. henry Benele (called at first, in the old Records, the King's Free Mason) built for the King the London Charter-house, King's-Hall Cambridge, Queenborough Castle, and rebuilt St. Stephen's Chapel, now the House of Commons in Parliament.
- 5. Simon Langham, Abbot of Westminster, who repaired the Body of that Cathedral as it now stands.

THE King also founded the Abby of Eastminster near the Tower, upon whose Site now stands the Victualling-Office: And his laudable Example was well followed; for the Queen endowed Queen's College Oxford, while others built many stately Mansions, and about 30 Religious Houses: Notwithstanding the expensive Wars in this Reign,

THE CONSTITUTIONS were now meliorated; for an old Record imports, "That in the glorious Reign of King Edward III, when Lodges were many and frequent, the Grand Master with his Wardens,

Wardens, at the Head of the Grand Lodge, with Confent of the Lords of the Realm, then generally Free Masons, ordained,

That for the future, at the Making or Admission of a Brother, the Constitutions and the Charges shall be read.

That Master Masons, or Masters of Work, shall be examined whether they be able of Cunning to serve their respective Lords, as well the Highest as the Lowest, to the Honour and Worship of the foresaid Art, and to the Prosit of their Lords; for they be their Lords that employ and pay them for their Travel.

That, when the Master and Wardens preside in a Lodge, the Sheriff, if need be, or the Mayor, or the Alderman (if a Brother) where the Chapter is held, shall be sociate to the Master, in help of him against Rebels, and for upholding the Rights of the Realm.

That Enter'd Prentices at their Making shall be charged not to be Thieves, nor Thieves Maintainers. That the Fellow-Crafts shall travel honestly for their Pay, and love their Fellows as themselves; and, That all shall be true to the King, to the Realm, and to the Lodge.

That if any of the Fraternity should be fractious, mutinous, or disobedient to the Grand Master's Orders, and, after proper Admonitions, should persist in his Rebellion, He shall forfeit all his Claim to the Rights, Benefits, and Privileges of a true and faithful Brother, &c. Concluding with AMEN, So mote it be.

KING EDWARD III. having buried his eldest Son EDWARD, A. D. 1376, the Scourge of France, and the Hope of England; commonly called the Black Prince; he died 21 June, 1377, was succeeded by,

8. RICHARD II. his Grandson; who employed **William** of Wickham, Bishop of Winchester, Grand Master, to rebuild West-minster-Hall as it now stands; and **William**, at his own Cost, built New College in Oxford, and founded Winchester College: While others built about 15 Religious Houses.

At last, while King Richard was in Ireland, his Cousin Henry Duke of Lancaster landed in Yorkshire, raised a great Army, seized King Richard upon his Return, got the Parliament to depose him, and succeeded to the Throne, A.D. 1399. Next Year Richard was murdered without Issue.

MASONRY in England, from HENRY IV. to the Royal Tewdors.

9. HENRY IV. Duke of Lancaster, who supplanted and succeeded King Richard II. A. D. 1399, appointed Thomas Fitz-Allen, Earl of Surry, to be Grand Master; and, after his famous Victory of Shrewsbury, the King sound Battle-Abby there, and afterwards that of Fotheringay. Others built 6 Religious Houses, and the Londoners sounded their present Guild-Hall, a large and magnificent Fabric. Denry Deutle, mentioned above, who was FREE MASON to Edward III, Richard II, and Henry IV, died A. D. 1400.

10. HENRY V. succeeded his Father in 1413; and, while triumphing in France, ordered the Palace and Abby of Sheen (now called Richmond upon Thames) to be rebuilt by the Direction of the Grand Master, penry Chicheley Archbishop of Canterbury; while others built 8 Religious Houses. The King died A. D. 1422.

By his Queen, Katharine of France (afterwards the Wife of **Dwen Tewdor**) he had

II. HENRY. VI. a Minor of nine Months, in whose third Year an ignorant Parliament endeavoured to disturb the Lodges, though in vain, by the following Act, viz.

3 Hen. VI. Cap. I. A. D. 1425.

Title. MASONS shall not confederate in Chapters and Congregations.

WHEREAS, by yearly Congregations and Confederacies made by the Masons in their General Assemblies, the good Course and Esset of the Statutes of Labourers be openly violated and broken, in Subversion of the Law, and to the great Damage of all the Commons; Our Sovereign Lord the King, willing in this Case to provide a Remedy, by the Advice and Consent aforesaid, and at the special Request of the Commons, Hath Ordained and Established,

That such Chapters' and Congregations shall not be bereaster bolden: And, if any such be made, They that cause such Chapters and Congregations to be assembled and bolden, if they thereof be convict, shall be judged for Felons: And that other Masons who come to such Chapters and Congregations be punished by Imprisonment of their Bodies, and make Fine and Ransom at the King's Will.

But this Act is explained in Judge Coke's Institutes, Part III. fol. 19. where we find that the Cause why this Offence was made Felony, is for that the good Course and Effect of the Statutes of Labourers was thereby violated and broken. Now, says my Lord Coke,

All the Statutes concerning Labourers before this Act, and whereunto this Act doth refer, are repealed by the 5 Eliz. Cap. 4. about A.D. 1562, whereby the Cause and End of making this Act is taken away, and consequently the Act is become of no Force; for, cessante ratione legis, cessat ipsa lex: and the Inditement of Felony upon this Statute must contain, That those Chapters and Congregations are to the violating and breaking of the good Course and Effect of the Statutes of Labourers; which now cannot be so alledged, because those Statutes be repealed. Therefore this should be put out of the Charge of Justices of the Peace.

But this Act was never executed, nor ever frightened the Free Masons from holding their Chapters and Congregations, lesser or larger; nor did ever the Working Masons desire their Noble and Eminent Brothers to get it repealed, but always laughed at it: For they ever had, and ever will have, their own Wages, while they coalesce in due Form, and carefully preserve the Cement under their own Grand Master; let Cowans do as they please. And that the King himself in Time desired, and was admitted a FREE and Accepted Mason, may fairly be inferred from the following Examination, recorded to have been seen in King Henry VI's own Hand-writing, published by Mr. Locke.

- (2) (3) Fyrste menne yn the Este, &c. It should seem by this, that MASONS believe there were Men in the East before ADAM, who is called the ffyrste Manne of the Weste; and that Arts and Sciences began in the East. Some Authors of great Note for Learning have been of the same Opinion; and it is certain, that Europe and Asrica (which,

in respect to Asia, may be called western Countries) were wild and savage, long after Arts and Politeness of Manners were in great Persection in China, and the Indies. E. R. W. M. IV. W. S. W.

(4) THE Venetians, &c. In the Times of Monkish Ignorance 'tis no Wonder that the Phanicians should be mistaken for the Venetians. Cr, perhaps, if the People were not taken one for the other, Similitude of Sound might deceive the Clerk who first took down the Examination. The Phanicians were the greatest Voyagers among the Ancients, and were in Europe thought to be the Inventors of Letters, which perhaps they brought from the East with other Arts.

iDilliam iDautstett, Bishop of Winchester, to be Grand Master, in building Eton College near Windsor, and King's College in Cambridge; though, before the Civil Wars in this Reign, the Chapel of it was only finished, a Master-Piece of the richest Gothic that can hardly be matched. The King also founded Christ's College, Cambridge (afterwards finished by Margaret Beaufort, Countess of Richmond) and his Queen MARGARET of Anjou founded Queen's College, Cambridge. While ingenious WANEFLEET, athis own Cost, built Magdalen College, Oxford; and others about 12 Religious Houses.

So that, before the King's Troubles, the Majons were much employed, and in great Esteem; for the foresaid Record says farther, That the Charges and Laws of the Free Masons have been seen and perused by our late Soveraign King Henry VI. and by the Lords of his most honourable Council, who have allowed them, and declared that, They be right, good, and reasonable to be holden, as they have been drawn out, and collected from, the Records of auntient Tymes, &c. &c.

MASONRY in England, from King HENRY VII. till the Union of the Crowns, A. D. 1603.

HEN King Richard III. was flain at Befworth, his Crown was forthwith put upon the Head of the Conqueror, HENRY TEWDOR, Earl of Richmond, in the Field of Battle, and the Army proclaimed him

HENRY VII. King of England, on August 22, 1485; nor did he ever affect another Title and Claim.

But his Wife ELIZABETH PLANTAGENET, Daughter of King Edward IV, was truly the Heiress of all the Royal Plantagenets, and conveyed hereditary Right to her Offspring.

New Worlds are now discovered,

The Cape of Good Hope, A. D. 1487. and America, — 1493.

In this Reign the **Gothic** Style was brought to its highest Perfection in England, while it had been wholly laid aside in Italy by the Revivers of the old Augustan Style.

JOHN ISLIP, Abbot of Westminster, finished the Repairs of that Abby, A. D. 1493, so as it stood till the late Reparations in our Time, when this ancient Building was restored, at a national Charge, under the Direction of Grand Master WREN.

THE Grand Master and Fellows of the Order of St. John at Rhodes (now at Malta) assembled at their Grand Lodge, chose King Henry their Protector, A. D. 1500.

THIS ROYAL GRAND MASTER chose for his Wardens of England,
the foresaid John Islip, Abbot of Westminster, and
Sir Reginald Bray, Knight of the Garter.

On Deputies, by whom the King summoned a Lodge of Masters in the Palace, with whom he walked in ample Form to the East End of Westminster Abby, and

and levelled the Footstone of his famous Chapel, on June 24, 1502, though it well deserves to stand clean alone, being justly called, by our Antiquary Leland, the eighth Wonder of Art, the finest Piece of Gotbic upon Earth, and the Glory of this Reign. Its Capestone was celebrated A. D. 1507.

THE King employed Grand Warden BRAY to raise the middle Chapel of Windsor, and to rebuild the Palace of Sheen upon Thames, which the King called RICHMOND; and to enlarge the old Palace of Greenwich, calling it PLACENTIA; where he built the pretty Box called the Queen's House.

HE rebuilt Baynard-Castle, London; founded six Monasteries, and turned the old Palace of Savoy into an Hospital: While others built Brazen-Nose College, Oxford; Jesus's and St. John's Colleges, Cambridge; and about six Religious Houses; till the King, aged only 54 Years, died at New Richmond, on April-22, 1509, leaving his Crown and the Care of the Crast to his Son and Successor,

HENRY VIII. * Tewdor, aged eighteen Years.

In this Reign, Cardinal Wolsey was chosen Grand Master, who built Hampton-Court; and next reared Whitehall; the College of Christ's Church, Oxford; and several more good Edifices; which, upon his Disgrace, were forseited to the Crown.

THOMAS CROMWELL, Earl of Effex, was the next Patron of the Craft under this King; for whom he built St. James's Palace, Christ's Hospital, London, and Greenwich Castle. Mean while

THE King and Parliament threw off the old Yoke of the Pope's Supremacy, and the King was declared the SUPREME HEAD of the Church ‡; and Wales was united to England ||.

THE Religious Houses, in Number about 926, were suppressed, A. D. 1539. Cromwell, Earl of Essex, being unjustly beheaded, A. D. 1540, JOHN TOUCHET, Lord Audley, became Grand Master.

* A. D. 1509. † A. D. 1530. ‡ A. D. 1534. | A. D. 1536.

Bur

But the Suppression of the Religious Houses did not hurt Mafonry; nay; Architecture of a finer Style gained Ground: For those Religious Houses and their Lands being sold by the King, at easy Rates, to the Nobility and Gentry, they built of those Ruins many stately Mansions: Thus Grand Master Audiey built Magdalen College, Cambridge; and his great House of Audley-End.

King Henry VIII; aged near 56 Years, died on 28 Jan. 1546-7, and left three Children.

EDWARD VI. Tewdor, born by Queen Jane Seymour, a Minor of 9 Years, under the Regency of his Mother's Brother, EDWARD Duke of Somerfet, who established the Protestant Religion; and as GRAND MASTER, built his Palace in the Strand, called still Somerset-House, though sorfeited to the Crown, A. D. 1552. And, when the Regent was beheaded, John Poynet, Bishop of Winchester, was the Patron of the Free Masons, till the King died without Issue, A. D. 1553.

MARY Tewdor, Daughter of Queen Katharine of Arragon, aged 38 Years, succeeded her Brother Edward, as Queen Sovereign.

SHE restored the Romish Religion, and persecuted the Protestants; married Philip II. King of Spain, lost Calais, and died without Issue, Nov. 17, 1558.

Years, succeeded her Sister Mary, as Queen Sovereign. She restored the Protestant Religion, and was declared Supreme Head of the Church. Now Learning of all Sorts revived, and the good old Augustan Style in England began to peep from under its Rubbish: And it would have soon made great Progress, if the Queen had affected Architecture; but hearing the Masons had certain Secrets that could not be revealed to her (for that she could not be Grand Masser) and being jealous of all secret Assemblies, she sent an armed Force to break up their annual Grand Lodge at York, on St. John's Day, 27 Dec. 1561.

Bur

BUT Sir THOMAS SACKVILLE, Grand Master, took Care to make some of the chief Men sent Free Masons, who, then joining in that Communication, made a very honourable Report to the Queen; and she never more attempted to dislodge or disturb them; but esteemed them as a peculiar Sort of Men, that cultivated Peace and Friendship, Arts and Sciences, without meddling in the Affairs of Church or State.

In this Reign some Colleges were built, and many stately Manfions, particularly famous Burkigh-House: For Travellers had brought home some good Hints of the happy Revival of the August an Style in Italy, with some of the fine Drawings and Designs of the best Architects; whereby the English began apace to slight the Gothic Style, and would have intirely left it off, if the Queen had frankly encouraged the Craft.

HERE it is proper to fignify the Sentiment and Practice of the Old Masons, viz. That Kings and other Male Sovereigns, when made Masons, are Grand Masters, by Prerogative, during Life; and appoint a Deputy, or approve of his Election, to preside over the Fraternity with the Title and Honours of Grand Master: But if the Sovereign is a Female, or not a Brother, or a Minor under a Regent, not a Brother; or if the Male Sovereign or the Regent, though a Brother, is negligent of the Crast; then the old Grand Officers may assemble the Grand Lodge in due Form, to elect a Grand Master, though not during Life, only he may be annually rechosen while he and they think sit.

ACCORDINGLY, when Grand Master SACKVILLE demitted*, FRANCIS RUSSEL, Earl of Bedford, was chosen in the North; and in the South Sir Thomas Gresham, who built the first Royal Exchange at London +. Next,

CHARLES HOWARD, Lord of Effingbam, was Grand Master in the South till 1588; then GEORGE HASTINGS, Earl of Huntingdon, till the Queen died unmarried, on March 24, 1602-3, when

MASONRY in Scotland till the Union of the Crowns.

THE History of the first Kings of the Scots in Albin, or the Western Parts beyond the Clyde, and the middle Grampian Hills; and also that of the Piets in Caledonia, along the German Sea Coast and towards England; not containing much to our Purpose, we may begin with the Restoration of the Kingdom of Albin (according to the Scottish Chronicle) made by

King Fergus II. Mac Erch, A. D. 403

AND, even after that Period, the History of both these Nations consists mostly of War; only we learn, that the Piets were a more mechanical and mercantile People than the Scots, had built many Cities, and first founded all the strong Castles in their Dominion; while the Scots affected rather to be a Nation of Soldiers, till

KENBTH II. Mac Alpin, King of Scots, demolished the Kingdom of the Picts, and so became the first King of all Scotland, A. D. 842. He repaired the public Edifices after the Wars, and died; 858.

Bu'r both the Branches of his Royal Race were mostly engaged in War till King MALCOLM II. Mac Keneth succeeded his Cousin, King Grimus, A. D. 1008, as on the next Page.

This had been more amply and accurately discovered, if the Learned of Scotland had published a Monasticon Scoticanum, with an Account of the old Palaces and Castles, as fine as any in Europe, before the Competition of Bruce and Baliol, in a Chronological Deduction: A Work long and much defired!

DURING the Competition, MASONRY was neglected; but, after the Wars, King ROBERT I. Bruce, having fettled his Kingdom, forthwith employed the Craft in repairing the Castles, Palaces, and Religious Houses, and the Nobility and Clergy sollowed his Example, till he died, A. D. 1329.

His first Wife, ELIZABETH MUIR, was only His second Wise, EUPHE-Countess of Strathern, for she died before he was MIA Ross, was Queen of King. Yet her Son, viz.

2. ROBERT III. Stewart (called John formerly) succeeded hits Father, A. D. 1390. Upon hearing that his only Son James, in his Voyage to France, was captivated by King Henry IV. of England, though in Time of Peace, King Robert broke his Heart, 1406.

WALTER Stewart, Earl of Athol, who murdered King James I. at Perth.

^{3.} JAMES I. Stewart, after 18 Years; was ransomed and crowned, 1424.

2. ROBERT HI. THE MARKET

3. James I. Stewart, though unjustly captivated, ruled by his Regent, the said Robert Duke of Albany.

HENRY WARDLAW, Bishop of St. Andrew's, was now Grand Master, and founded the University there, A. D. 1411; though it was long before a Place of Education.

Robert Duke of Albany died A.D. 1420, and his Son Duke MURDOCH was Regent till the King was ranfomed, restored, and crowned, A. D. 1424.

KING JAMES I. proved the best King of Scotland, the Patron of the Learned, and countenanced the Lodges with his Presence, as the Royal Grand Master*; till he settled a yearly Revenue of 4 Pounds Scots (an English Noble) to be paid by every Master Mason in Scotland to a Grand Master, chosen by the Grand Lodge, and approved by the Crown; one nobly born, or an eminent Clergyman, who had his Deputies in Cities and Counties: And every new Brother at Entrance paid him also a Fee. His Office impowered him to regulate in the Fraternity what should not come under the Cognizance of Law-Courts: To him appealed both Mason and Lord, or the Builder and Founder, when at Variance, in order to prevent Law-Pleas; and, in his Absence, they appealed to his Deputy or Grand Warden, that resided next to the Premisses.

This Office remained till the Civil Wars, A. D. 1640, but is now obfolete, nor can it be revived but by a ROYAL Grand MASTER. And now the Majons joyfully toafted

To the King and the Craft.

This excellent King repaired Falkland and his other Palaces, fortified all his Castles and Sea-Ports, and influenced the Nobility to follow his Example in much employing the Crast, till he was basely murdered in the Dominicans Abby at Perth, by his Uncle Walter Stewart, Earl of Athol, A. D. 1437; and, being justly lamented by All, his Murderers were severely punished.

This is the Tradition regorded by the Scotch Masons.

In this Reign WILLIAM SINCLAIR, the great Earl of Orkney and Caithness, was Grand Master, and built Roslin Chapel near Edinburgh, a Master-piece of the best Gothic, A. D. 1441. Next Bishop Turnbull, of Glasgow, who sounded the University there, A. D. 1454.

By his Wife MARGARET, Daughter of Christiern I. King of Denmark.

8. MARY Stewart, Queen Sovereign of Scotland, a Minor of 7 Days, who became Queen Confort of France; and, after the Death of her first Husband, King Francis II, without Issue, she returned to Scotland, A. D. 1561, and brought with her some fine Connoisseurs in the Augustan Style.

SHE next married, A. D. 1565, HENRY STEWART, Lord Darnley, eldest Son of MATTHEW Earl of Lennox, the lineal Male descended from Sir Robert Stewart, Lord Darnley, of the Old Royal Race, as in the Margin of Page 113.

SHE fell out with her Nobles, who dethroned her; and, being defeated in Battle, she fled for Shelter into England, 1568; where Queen Elizabeth detained her a Prisoner, and at last, for Reasons of State, beheaded her, on Feb. 8, 1586-7.

HE founded the University of Edinburgh, A.D. 1380. He failed to Denmark, and married ANN Princess Royal, A.D. 1589; when he visited the noble TYCHO BRAHE, the Prince of Astronomers, in his Scarlet Island.

THE Nobility and Gentry, having divided the Spoil of the Church's Revenues, built many stately Mansions of the Ruins of the Religious Houses, as was done in England; and the Masons began to similate the Augustan Style, under the Direction of several successive Grand Masters.

FOR, after the Death of David Lindfay, ANDREW STEWART, Lord Ochiltree, was Grand Master; next Sir James Sandilands, Knight of Malta: Then Claud Hamilton, Lord Paisley (Progenitor of our late Grand Master Abercorn) who made King James a Brother Mason, and continued in Office till the Union of the Crowns, A. BEFORE this Period, not only the Crown was possessed of many fine Palaces and strong Castles, but also the Nobles and Chiefs of Clans had fortified themselves, because of their frequent Feuds or Civil Wars; and the Clergy had built many Abbies, Churches, Monasteries, and other Religious Houses, of as fine Gothic as any in Europe, most venerable, sumptuous, and magnificent.

THE Fraternity of old met in Monasteries in foul Weather; but, in fair Weather, they met early in the Morning, on the Tops of Hills, especially on St. John the Evangelist's Day; and from thence walked, in due Form, to the Place of Dinner, according to the Tradition of the old Scots Masons, particularly of those in the antient Lodges of Killwinning, Sterling, Aberdeen, &c.

MASONRY in Ireland till Grand Master KINGSTON, . A. D. 1730.

HE antient Romans having never invaded Ireland, we have no good Vouchers of what happened there before St. PA-TRICK, in the Days of King LEOGHAIR, about A.D. 430 *. He founded St. Patrick's at Armagh, and the Priory of St. Avog at Doch-Derg, near the Cave called St. Patrick's Purgatory: But afterwards many Religious Houses appeared throughout Ireland.

Non did the Anglo-Saxons invade Ireland: But BEDE and others, in the 8th Century, affirm, that then many Britons, Saxons, and Franks, reforted to the Schools of Ireland (for Education.

But the Norwegians and Danes conquered the most Part of the Island; and, though at first they destroyed the Religious Houses, they built many Castles and Forts, with lefty Beacons, to alarm the whole Country in an Hour; till they were converted to Christianity by the Irish, when the Danes built many Religious Houses; as at Dublin St. Mary's Abby and Christ-Church, about A. D. 984,

AT length, BRIEN BOROM +, the Grand Monarch of All Ireland of Heber's Race, after defeating the Danes in many Battles, totally routed them, A.D. 1039

So the far greater Part of the Danes were forced to fail home, and carried with them (as the Irifh affirm) the best old Records of Ireland, an irreparable Damage! But the Learned of other Nationsolong to see the remaining Manuscripts of Ireland published with good Franslations, and also a better Monasticon (Hibernicum; that, among other Antiquities, the Vestiges of their old Celtic Architecture might be traced, if possible; for the Augustan Style

AFTER the Expulsion of the Danes, the Milesan Kings of Ireland ordered the Palaces, Castles, and Religious Houses, to be repaired, and much employed the Crast down to Roderic O Connor, the last Monarch of all Ireland, who built the wonderful Castle of Tuam, now demolished, A. D. 1168.

But the Royal Branches, having made themselves petty Sovereigns, were imbroiled in frequent Civil Wars: One of them, viz.

DERMOT King of Leinster, being defeated by the others, came to HENRY II. King of England, and got leave to contract with Adventurers, viz. RICHARD STRONGBOW, Earl of Pembroke; ROBERT Fit-Stephen of Cardigan, and MAURICE Fitz-Gerald; who brought over an Army of Welch and English to DERMOT'S Assistance, took in Dublin, Waterford, and many other Places, which they fortified and surrendered into the Hands of their King HENRYII, as soon as he had followed them into Ireland, A.D. 1172.

Wings of England now Lords of Ireland.

THE Irish, not without Reason, say, that King HENRY II. did not conquer Ireland; only some of their petty Kings and Princes, rather than be farther imbroiled in Civil Wars, chose to come under his Protection, and of their own Accord received the Laws of England, with the Freedom of a Parliament at Dublin. But, where the English prevailed, Masonry and other Arts were much encouraged.

Thus the said Strongbow, Lord Warden of Ireland, built the Priory of Kill-Mainham; while St. Bar sounded*the Abby of Finhar. John de Courcy, Earl of King sale, rebuilt the Abby + of St. Patrick in Down, the Priories of Nedrum and St. John's, with St. Mary's Abby of Innys, &c.

In the Reign of RICHARD I. ALURED, a noble Dane, built St. John's in Dublin; and Archbishop Comin rebuilt ‡ St. Patrick's there, all of Stone, which before was only of Timber and Wattles.

King

KING JOHN was King of Ireland (as the Irish affirm) till his Brother Richard died, 1199; and afterwards went into Ireland, and employed HENRY LAUNDERS, Archbishop of Dublin and Lord Justice, as Grand Master, in building the Castle* of Dublin; while WILLIAM Earl of Pembroke built the Priory of Kilkenny.

KING HENRY III. granted Ireland a Magna Charta +, the fame with that of England. Felix O Quadam, Archbishop of Tuam, rebuilt St. Mary's Dublin, and covered it with Lead; while Hugh de Lacy, Earl of Ulster ‡, founded Carrick-Fergus, a Friary in Down, the Priory of Ards, and famous Trim-Castle, &c. as Grand Master, or Patron of the Crast.

THE Native Princes lived pretty well with the English, till the Reign of King Edward II, when Prince Edward Bruce (Brother of Robert Bruce, King of Scotland) headed the confederated Irish, conquered the Island, was crowned King of all Ireland, and reigned three Years; till Sir Roger Mortimer, Earl of March, landed with a strong English Army, and slew King Edward Bruce in Battle.

AFTER this, Masonry in the English Settlements revived; and in the North of Ireland too, where the Scots had gradually settled, and brought with them good Gothic Masonry. At last,

THE Natives regarded the Kings of England as the lawful Sovereign Lords of Ireland, down to King Henry VIII, who, in Defiance of the Pope, proclaimed himself King of Ireland, which was confirmed in the Parliament at Dublin, A. D. 1542.

Kings of England now Kings of Ireland.

HENRY King of *Ireland* was succeeded by his Son King ED-WARD, and he by his Sister Queen MARY *Tewdor*, who got *Pope* PAUL IV. to make her Queen of *Ireland*; succeeded by her Sister Queen ELIZABETH *Tewdor*, who founded the famous *University of Dublin*, A. D. 1591.

R Masonry

Majorry made some Progress in Ireland, in the Reigns of JAMES I. and CHARLES I. till the Civil Wars, when all the Fabric was out of Joint till the Restoration, A. D. 1660. After which, it was revived by some of the Disciples of Inigo Jones, in the Reign of CHARLES II, and till the Wars of King JAMES II. But, after King WILLIAM had settled the Country, Arts and Sciences were again well cultivated in the Reigns of Queen Anne and King George I.

MANY are the beautiful Remains of the best Gothic Architecture in this fine Island, of which the Learned of Ireland can best give a Chronological Deduction. But, fince the Revolution, the Augus-TAN STYLE has been much encouraged there, both by the Government and the Nobility and Gentry: So that the Metropolis Dublin is now adorned with a stately Tholfel or Town-house, an excellent Custom-house, a curious Armory in the Castle, a fine Library in the Univerfity, neat and convenient Barracks for the Garrison, a Royal Hospital for old Soldiers; Stephen's-Green Square, the largest in Europe, being an English Mile round, or 1760 Yards; Stephens's Hospital, besides Churches and other Edifices, raised by good Architects, particularly by Thomas Burgh, Esq; late Surveyor-General of Ireland, and his Successor Sir EDWARD LOVET PEARCE, the Architect of the new magnificent Parliament-House (far beyond that of England) founded on the 3d of February, 1728-9; when Lord Carteret, then Lord Lieutenant, the Lords Justices, several Peers and Members of Parliament, some eminent Clergy, with many Free Masons, attended by the King's Yeomen of Guard, with a Detachment of Horse and Foot, made a solemn Procession thither. And, the Lord Lieutenant having in the King's Name levelled the Footstone at the South-side, by giving it three Knocks with a Mallet, the Trumpets founded, the folemn Croud made joyful Acclamations, a Purse of Gold was laid on the Stone for the Masons, who drank to the King and the Craft, &c. And on the Stone were placed two Silver Medals of King George II. and Queen

The Union of the Two Crowns to the Year 1756.

CHAP. I.

The Augustan Style in Britain, from the Union of the Crowns 1603, to the Restoration in 1660.

EFORE this *Period*, some Gentlemen of fine Taste, returning from their Travels sull of laudable Emulation, resolved, if not to excel the *Italian Revivers*, at least to imitate them in old *Roman* and *Grecian Masonry*. But no Remains being here, no Vestiges of the good old Augustan Style; those ingenious Travellers brought home some Pieces of old Columns, some curious Drawings of the *Italian Revivers*, and their Books of *Architecture*; especially

INIGO JONES, born near St. Paul's, London, A. D. 1572 (Son of Mr. Ignatius or Inigo Jones, a Citizen of London) bred up at Cambridge, who naturally took to the Art of Designing, and was first

first known by his Skill in Landskip Painting; for which ho was patronized by the noble and learned WILLIAM HERBERT [afterwards Earl of Pembroke;) made the Tour of Italy at his Lordship's Expence; where he improved in the Royal Art, under some of the best Disciples of the samous

ANDREA PALEADIO. ~

INIGO JONES, upon his Return, laid aside his Pencil, and took up the Square, Level, and Plumb, and became the VITRU-VIUS of Britain, the Rival of Palladio, and of all the Italian Revivers; as it soon appeared after

Scottish Kings of all Britain.

Royal Brother Mason, and Royal Grand Master by Prerogative, wishing for proper Heads and Hands for establishing the Augustan Style here, was glad to find such a Subject as INIGO JONES; whom he appointed his General Surveyor, and approved of his being chosen Grand Master of England, to preside over the Lodges.

THE King ordered him to draw the Plan of a new Palace at Whitehall; and so when the old Banquetting-House was pulled down, the King, with Grand Master Jones, and his Grand Wardens, (WILLIAM HERBERT, Earl of Pembroke, and Nicholas Stone; Esq; Master Mason to his Majesty) attended by many Brothers in due Form, and many eminent Persons, walked to Whitehall Gate, and levelled the Footstone of the New Banquetting-House with three great Knocks, loud Huzzas, Sound of Trumpets, and a Purse of broad Pieces of Gold, laid upon the Stone, for the Masons to drink

Room of that large Extent fince the Days of Augustus, and the Glory of this Reign. Afterwards the lofty Cieling was adorned by the fine Pencil of Peter Paul Rubens.

THE best Craftsmen from all Parts resorted to Grand Master Jones, who always allowed good Wages and seasonable Times for Instruction in the Lodges, which he constituted with excellent By-Laws, and made them like the Schools or Academies of the Designers in Italy. He also held the Quarterly Communication * of the Grand Lodge of Masters and Wardens, and the Annual General Assembly and Feast on St. John's Day: When he was annually rechosen, till A. D. 1618, in which Year the foresaid

WILLIAM Earl of *Pembroke* was chosen *Grand Master*: And, being approved by the King, he appointed INIGO JONES his *Deputy* Grand Master.

Masonry thus flourishing, many eminent, wealthy, and learned Men, at their own Request, were accepted as Brothers, to the Honour of the Crast, till the King + died, March 27, 1625, leaving his Crown and Dominions to

2. CHARLES I. Stewart, aged 25 Years, a Royal Brother. He was also Grand Master by Prerogative: And, being well skilled in all the Arts of Masonry, he encouraged the best so-reign Painters, Sculptors, Statuaries, Plaisterers, &c. but wanted no Foreigners for Architecture, because none of them equalled his own Inigo Jones and his excellent Disciples.

WHEN Grand Master PEMBROKE demitted, A. D. 1630,

His Daughter Elizabeth married the King of Bohemia; her Daughter Sophia was married to the Duke of Brunswick, Elector of Hanover, and brought him forth George I. King of Great Britain, Father of his late Majesty King George II.

[128]

HENRY DANVERS, Earl of Danby, succeeded in SOLOMON's Chair by the King's Approbation; and, at his own Cost, erected a small, but most accurate Piece of the old Architecture, by the Design of Jones, his Deputy; even the samous beautiful Gate of the Physic Garden at Oxford, with this Inscription:

GLORIÆ DEI OPTIMI MAXIMI, HONORI CAROLI REGIS, IN USUM ACADEMIÆ ET REIPUBLICÆ, A.D. 1632. HENRICUS COMES DANBY.

THOMAS HOWARD, Earl of Arundel (the Progenitor of our late Grand Master Norfolk) then succeeded Danby, at the Head of the Fraternity, a most excellent Connoisseur in all the Arts of Designing, and the great Reviver of learned Antiquities, who will be ever famous for his Marmora Arundeliana: But Deputy Jones was never out of Office; and joined Grand Master Arundel, in persuading Francis Russel, Earl of Bedford, to lay out his Grounds of Covent-Garden in an oblong Square, East and West: Where he built the regular Temple of St. Paul, with its admirable Portico, made Parochial, A. D. 1635, when

Grand Master Bedford succeeded, and employed his Deputy Jones to build the North and East Sides of that Square with large and losty Arkades (commonly called Piazzas) which, with the said Church on the West End, make a most beautiful Prospect after the Italian or antient Manner.

INIGO JONES succeeded Bedford in SOLOMON's Chair again; and, before the Wars, the King employed him to build the stately great Gallery of Somerset-House, fronting the Thames: And the King intended to carry on Whitehall according to Jones's Plan, but was unhappily prevented by the Civil Wars: For the Parliament's Army conquered the King and Parliament too, and murdered him at his own Gate, on January 30, 1648-9.

YET, even during the Wars, the Majons met occasionally at feveral Places.

[129]

THE Great INIGO JONES, aged 79 Years, died at London, and was buried in St. Bennet's Church at Paul's Wharf, on the 26th of July 1651, the Grand Master of Architects, who brought the Augustan Style into England.

He shewed his great Skill also in designing the magnishment Row of great Queen-street, and the West Side of Lincoln's-Interields, with beautiful Lindsey-House, the late Chirurgeons Hall and Theatre, (now Barbers Hall in Monkwell-street, London) Shaftsbury-House (now the London Lying-in Hospital for married Women) in Aldersgate-street, Southampton-House Bloomsbury (now the Duke of Bedford's), Berkeley-House Piccadilly (now the Duke of Devonshire's) lately burnt and rebuilt; accurate York Stairs at the Thames, &c. And, in the Country, Gunnersbury-House near Brentsord, Wilton-House in Wiltsbire, Castle-Abby in Northamptonshire, Stoke-Park, &c.

Some of his best Disciples met privately for their mutual Improvement till the Restoration, who preserved his clean Drawings and accurate Designs (preserved in our Days by the skilful Architest, the noble RICHARD BOYLE, late Earl of Burlington) and, after the Restoration, they propagated his losty Style.

CHAP. II.

From the Restoration 1660, till the Revolution 1688.

3. CHARLES II. Stewart, succeeded his Father, and was magnificently restored, aged 30 Years, on his own Birth-Day, the 20th of May 1660. In his Travels he had been made a Free Mason, and, having observed the exact Structures in foreign Countries, he resolved to encourage the Augustan Style by reviving the Lodges, as appears most conspicuously from the following S Preamble

•Preamble of a Charter to incorporate the Royal Society, drawn by Dr. Christopher Wren.

. GHARLES, &c.

[] HEREAS amongst our regal hereditary Titles (to which by divine Providence, and the Loyalty of our good Subjects, We are now happily restored) nothing appears to Us more august, or more suitable to our pious Disposition, than that of Father of our Country, a Name of Indulgence as well as Dominion; wherein we would imitate the Benignity of Heaven, which in the fame Shower yields Thunder and Violets, and no sooner shakes the Cedars, but, diffolving the Clouds, drops Fatness. We therefore, out of a paternal Care of our People, resolve, together with those Laws which tend to the well Administration of Government, and the People's Allegiance to us, inseparably to join the supreme Law of Salus Populi, that Obedience may be manifestly not only the public but private Felicity of every Subject, and the great Concern of his Satisfactions and Enjoyments in this Life.—The Way to so happy a Government, we are sensifible, is in no Manner more facilitated than by the Promoting of useful Arts and Sciences, which, upon mature Inspection, are found to be the Basis of civil Communities and free Governments, and which gather Multitudes, by an Orphean Charm, into Cities, and connect them in Companies; that so, by laying in a Stock, as it were, of several Arts and Methods of Industry, the whole Body may be supplied by a mutual Commerce of each other's peculiar Faculties; and consequently that the various Miseries and Toils of this frail Life may, by as many various Expedients ready at Hand, be remedied or alleviated; and Wealth and Plenty diffused in just Proportion to every one's Industry, that is, to every one's Deserts.

AND

And there is no Question but the same Policy that founds a City, doth nourish and increase it; since these mentioned Allurements to a Desire of Cohabitation do not only occasion Populosity of a Country, but render it more potent and wealthy than a more populous, but more barbarous Nation; it being the same Thing to add more Hands, or by the Assistance of Art to facilitate Labour, and bring it within the Power of the sew.

WHEREFORE our Reason hath suggested to us, and our own: Experience in our Travels in foreign Kingdoms and States hath abundantly confirmed, that we prosecute effectually the Advancement of Natural Experimental Philosophy, especially those Parts of it which concern the Increase of Commerce, by the Addition of useful Inventions tending to the Ease, Prosit, or Health of our Subjects; which will best be accomplished by a Company of ingenious and learned Persons, well qualified for this Sort of Knowledge, to make it their principal Care and Study, and to be constituted a regular Society for this Purpose, endowed with all proper Privileges and Immunities.

Nor that herein we would withdraw the least Ray of our Influence from the present established Nurseries of good Literature and Education, sounded, by the Piety of our Royal Ancestors, and others, to be the perpetual Fountains of Religion and Laws; that Religion, and those Laws, which, as we are obliged to defend, so the holy Blood of our martyr'd Father hath inseparably endeared to us; but, that we purpose to make further Provision for this Branch of Knowledge likewise, Natural Experimental Philosophy, which comprehends all that is required towards those Intentions we have recited; taking Care in the first Place for Religion, so next, for the Riches and Ornament of our Kingdoms; as we wear an Imperial Crown, in which Flowers are alternately intermixed with the Ensigns of Christianity.

AND whereas we are well informed, that a competent Number of Persons of eminent Learning, Ingenuity, and Honour, conS 2 cording

cording in their Inclinations and Studies towards this Employment, have for some Time accustomed themselves to meet weekly, and orderly to confer about the hidden Causes of Things; with a design to establish certain and correct uncertain Theories in Philosophy; and, by their Labours in the Disquisition of Nature, to approve themselves real Benefactors to Mankind: And that they have already made a considerable Progress, by divers useful and remarkable Discoveries, Inventions, and Experiments, in the Improvement of Mathematics, Mechanics, Astronomy, Navigation, Physic, and Chemistry; we have determined to grant our Royal Favour, Patronage, and all due Encouragement, to this illustrious Assembly, and so beneficial and laudable an Enterprize.

Under this royal Favour and Protection, Henry Jermyn, Earl of St. Alban's, was chosen Grand Master of Masons, who appointed Sir John Denham, Surveyor-General of the Royal Works. This Sir John Denham, the only Son of Sir John Denham, Knt. sometime one of the Barons of the Exchequer; was a celebrated Poet, and an eminent Royalist. King Charles I. granted to him the Reversion of the Office of Surveyor-General of the Works, after the Decease of the great Architect Inigo Jones; which Office he entered upon at the Restoration of King Charles II. Anno 1660. (for the said Inigo Jones deceased the 21st of July, Anno 1651, aged about 79 Years.) At the Coronation of King Charles II. he was made a Knight of the Bath. He died at his Office in Scotland-Yard near Whiteball, at the Time abovementioned.

Mr. Christopher Wren,* Grand Wardens.

Mr. John Web,

* Afterwards Sir Christopher Wren: He was the only Son of Dr. Christopher Wren, Dean of Windsor, and was born in 1632. His Genius for the Arts and Sciences appeared early; for at the Age of thirteen he invented a new assumment, by the Name of Pan-Organum, and wrote a Treatise on the

AND, according to a Copy of the old Constitutions, this Grand Master held a General Assembly and Feast on St. John the Evangelist's Day 27 Dec. 1663, when the following Regulations were made.

In 1646, Mr. Wren-was admitted at the Age of fourteen a Gentleman Commoner in Wadham College, Oxon, where he profited greatly under the Instructions and Friendship of Dr. John Willins and Dr. Seth Ward, who were both Gentlemen of great Learning, and afterwards promoted by King Charles II. to the Mitre.

His other juvenile Productions in Mathematics are highly worth our Attention, and speak this Grand Warden a Scholar of a most exalted Genius, but are too many to be here recapitulated. I shall only inform you that his Studies were not confined. He assisted Dr. Scarborough in the anatomical Proparations and Experiments upon the Muscles of the human Body; from whence are dated the first Introduction of geometrical and mechanical Speculations in Anatomy; and wrote Discourses of the Longitude; to observe the Variations of the magnetical Needle; Discourses of Gallies; of an Instrument perpetually noting the Soundings in Shallows; to recover Wtecks: a convenient Way of using Artillery on Ship-board; to build in deep Water; to build a Mole into the Sea, without Puzzolan Dusty: Cisterns; of the Improvement of River-Navigation, by the Joining of the Rivers.

Account of all such Acceptations at every General Assembly.

- 4. That every Person who is now a Free Mason, shall bring to the Master a Note of the Time of his Acceptation, to the End the same may be enrolled in such Priority of Place as the Brother deserves; and that the whole Company and Fellows may the better know each other.

THOMAS SAVAGE Earl Rivers succeeded St. Alban's as GrandMaster, 24 June 1666. ap- Mr. John Web, Grand
pointed Sir Christopher Wren Mr. Grinlin Gibbons, Wardens,
his Deputy; but the Deputy and Wardens managed all Things.

This Year on 2 Sept. the Great Burning of London happened, and the Free Masons became necessary to rebuild it.

Accordingly,

THE King and Grand Master ordered the Deputy WREN to draw up a fine Plan of the new City, with long, broad and regular Streets; but, tho' private Properties hindered its taking Essect, yet that, noble City was soon rebuilt in a far better Style than before.

AFTER the most dreadful Conflagration of London, in the fatal Year 1666, Dr. Christopher Wren was appointed Surveyor-general and principal Architect for rebuilding the whole City; the Cathedral Church of St. Paul; all the parochial Churches (in: Number Fifty-one, enacted by Parliament, in lieu of those that were'

wert burnt and demolished) with other public Structures; and for the Disposition of the Streets; a Charge so great and extensive, incumbent on a single Person, disposed him to take to his Assistance Mr. Robert Hook, Professor of Geometry in Gresham College; to whom he assigned chiefly the Business of measuring, adjusting, and setting out the Ground of the private Streets to the several Proprietors; reserving all the public Works to his own peculiar Care and Direction.

THE Manner of building in the City of London, practifed in all former Ages, was commonly with Timber, a Material eafily procured, at little Expence, when the Country was overburthened This often subjected the Town to great and dewith Woods. structive Fires, sometimes to the Ruin of the whole, as happened, for Instance, in the Year 1083, and Reign of William the Conqueror, the Houses being then of Timber covered with Thatch. Notwithstanding these Incidents, this Mode continued until the two fatal Years 1605 and 6; but then the successive Calamities of Plague and Fire gave all People Occasion seriously to reflect on the Causes of the Increase of both to that excessive Height -viz. Closeness of Buildings, and combustible Materials; and hence the Wishes for the necessary Amendment of both, by widening the Streets, and building with Stone and Brick, became universal.

Some intelligent Persons went farther, and thought it highly requisite the City in the Restoration should rise with that Beauty, by the Straightness and Regularity of Buildings, and Convenience for Commerce; by the well disposing of Streets and public Places, and the Opening of Wharfs, &c. which the excellent Situation, Wealth, and Grandeur of the Metropolis of England did justly deserve; in Respect also of the Rank she bore with all other trading Cities of the World; of which, the she was before one of

the richest in Bstate and Dowry, yet unquestionably the least beautiful. Informe, ingens, cui lumen ademptum.

In order therefore to a proper Reformation, Dr. Ween (pursuant to the royal Commands) immediately after the Fire, took an exact Survey of the whole Area and Confines of the Burning, having traced over, with great Trouble and Hazard, the great Plain of Ashes and Ruins; and designed a Plan or Model of a new City, in which the Deformity and Inconveniencies of the old Town were remedied, by the enlarging of the Streets and Lanes, and carrying them as near parallel to one another as might be; avoiding, if compatible with greater Conveniences, all acute Angles; by seating all the parochial Churches conspicuous and insular; by forming the most public Places into large Piazza's, the Centers of eight Ways; by uniting the Halls of the twelve chief Companies into one regular Square annexed to Guildball; by making a commodious Key on the whole Bank of the River, from Blackfriars to the Tower.

Moreover, in contriving the general Plan, the following Particulars were chiefly considered and proposed.

THE Streets to be of three Magnitudes; the three principal leading straight through the City, and one or two Cross-streets, to be at least 90 Feet wide; others 60 Feet; and Lanes about 30 Feet, excluding all narrow dark Alleys without Thoroughfares and Courts.

THE Exchange to stand free in the Middle of a Piazza, and be, as it were, the Nave or Center of the Town, from whence the 60 Feet Streets, as so many Rays, should proceed to all principal Parts of the City: The Building to be contrived after the Form of the Raman Forum, with double Portices.

MANY Streets also to radiate upon the Bridge. The Streets of the first and second Magnitude to be carried on as straight as possible, and to center into four or five Piazzas.

THE

THE Key or open Wharf on the Bank of the Thames, to be spacious and convenient, without any Interruptions; with some large Docks for Barges deep loaden.

THE Canal to be cut up Bridewell, 120 Feet wide, with Saffes at Holborn Bridge, and at the Mouth to cleanse it of all Filth; and Stores for Coal on each Side.

THE Churches to be designed according to the best Forms for Capacity and Hearing, adorned with useful Porticoes, and losty ornamental Towers and Steeples, in the greater Parishes. All Church-yards, Gardens, and unnecessary Vacuities; and all Trades that use great Fires, or yield noisome Smells; to be placed out of the Town.

THE Model or Plan formed on these Principles, delineated by Dr. Wren, was laid before the King and the honourable House of Commons; and is thus explained:

From that Part of Fleet-fireet which remained unburnt, about St. Dunstan's Church, a straight Street of 90 Feet wide, crosses the Valley, passing by the South Side of Ludgate Prison, and thence in a direct Line ends gracefully in a Piazza at Tower-bill; but before it descends into a Valley where now the great Sewer (Fleet-ditch) runs, about the once Middle of Fleet-street, it opens into a round Piazza, the Center of eight Ways, where at one Station are these Views:—First, straight forward quite through the City: Second, obliquely towards the Right Hand, to the Beginning of the Key that runs from Bridewell Dock to the Tower. Third, obliquely on the left to Smithsteld. Fourth, straight on the Right, to the Thames. Fifth, straight on the left, to Hatton-street and Clerkenwell. Sixth, straight backwards, towards Temple-bar. Seventh, obliquely on the left, to the Walks of the Temple. Eighth, obliquely on the left, to Cursitor's Alley.

PASSING

Passing forward we cross the Valley, once sullied with an offensive Sewer, now to be beautified with a useful Canal, passable by as many Bridges as Streets that cross it.—Leaving Ludgate Prison on the left Side of the Street, (instead of which Gate, was designed a triumphal Arch to the Founder of the new City, King Charles the Second.) This great Street presently divides into another as large, which carries the Eye and Passage to the Southfront of the Exchange, (which we leave as yet for a second Journey) and before these two Streets, spreading at acute Angles, can be clear of one another, they form a triangular Piazza, the Basis of which is filled by the Cathedral Church of St. Paul.

But, leaving St. Paul's on the left, we proceed as our first Way led us towards the Tower, the Way being all along adorned with parochial Churches.

WE return again to Ludgate, and, leaving St. Paul's on the right Hand, pass the other great Branch to the Royal-Exchange, seated in the Place where it was before, but free from Buildings, in the Middle of a Piazza included between two great Streets; the one from Ludgate leading to the South-front, and another from Holborn, over the Canal to Newgate, and thence straight to the Northfront of the Exchange.

THE Practicability of this whole Scheme, without Loss to any Man, or Infringement of any Property, was at that Time demonstrated, and all material Objections fully weighed and answered: the only, and, as it happened, insurmountable Difficulty remaining, was the obstinate Averseness of great Part of the Citizens to alter their old Properties, and to recede from building their Houses again on the old Ground and Foundations; as also, the Distrust in many, and Unwillingness to give up their Properties, tho' for a Time only, into the Hands of public Trustees, or Commissioners, till they might be dispensed to them again, with more Advantage to themselves, than otherwise was possible to be effected;

for

for such a Method was proposed, that by an equal Distribution of Ground into Buildings, leaving out Church-yards, Gardens, &c. (which were to be removed out of the Town) there would have been sufficient Room both for the Augmentation of the Streets; Disposition of the Churches, Halls, and all public Buildings; and to have given every Proprietor sull Satisfaction; and although sew Proprietors should happen to have been seated again, directly upon the very same Ground they had possessed before the Fire, yet no Man would have been thrust any considerable Distance from it, but been placed at least as conveniently, and sometimes more so, to their own Trades than before.

By these Means, the Opportunity, in a great Degree, was lost, of making the new City the most magnificent, as well as commodious for Health and Trade of any upon Earth; and, the Surveyor being thus confined and cramped in his Designs, it required no small Labour and Skill to model the City in the Manner it has since appeared.

THE Custom-bouse for the Port of London, situated on the Southside of Thames-street, was erected in 1668, adorned with an upper and lower Order of Architecture: In the latter are Stone Columns, and Entablement of the Tuscan Order; in the former are Pilasters, Entablature, and sive Pediments of the Ionic Order. The West-end is elevated on Columns, forming a Piazza. The Length of this Building is 189 Feet, Breadth in the middle Part 27 Feet, at the West-end, &c. 60 Feet.

THE King levelled the Footstone of the New Royal Exchange in solemn Form, on the 23d of October 1667; and it was opened, the finest in Europe, by the Mayor and Aldermen on the 28th of September 1669. Upon the Insides of the Square above the Arkades, and between the Windows, are the Statues of the Sovereigns of England. Afterwards the Merchant Adventurers employed Grand Warden Gibbons, to erect in the Middle of the T 2 Square

140

Square the King's Statue to the Life, in a Casarian Habit, of white Marble, with an elegant Inscription, * below.

GILBERT SHELDON Archbishop of Canterbury, an excellent Architect, shewed his great Skill in designing his famous Theatrum Sheldonium at Oxford, and at his Cost it was conducted and finished by Deputy WREN and Grand Warden WEB; and, the Craftsmen having celebrated the Cape-Stone, it was opened with an elegant Oration by Dr. South, on the 9th of July 1669. D. G. M. WREN built also that other Master-Piece, the pretty Museum near the Theatre, at the Charge of the University.

This Theatre, a Work of admirable Contrivance and Magnificence, was the first public Performance of Brother WREN, in Architecture; which, however, had been executed in a greater and better Style, with a View to the ancient Roman Grandeur discernible in the Theatre of Marcellus at Rome, but that he was obliged to put a Stop to the bolder Strokes of his Pencil, and confine the Expence within the Limits of a private Purse. other beautiful and distinguished Parts of this Structure has been esteemed very observable, is the geometrical Flat-roof; which Dr. Plot has particularly described, in his Natural History of Oxfordsbire, and writes thus of its Invention:

- 'IT was an excellent Device, whoever first contrived it, of making Flat-floors or Roofs of short Pieces of Timber continued to a great Breadth, without either Arch or Pillar to support them, but sustained only by the Side-Walls, and their own Texture; for by this means many times the Defect of long Timber, or Mistakes of Workmen are supplied, and rectified without any Prejudice to the Building. Of this Sort of Work we have an Example in the Schools, in the Floor of the uppermost Room of the Tower.—There is also a Diagram of such Work in the Architecture of Sebastian Serlio. But Dr. Wallis was the first that demonstrated the Reason of this Work, and has given divers Forms of it, beside the fore-mentioned, in his Book De Motu.
- But of all the Flat-floors having no Pillars to support them, and whose Main-beams are made of divers Pieces of Timber, the most admirable is that of the Theatre of Oxford, from Sidewall to Side-wall, 80 Feet over one Way, and 70 the other; whose Lockages are so quite different from any before-mentioned, and in many other Particulars, as perhaps not to be paralleled in the World.'

In the Year 1671, Deputy WREN began the building of the great fluted Column of Portland Stone, and of the Doric Order, (commonly called the Monument of London, in Memory of the burning and rebuilding of the City) and finished it in 1677. The Artificers were obliged to wait sometimes for Stones of proper Scantlings; which occasioned the Work to be longer in Execution than otherwise it would have been. It much exceeds in Height the Pillars at Rome, of the Emperors Trajan and Antoninus; the stately Remains of Roman Grandeur: and that of Theodosius at Constantinople. In forming this Colosie Column, Deputy WREN took the Liberty to exceeds

exceed the received Proportion of the Order, one Module, or Semi-diameter. In the Place of the Brass Urn, (which is not artfully performed, and was fet up contrary to his Opinion) was intended a Colos's Statue in Brass, gilt, of King CHARLES the Second, as Founder of the new City, in the Manner of the Roman PIL-LARS, which terminated with the Statues of their Cæsars; or else a Figure of a Woman crowned with Turrets, holding a Sword and Cap of Maintenance, with other Enfigns of the City's Grandeur, and Re-erection. The Altitude, from the Pavement, is 202 Feet; the Diameter of the Shaft (or Body) of the Column is 15 Feet; the Ground bounded by the Plinth, or lowest Part of the Pedestal, is 28 Feet square; and the Pedestal in Height is 40 Feet. Within, is a large Stair-case of black Marble, containing 345 Steps, 10 1-half Inches broad, and fix Inch Rifers. Over the Capital is an Iron Balcony encompassing a Cippus or Meta; 32 Feet high, supporting a blazing Urn of Brass gilt. this, Deputy WREN (as it appears by an original Drawing) had made a Design of a Pillar of somewhat less Proportion, viz. 14 Feet in Diameter, and after a peculiar Device; for, as the Romans expressed by Relievo, on the Pedestals, and round the Shafts of the Columns, the History of such Actions and Incidents as were intended to be thereby commemorated; so this Monument of the Conflagration and Resurrection of the City of London, was represented by a Pillar in Flames; the Flames blazing from the Loop holes of the Shaft (which were to give a Light to the Stairs within) were figured in Brass-work gilt; and on the Top was a Phænix rifing from her Ashes, of Brass gilt likewise.

London was rebuilding apace; and, the Fire having ruined St. Paul's Cathedral, the Kine with Grand Master Rivers, his Architects and Craftsmen, Nobility and Gentry, Lord Mayor and Aldermen, Bishops, and Clergy, &c. in due Form levelled the Footstone of New St. Paul's, designed by D. Grand Master Wren, A. D. 1673, and by him conducted as Master of the Work and and Surveyor, with his Wardens Mr. Edward Strong Senior and Junior, upon a Parliamentary Fund.

PREPARATION for the new Structure being made, and several Designs presented to the King for the Form and Fashion thereof; which was intended to equal, if not exceed the Splendor and Magnificence of the old Cathedral, when it was in its best Estate; his Majesty, well approving one of them, commanded a Model to be made thereof in so large and exact a Manner, that might remain as a perpetual and unchangeable Rule and Direction for the Conduct of the whole Work. And, for the more speedy Procedure in this vast and mighty Building, issued out his Letters Patents under the Great Seal of England, bearing Date the 12th Day of November in the 25th Year of his Reign, Anno scil. 1673, unto several Lords spiritual and temporal, and other Persons of eminent Rank and Quality, and Christopher Wren, Doctor of Laws, Surveyor general of the Royal Works; authorizing them, or fo many of them, as are therein appointed and enabled to act, to proceed in that great Undertaking, and to endeavour the Perfecting thereof, by such Ways and Means, and according to such Rules and Orders as are therein mentioned. A Transcript of the Preamble of which remarkable Commission is here inserted:

WHEREAS——Since the issuing out of our Commission (viz. Anno 1663, 15 Car. II.) the late dreadful Fire in London hath descripted and consumed the Cathedral Church of St. Paul to such a Degree, that no Part of the ancient Walls or Structures can with any Safety be relied upon, or left standing; insomuch that it is now become absolutely necessary totally to demolish and raze to the

the Ground all the Relics of the former Building, and in the fame Place, but upon new Foundations, to erect a new Church; (which that it may be done to the Glory of God, and for the promoting of his divine Worship and Service therein to be celebrated; and to the End the same may equal, if not exceed the Splendor and Magnificence of the former cathedral Church, when it was in its best Estate; and so become much more than formerly the principal Ornament of our royal City, to the Honour of our Government, and of this our Realm; we have caused several Designs for that Purpose to be prepared by Dr. Christopher Wren, Surveyor General of all our Works and Buildings, which we have feen, and one of which we do more especially approve, and have commanded a Model thereof to be made after so large and exact a Manner, that it may remain as a perpetual unchangeable Rule and Direction for the Conduct of the whole Work.) And whereas our former Commission, in which the upholding and repairing the ancient cathedral Church is only defigned and mentioned, doth not fufficiently authorise and impower our said Commissioners therein named to begin and compleat a new Fabric upon new Foundations:

The royal Warrant under the Sign-manual and Privy-seal for beginning the Works of the new Cathedral of St. Paul, transcribed from the Original annexed to the Surveyor's Drawings.

CHARLES R.

WHEREAS We have been informed that a Portion of the Imposition laid on Coals, which by Act of Parliament is appointed and set apart for the rebuilding of the cathedral Church of St. Paul, in our capital City of London, doth at present amount to a considerable Sum, which, tho' not proportionable to the Greatness of the Work, is notwithstanding sufficient to begin the same; and with all the Materials, and other Assistances, which may probably be expected, will put a new Quire in great Forwardness:

ness: and whereas, among divers Designs which have been presented to Us, We have particularly pitched upon one, as well because We found it very artificial, proper, and useful; as because
it was so ordered that it might be built and finished by Parts: We
do therefore by these Presents signify Our Royal Approbation of
the said Design, hereunto annexed; and do will and require you
forthwith to proceed according to the said Design, beginning
with the East-end or Quire, and accomplishing the same with
the present Stock of Money, and such Supplies as may probably
accrue, according to the Tenor of the Commission to you directed; and for so doing this shall be your Warrant. Given at
Our Court at Whiteball, the 14th Day of May, 1675, in the
27th Year of our Reign.

To Our Commissioners for rebuilding the Cathedral of St. Paul, London.

By His Majesty's Command,

HENRY COVENTRY.

The pulling down the Walls, being about 80 Feet high, and five Feet thick, was a great and troublesome Work; the Men stood above, and worked them down with Pickaxes, whilst Labourers below moved away the Materials that fell, and dispersed them into Heaps: the want of Room made this Way slow and dangerous, and some Men lost their Lives; the Heaps grew steep and large; and yet this was to be done before the Masons could begin to lay the Foundations.

THE City, having Streets to pave anew, bought, from the Rubbish, most of the Stone, called Kentish-rag, which gave some Room to dig, and to lay Foundations; which yet was not easy to perform with any Exactness, but by this Method.

THE Surveyor placed Scaffolds high enough to extend his Lines over the Heaps that lay in the Way; and then by Perpendiculars fet out the Places below, from the Lines drawn with Care upon the level Plan of the Scaffold.

THUS

[147]

Thus he proceeded, gaining every Day more Room, till he came to the middle Tower that bore the Steeple; the Remains of the Tower being near 200 Feet high, the Labourers were afraid to work above; thereupon he concluded to facilitate this Work by the Use of Gunpowder.

He dug a Hole of about four Feet wide, down by the Side of the North-west Pillar of the Tower, the sour Pillars of which were each about 14 Feet diameter; when he had dug to the Foundation, he then, with Crows and Tools made on purpose, wrought a Hole two Feet square, level into the Center of the Pillar; there he placed a little Deal-Box, containing eighteen Pounds of Powder, and no more: a Cane was fixed to the Box with a Quick-match, (as Gunners call it) within the Cane, which reached from the Box to the Ground above, and along the Ground was laid a Train of Powder, with a Match: after the Mine was carefully closed up again with Stone and Mortar to the Top of the Ground, he then observed the Effect of the Blow.

This little Quantity of Powder not only lifted up the whole Angle of the Tower, with two great Arches that rested upon it; but also two adjoining Arches of the Ailes, and all above them; and this it seemed to do somewhat leisurely, cracking the Walls to the Top, lifting visibly the whole Weight about nine Inches, which, suddenly jumping down, made a great Heap of Ruin in the Place without scattering; it was half a Minute before the Heap already sallen opened in two or three Places, and emitted some Smoke. By this Description may be observed the incredible Force of Gunpowder: 18 Pounds only of which listed up above 3000 Ton, and saved the Work of 1000 Labourers.

THE Fall of so great a Weight, from an Height of 200 Feet, gave a Concussion to the Ground, which the Inhabitants round about took for an Earthquake.

ENCOURAGED by this Success, he thought to proceed this Way, but, being obliged to go out of Town in the King's Service, he left the Management of another Mine begun to the Care of his next

U 2 Officer,

Officer, who, too wife in his own Conceit, put in a greater Quantity of Powder, and neither went low enough, nor sufficiently fortified the Mouth of the Mine; and, tho it had the Effect, yet one Stone was shot out to the opposite Side of the Church-yard, through an open Window, into a Room of a private House, where some Women were sitting at Work, without any Harm done; this Accident frighted the Neighbours to that Degree, that he was important to use no more Powder, and was so directed also by his Superiors; tho with due Caution it might have been executed without any Hazard, and saved much Time and Money.

HE then turned his Thoughts to another Method; to gain Time, prevent much Expence, and the endangering of Men's Lives; and that was to make an Experiment of an ancient Engine in War, called the Battering-rum.

HE took a strong Mast of about 40 Feet long, arming the bigger End with a great Spike of Iron, fortified with Bars along the Mast, and Ferrels: This Mast in two Places was hung up to one Ring with strong Tackle, and so suspended level to a Triangleprop, such as they weigh great Guns with: thirty Men, fifteen on a Side, vibrated this Machine to and again, and beat in one Place against the Wall, the whole Day; they believed it was to little Purpose, not discerning any immediate Effect; he bid them not despair, but proceed another Day: On the second Day the Wall was perceived to tremble at the Top, and in a few Hours it fell. The Reason to be given for it may be this; 'tis not by any present Violence the Ram is able to overturn a Wall of such Bulk and Compacture, but, incessantly vibrating by equidistant Pulses, it makes a small intestine Motion thro' all the insensible Parts of the Wall, and by Degrees loosens all the Bond of the Mortar, and moves every Stone from its Bed; and tho' not the hundredth Part of an Inch at every Blow, yet this Motion once begun hath its Effects more and more, till at length it is quite loose and falls. He made good Use of this Machine in beating down all the lofty Ruins; and pleased himself that he had recovered this notable Engine,

[149]

Engine, of so great Service to the Ancients in besieging of Towns; though great Guns have now put them out of Use, as more expeditious, and requiring sewer Men to manage.

In the Progress of the Works of the Foundations, Deputy WREN met with one unexpected Difficulty; he began to lay the Foundations from the West-end, and had proceeded successfully through the Dome to the East-end, where the Brick-earth Bottom was very good; but as he went on to the North-east Corner, which was the last, and where nothing was expected to interrupt. he fell, in profecuting the Design, upon a Pit, where all the Potearth had been robbed by the Potters of old Time; here were difcovered Quantities of Urns, broken Vessels, and Pottery-ware of divers Sorts and Shapes: how far this Pit extended northward, there was no Occasion to examine; no Ox Skulls, Horns of Stags, and Tusks of Boars were found, to corroborate the Account of Stow, Camden, and others, nor any Foundations more Eastward. If there was formerly any Temple to Diana, he supposed it might have been within the Walls of the Colony, and more to the South. It was no little Perplexity to fall into this Pit at last: He wanted but fix or seven Feet to compleat the Design, and this fell in the very Angle North-East; he knew very well, that under the Layer of Pot-earth there was no other good Ground to be found till he came to the Low-water Mark of the Thames, at least forty Feet lower: His Artificers proposed to him to pile, which he refused; for, tho' Piles may last for ever, when always in Water, (otherwise London-Bridge would fall) yet if they are driven thro dry Sand, the' fometimes month, they will rot. His Endeavours were to build for Eternity. He therefore funk a Pit of about eighteen Feet square, wharfing up the Sand with Timber, till he came forty Feet lower into Water and Sea-shells, where there was a firm Sea-beach, which confirmed the Opinion of many, that the Sea had been in Ages past, where now Paul's Church is. He bored thro' this Beach till he came to the original Clay; being then satisfied, he began from the Beach a square Pier of solid good

good Masonry, ten Feet square, till he came within fifteen Feet of the present Ground; then he turned a short Arch under Ground to the former Foundation, which was broken off by the untoward Accident of the Pit. Thus this North-east Coin of the Quire stands very firm, and no doubt will stand. This Narrative may be of Use to Masons not to trust Piles, unless always and in all Parts wet: for almost all Sorts of Timber under Water will prove everlasting, but wet and dry will soon perish. The same cannot be said of Iron, for that will decay under Water; but this hath been observed, in taking out Cramps from Stone-work at least four hundred Years old, which were so bedded in Mortar, that all Air was perfectly excluded, the Iron appeared as fresh as from the Forge. Therefore, in cramping of Stones, no Iron should lie within nine Inches of Air, if possible; for the Air is the Menstruum that consumes all Materials whatever. When there is a Necessity to use Iron. for Want of Stones large enough, Care is to be taken to exclude fufficiently the Air from it. To mention another Caution of Use to Masons; some Cornices of large Projections, tho' the upper Joints are as close fitted as good Workmen can make them, yet, in the melting of Snow, the Water will dribble through, and stain the Cornice. Deputy G. M. WREN thus avoided this Inconvenience; he caused the Masons so to work the Stone next the Joint, as to leave half a Quarter of an Inch rifing on each Side, that the Water might sooner fall off, than soak to the Joint; and this he obferved in the Paving of the Portico of the principal Front of St. Paul's; besides, that the Joints are run with Lead; and the same is done, where-ever he was obliged to cover with Stone only.

In order to satisfy such Persons who are charmed with the Grandeur of the Vatican Church of St. Peter at Rome; with the stately Colonades, and spacious Area in the Front; and think no Structure of this Sort is to be esteemed truly noble and majestic, that does not arise, or nearly approach to that Magnisicence; it is to be considered, that at St. Paul's the Surveyor wanted Room.

THE

[151]

THE magnificent Portico before the Church of St. Peter is not to be equalled, but yet the whole Front of that Structure, terminating in a straight Line at the Top, cannot be said to afford so agreeable an Aspect, nor that rational Variety as is discerned by the Elevation of the Pediment in the Middle, and beautiful Campanile Towers at each End of the Front of St. Paul's.

AQuery has been made, why all the Pilasters on the Outside were doubled? They are of the same Use as Buttresses, and so give Space for large Windows between, which in our darker Weather is necessary; as also for the good Regularity within, and the Roof, they will appear proper to those who consider well the whole Design together.

AGAIN, why were the Columns of the West Portico doubled? This, no doubt, is not according to the usual Mode of the Ancients in their ordinary Temples, which, for the generality was small; but was followed in their Coloss, or greater Works; for Instance, in the Portico of the Temple of Peace, the most magnificent in old Rome, the Columns were very properly and necessarily doubled to make wider Openings, after the Manner of the middle Openings in the Porticoes of the Greek Temples, to five Doors at unequal Distances, viz. three near together, which lead into the great middle Nave, or Body of the Temple; and one to each Side-aile, at greater Diftances. Bramante used double Columns without Scruple, as did Michael Angelo within and without the Cupola of St. Peter's in the Vatican: The like is done in the Portico of the Church of Santa Maria Major in Rome; and also in other public and private Edifices by the most celebrated Architects; to instance among others, in the Facade * of the Palace of SSrs. Caffarelli alla ... Valle, built by Raphael Urbin in the Year 1515; which contains 26 duplicated Columns in Front. The French Architects have practifed the same to a good Effect, especially in the beautiful Facade of the Louvre. It is to be observed in the Portico of St. Paul's. two Columns are brought nearer together, to make greater Intercolumns alternately, to give a proper Space for three Doors. The

Ancients.

Ancients, particularly the Greeks, in their Temples, generally made the middle Inter-column wider than the rest; and as they shifted the Columns of the Portico for the better Approach to one Door; so at St. Paul's for the same Reason, where there are three Doors, (the two Side-doors for daily Use, and the Middle for Solemnities) the Columns are widened, to make a more open and commodious Access to each; and this falls gracefully, by placing the Pillars alternately, Eustyle and Pyenostyle. Hermogenes, who first contrived the Pseudodipteron, by taking away a whole Range of Columns to enlarge the Portico, went farther than his Masters durst before him, yet is commended by Vitruvius for this very Thing, because useful. The Romans, after the Greek Examples, not only widened the middle Openings in the Colonades before their Temples, but followed the like Manner in Arcades also: thus in the Colosseum, or Amphitheatre of Velpasian in Rome, of the eighty Arches, four, which lead principally to the Arena, were made wider than all the rest. They generally took such Liberties, well knowing that the ORDERS were to be adapted to their proper Use, and not the Defign too servilely to the Orders; of which a hundred Examples may be given. Those who duly examine by Measure the best Remains of the Greek or Roman Structures, whether Temples, Pillars, Arches or Theatres, will foon discern, that even among these is no certain general Agreement; for it is manifest the ancient Architects took great Liberties in their Capitals and Members of Cornices, to shew their own Inventions, even where their Defign did not oblige them; but where it did oblige them to a rational Variation, still keeping a good Symmetry, they are surely to be commended, and in like Cases to be followed. We now most esteem the Learning of the August An Age, yet, no Question there were then many different Styles in Oratory, and perhaps some as good as Cicero's. This is not faid as any Inducement to Masons, or every Fellow Graft that can draw Lines, to fall into crude Gothic Inventions, far from the good Examples of the Ancients, no more than to encourage a barbarous Style in Latin; and yet furely we cannot but

but, with *Erasmus*, laugh at him who durst not use one Word that he could not find in *Tully*.

To proceed in examining what has been further objected, particularly why the Architrave within is cut off by the Arch. In this Master WREN always insisted that he had the Ancients on his Side; in the Templum Pacis, and in all the great Halls of the Baths, and in all the great Structures of three Ailes, this was done, and for this Reason: in those wide Inter-columns the Architrave is not supposed to lie from one great Column to another, but from the Column to the Wall of the Aile, so the End of it will only appear upon the Pillar of the Infide of the great Naves. Vitruvius tells us, that Architecture took its Beginning from wooden Porticoes; suppose therefore a Portico of three Ailes in Wood, or at least with the Roof of Timber, the Architraves must join the Pillars of the Ailes, and not be in Range with the Infide Pillars, but cross to that Line; so nothing will appear upon the Pillars of the Naves but the Ends of the Architraves. If it be faid, that in the Templum Pacis the Cornice is cut off as well as the Architrave, the Answer is plain, there is not the same Reason to cut off the Cornice of the Arches at St. Paul's, which rise not so high; for -a Cornice may be carried within, even without Pillars, (provided the Proportion be kept of a due Height) much more with Pillars.

D. G. Master WREN followed the Templum Pacis as near as our Measures would admit, having but three Arcades in each of the Bodies East and West, as there; but where there are no Arcades, and next the Dome, he has continued the whole Entablature.

ONE Thing he seems to have varied from the Ancients, in that he has incorporated lesser Pilasters with the greater, and that of the same Corinthian Order: it is true the Imposts of old upon which the Arches rested, had a particular Capital of the Doric Manner, and not of the same Capital with the Pillar, as is to be seen in the triumphal Arches and Theatres that remain; but above all Things, they were careful, that this Capitol of the Impost should not have more Sally or Projection than to lie upon the great Pillar or Pilaster: and this was easily done in the Outside of Buildings,

Digitized by Google

where there was Room enough to advance the Pilaster till it could receive the Impost Mouldings to lie against the Side of the Pilaster; but in the Inside of St. Paul's it would have streightened the great Nave, and made the Breaks of the Cornice above too Whether Bramante was aware of this in St. Peter's, it may be questioned, till after he had laid the Bases of the great Pilasters; for he has chopped off the Cornice Mouldings of the Imposts to give way for the Pilaster to break through them: which is ungraceful, and without Authority, or good Reason. Whatever Veneration we may have for this great Man, yet furely in this it must be owned he hath confessed an Oversight. any Man thinks it improper to incorporate great and small Pillars together, as is done in the Ailes at St. Paul's, let him confider the Basilica of the Colonia Julia, at Fanum; which is the only Piece Vitruvius owns himself to be the Author of; he will eafily perceive, that there must be small Pillars incorporated into the great, to bear the Galleries; and he will find, that the whole Frize is taken up by Vitruvius to give Light.

BRAMANTE makes no Scruple of incorporating Pilasters in his whole Outside of St. Peter's: D. G. Master WREN at St. Paul's chose to make the little Pilasters of the same Order with the great in the Ailes, because the opposite Wall is beautified with the same smaller Order; so the Aile of the whole Length of the Church is of itself a long and graceful Portico, without being interrupted by the Legs of the Dome.

D. Master WREN in giving the Entablature to this Order has taken the Liberty to leave out Members, as the Ancients did in the Inside of Porticoes; the Architrave is essential in all Works, but they often used in the Inside to leave out Frize and Cornice also, except some of the lower Members which they added to the Architrave, that it might not appear too meagre. By this Liberty, (in which he was authorised by the ancient Porticoes) he could couch most of the Members of the Entablature of the little Order within the Sally of the great Pilaster, without chopping off short the Members of the Impost. If it be said still by any, the little Pillars should not

have been of the same Order, let them examine the Templum Pucis, they will find a little Colonade continued thro' every Arch, and that of the Corintbian Order, as appears by some small Corintbian Capitals still adhering to the great Pile.

This Temple, being an Example of a three-ailed Fabric, is certainly the best and most authentic Pattern of a cathedral Church, which must have three Ailes, according to Custom, and be vaulted: tho' it may not be always necessary to vault with Diagonal-cross Vaults, as the Templum Pacis and Halls of the Roman Baths are: the Romans used hemispherical Vaultings also in some Places: D. G. Master WREN chose those as being demonstrably much lighter than the other; so the whole Vault of St. Paul's confists of 24 Cupola's cut off semicircular with Segments to join to the great Arches one Way, and which are cut cross the other Way with elliptical Cylinders to let in the upper Lights of the Nave: but in the Ailes the leffer Cupola's are both Ways cut in semicircular Sections, and altogether make a graceful geometrical Form, (distinguished by circular Wreaths which is the horizontal Section of the Cupola; for the Hemisphere may be cut all Manner of Ways into circular Sections; and the Arches and Wreaths being of Stone carved, the Spandrels between are of found Brick invested with Stucco of Cockle-shell Lime, which becomes as hard as Portland Stone; and which, having large Planes between the Stone Ribs, are capable of further Ornaments of Painting, if required. Besides these 24 Cupola's, there is a half Cupola at the East, and a great Cupola of 112 Feet Diameter, in the Middle of the Crossing of the great Ailes. In this the D. G. Master has imitated the Pantheon, or Rotundo in Rome, excepting only that the upper Order is there but umbratile, not extant as at St. Paul's, out of the Wall, but only distinguished by different-coloured Marbles. The Pantheon is no higher within than its Diameter; St. Peter's is two Diamemeters; this shews too high, the other too low; the D. G. Master at St. Paul's took a mean Proportion, which shews its Concave every Way; and is very lightfome by the Windows of the upper Order, which strike down the Light through the great Colonade

X 2

that

that incircles the Dome without, and serves for the Butment of the Dome, which is Brick of two Bricks thick, but as it rifes every five Feet high, has a Course of excellent Brick of 18 Inches long, banding thro' the whole Thickness. The Concave was turned upon a Centre; which was judged necessary to keep the Work even and true, tho' a Cupola might be built without a Centre; but this is observable, that the Centre was laid without any Standards from below to support it; and as it was both Centering and Scaffolding, it remained for the Use of the Painter. Every Story of this Scaffolding being circular, and the Ends of all the Ledgers meeting as so many Rings, and truly wrought, it supported itself. This Machine was an Original of the Kind, and will be a useful Project for the like Work to an Architect hereafter; for fince, he must have Scaffolds for the Inside Ornaments, the same thus contrived will also serve for the Builders, and bear all the Weight till the Cupola be turned, and that without any Standards. It was neceffary to give a greater Height than the Cupola would gracefully allow within, tho' it is considerably above the Roof of the Church; yet the old Church having had before a very lofty Spire of Timber and Lead, the Work should not in this Respect fall short of the old (tho' that was but a Spit, and this a Mountain) He was therefore obliged to comply with the Humour of the Age, (tho' not with ancient Example, as neither did Bramante) and to raise another Structure over the first Cupola; and this was a Cone of Brick, so built as to support a Stone Lantern of an elegant Figure, and ending in Ornaments of Copper gilt.

As the whole Church above the Vaults is covered with a subftantial oaken Roof and Lead, (for no other Covering is so durable in our Climate) so he covered and hid out of Sight the Brick Cone with another Cupola of Timber and Lead; and between this and the Cone are easy Stairs that ascend to the Lantern.

HE took no Care to make little luthern Windows in the leaden Cupola, as are done out of St. Peter's, because he had otherwise provided for Light enough to the Stairs from the Lantern above, and round the Pedestal of the same, which are not seen below;

fo that he only ribb'd the outward Cupola, which he thought less Gothic, than to stick it full of such little Lights in three Stories, one above the other, (as is executed in the Cupola of St. Peter's at Rome) which could not without Difficulty be mended, and, if neglected, would soon damage the Timbers.

THE Inside of the whole Cupola is painted, and richly decorated, by an eminent English Artist, Sir James Thornbill, containing, in eight Compartiments, the Histories of St. Paul. In the Crown of the Vault, as in the Puntheon, is a circular Opening; by which not only the Lantern transmits Light, but the Inside Ornaments of the painted and gilded Cone display a new and agreeable Scene.

ALTHOUGH the Dome wants no Butment, yet, for greater Caution, it is hooped with Iron in this Manner; a Channel is cut in the Bandage of *Portland* Stone, in which is laid a double Chain of Iron strongly linked together at every ten Feet, and the whole Channel filled up with Lead.

Among all the Composures of the Ancients, we find no Cupola's raised above the necessary Loading of the Hemisphere, as is seen particularly in the Pantheon. In after Ages the Dome of Florence, and of the great Church of Venice, was raised higher. The Saracens mightily affected it, in Imitation of the first most eminent Pattern, given by Justinian, in his Temple of Sansta Sophia, at Constantinople. Bramante would not fall short of those Examples; nor could D. G. Master Wren do otherwise than gratify the general Taste of the Age, which had been so used to Steeples, that these round Designs were hardly digested, unless raised to a remarkable Height.

Thus St. Paul's is lofty enough to be discerned at Sea East-ward, and at Windsor Westward; but our Air, being frequently hazy, prevents those distant Views, except when the Sun shines out, after a Shower of Rain has washed down the Clouds of Seacoal Smoke that hang over the City from so many thousand Fires kindled every Morning, besides Glass-houses, Brew-houses, and Founderies, every one of which emits a blacker Smoke than twenty Houses.

IN

In the Heginning of the new Works of St. Paul's, an Incident was taken notice of by some People as a memorable Omen, when D. G. Master Warn in Person had set out, upon the Place, the Dimensions of the great Dome, and fixed upon the Centre; a common Liabourer was ordered to bring a flat Stone from the Heaps of Rubbish, (such as should first come to Hand) to be laid for a Mark and Direction to the Masons; the Stone which was immediately brought and laid down for that Purpose, happened to be a Piece of a Grave-stone, with nothing remaining of the Inciption but this single Word in large Capitals, RESURGAM.

THE City rear'd beautiful Moor-Gate, and rebuilt Bedlam-Hofpital in the best Old Style, A.D. 1675; and where the Fire stopt at Temple-Bar, the City built a fine Roman Gate, with the Statues of Queen Elizabeth and King James I. on the East Side, and those of King Charles I. and Charles II. on the West Side.

THE Phylicians discovered also their fine Taste by their accurate College, a Master-piece; and the Lampers, by the Front of Middle Temple-Lane*.

THE Parish Churches consumed by the great Fire were within the Compass of a few Years many of them elegantly rebuilt under the Direction of D. G. Master WREN.

This Church was rebuilt and finished in 1683, upon the Wall of a very ancient Church, about the early Time of the Roman Colony, which, by the Rising of the Ground in succeeding Ages, was intirely buried under the Level of the present Street of Cheapside. It is built of Brick and Stone; the Walls covered with a Finishing: the Roof is arched, and supported with ten Corinthian Columns; there are three Ailes, besides the cross Aile at the West-end. The Model is after that of the Templum Pacis.

But the principal Ornament of this Church is the Steeple, erected near the North-West Angle, and made contiguous by a a Lobby between the Church and Steeple, which is founded upon an old Roman Causeway, lying about 18 Feet below the Level of the Street. It is accounted by the judicious Artists an admirable Piece of Architecture, not to be paralleled by the Steeple of any parochial Church in Europe. It was designed by the incomparable Sir Christopher Wren, begun in 1671, and finished in 1680. It is built of Portland-stone, consisting of a Tower and Spire: The Tower is square; in the North-side thereof is a Door and beautiful Door-case; the Peers and Arch are of the Tuscare

Tuscan Order, and adorned with two Columns of the Doric Order; the Metops inriched with Cherubims; above the Cornice is an elliptical Aperture, on the Key-piece is a Cherub, whence (by way of Compartment) extend two Festoons of large Fruit, sustained lower by two Cupids in a sitting Posture, there resting on the Cornice; and the whole farther adorned with Rustic-work, and another Door-case of the same Form, on the West-side, above which on the said North-side, is another Aperture and Balcony; and a little higher a Modilion Cornice, above that are four Windows (on each Side one) each adorned with sour Pilasters, with Entablement of the Ionic Order; over the Cornice a Balustrade, and at each Angle four Cartouches, erected tapering; and, on the Meeting of the upper Ends, a spacious Vase, which terminates the Tower.

The Spire begins with a circular Mure; and on that, a little higher than the Tops of the faid Vases, is a Range of Columns with Entablature, and Acroteria, of the Corinthian Order. This Balcony is adorned with Bows or Arches, all which you pass under in walking round this Part of the Spire, which (a little higher) is adorned with Pedestals, their Columns and Entablature of the Composite Order; so that here are all the sive Orders, regularly executed. On the Order stand Cartouches, whereon is erected an Obelisk of a considerable Altitude, and at the Vertex thereof a spacious Ball; and above that (as a Weather-cock) is the Figure of a Dragon of Brass gilt; in the expanded Wings is sigured a Cross, (the support of the Ensign armorial of the City of London.) The Dimensions of the Church within, are, Length 65 and an half Feet, Breadth 63, Altitude 38; and that of the samous Steeple 225 Feet.

To give the Sentiments of an Author we have taken Occasion fometimes to quote: "The Steeple of Boro-Church, says he, is another Master-piece (of Sir Cristopher Wren's) in a peculiar "Kind of Building, which has no fixed Rule to direct it, nor is it to be reduced to any settled Laws of Beauty; without doubt, if

"we consider it only a Part of some other Building, it can be esteemed no other than a delightful Absurdity: But if either considered in itself, or as a Decoration of a whole City in Prospect, not only to be justified, but admired. That which we have now mentioned is beyond Question as perfect as human Imagination can contrive or execute, and 'till we see it outdone, we shall hardly think it to be equalled."

" Wallbrook Church, so little known among us, is famous allover " Europe, and is justly reputed the Master-piece of the celebrated

THE King also founded Chelsea-Hospital for old Soldiers, and a most curious New Palace at Greenwich from a Design of Inigo Jones, conducted by Grand Warden WEB as Master of Work; and another Palace at Winchester, designed by Grand Master WREN, an excellent Pile of the richest Corinthian Order, covered in before the King's Death, but never finished, and now in Ruins. It extends to the West 326 Feet, to the South 216 Feet. 'There was particularly intended a large Cupola, 30 Feet above the Roof,

projected also to have brought from the Downs a River thro' the
Park, which would have formed a Cascade of 30 Feet Fall. The
whole Disposition of this Palace was such, as made it esteemed by
the best Judges an excellent Model of a Royal-hunting-seat. In
this Place, (where probably had been the Roman Prætorium)
flood an ancient Castle, which had been often besieged, but
never so straitly, as when Maud the Empress maintained it against
King Stephen. In digging for the new Foundations, were discovered divers Roman and Saxon Antiquities, as Coins of Constantine the Great, and others; a Brick Pavement of the tessellated Work; a round Brass Seal, with a Head engraved, and this
Inscription in Saxon Characters,

SIGILLUM SECRETI. A. Ec.

THE King ordered Sir WILLIAM BRUCE, Baronet, Grand Master of Scotland, to rebuild his Palace of Holyrood-House at Edinburgh in the best Augustan Style, and the Scottish Secretary's Office at Whitehall. G. Master Bruce built also his own pretty Seat at Kinross.

So that the Fellow Crafts were never more employed than in this Reign, nor in a more lofty Style; and many Lodges were conflituted throughout the Islands* by Leave of the several noble Grand Masters: For after Grand Master Rivers demitted, A. D. 1674,

GEORGE VILLARS Duke of Bucks, an old Mason, succeeded as G. Master of England; but being indolent, he left all Business to his Deputy WREN and his Wardens.

^{*} For besides many other sine Structures in and about London, many noble Manfions in the Country were built or sounded; as—Wing-House, Bedfordshire—Chevening
in Kent—Ambrosebury in Wiltshire—Hotham-House and Stainborough, Yorkshire—
Palace of Hamilton in Clydesdale—Sterling-House, near the Castle—Drumlanrig in
Nidsdale, and many more.

By an Inscription in the Middle of the Church of St. Dunstan's Fleet-street, near the Chancel, it appears that one EDWARD MARSHAL, Esq; had been MASTER MASON of ENGLAND; probably under the Protectorate: And that King Charles II. had also appointed his Son, Joshua Marshal, Esq; Master Mason, at a Time when the rebuilding of the City of London required a great Increase of Masters as well as Fellow-Crafts.

HENRY BENNET, Earl of Arlington, succeeded Grand Master VILLARS; and this to, was too deeply engaged in Affairs of State, to visite the Lodges: Yet in his Mastership the Fraternity was considerable still, and many Gentlemen requested to be admitted.

But many of the Fraternity's Records of this and former Reigns were lost in the next, and at the Revolution; and many of them were too hastily burnt in our Time from a Fear of making Discoveries, that we have not so ample an Account as could be wished, of the Grand Lodge, &c.

KING Charles II. dying on the 6th of February, 1684-5, his Brother succeeded, viz.

4. James II. Stewart, aged 51 Years. A most excellent Statue of him still stands in Whitehall. But not being a Brother Mason, the Art was much neglected, and People of all sorts were otherwise engaged in this Reign: Only upon the Death of Grand Master Arlington, 1685, the Lodges met and elected

Sir Christopher Wren Grand Marker, who appointed Mr. Gabriel Cibber, Grand Wardens. and while carrying on Mr. Edward Strong, Grand Wardens. St. Paul's, he annually met those Brethren that could attend him, to keep up good old Usages, till the Revolution, when

WILLIAM of Nassau, Prince of Orange, landed on the 5th of November, 1688; and King James sailed to France on the 23d of December following, and died there on the 6th of September, 1701.

PON King James's going off, the Convention of States entailed the Crown of England upon King James's two Daughters, MARY Princess of Orange, and ANNE Princess of Denmark, and their Issue. And failing them on WILLIAM Prince of Orange; for, his Mother, Mary Stewart, was King James's eldest Sister: But Orange was to reign only during Accordingly on the 13th of Februry, 1688-9.

PARTICULAR Lodges were not so frequent and mostly occasional in the South, except in or near the Places where great Works were carried on. Thus Sir Robert Clayton, Lord Mayor of London, got an Occasional Lodge of his Brother Masters to meet at St. Thomas's Hospital Southwark, A.D. 1693, and to advise the Governors about the best Design of rebuilding that Hospital, as it now stands most beautiful; near which a stated Lodge continued long afterwards.

Besides that and the old Lodge of St. Paul's, as could be remembered by some Brothers yet living in 1730, there was another in Piccadilly, over against St. James's Church; one near Westminster Abby, another near Covent-Garden, one in Holborn, one on Tower-Hill, and some more that assembled statedly.

THE King was privately made a Free-Mason, approved of their Choice of Grand Master WREN, and encouraged him in rearing St. Paul's Cathedral, and the great New Part of HAMPTON-COURT in

[177]

in the Augustan Stile, by far the finest Royal House in England. after an old Design of Inigo Jones, where a bright Lodge was held during the Building. The Facade, or King's Apartment, fronting the Privy-garden, and Thames, extends 328 Feet; the Facade, or Queen's Apartment, fronting the House-park, extends 330 Feet; the Access to the principal Stair-case leading to the King's-side, is through a beautiful Portico of about 90 Feet long, confishing of a Colonade of 16 duplicated Pillars, of the *lonick* Order. "House and Parks being environ'd on three Sides with the River "Thames, and consequently enjoying as pleasant a Situation as the "Prudence of its first Founder Cardinal Wolfey could select for it, " was indeed a Piece of Work of great Beauty and Magnificence " for the Age it was built in. But the Addition made to it by "King William and Queen Mary do so far excel what it was before, "that they evidently shew what vast Advancements Architecture " has received fince that Time."

Sic Partem Ille Domûs, quam vix fælicior Ætas Finiat, exegit.—

If the World had not been deprived so soon of the inestimable Life of Queen Mary, and had the Surveyor been impowered to have simished his whole Design, Leland's Description of Hampton Court would have been a truer Resemblance of its latter than primitive State.

Est locus insolito rerum splendore superbus,

Hic rex Willhelmus tales bic condidit ædes

The King also built his little Palace of Kensington, and finish'd Chelsea Hospital. The Industry, and Conduct of Sir Christopher, and Sir Stephen Fox, jointly in the Erection and Settlement hereof, are worthy Remembrance: Sir Stephen Fox, a Lord of the Treasury, took care for the due Payment of the Works; whilst the Surveyor A a vigorously

[178]

vigorously prosecuted his Part in the Buildings; and lastly prescrib'd the Statutes, and whole Oeconomy of the House, which for Cleanliness, Health, and Convenience, is deservedly esteem'd one of the best regulated in *Europe*; well suiting, in every particular, the pious Design, and Muniscence of its royal Founders.

He also appointed the fine new Palace of Greenwich (begun by King Charles II.) to be an Hospital for old Seamen, A. D. 1605, and order'd it to be finish'd as begun after Jones's old Defign. The Surveyor was among the first who address'd their Majesties King William and Queen Mary, to convert the Site and Buildings of their Royal Palace to this most charitable Use; which was also industrioully promoted by the Lord Sommers, Mr. Evelyn, Mr. Bridgman Secretary of the Admiralty, and Mr. Lownds Secretary of the Frea-This extensive Charity was not only calculated for the Relief and Support of the veteran Seamen, and fuch as had been wounded or disabled in the Service, but also for the Relief and Maintenance of fuch Widows, and the Education of fuch Orphans, whose Husbands, and Parents had been stain in the Desence of the Nation at Sea. A Project seasonably adjusted for the Encouragement and Improvement of that other most important Branch of the national Defence, the naval Arms of Great-Britain, the Grant had pass'd the great Seal; and an ample Commission appointed, with Powers to conduct and regulate all Affairs relating to the Building of the Hospital; and the Surveyor nominated a Director, and chief Architect of this great Undertaking, he chearfully engag'd in the Work, gratis, and contriv'd the new Fabrick extensive, durable, and magnificent, conformable to the graceful Pavilion, which had been crected there by King Charles the Se-. cond, and originally intended for his own Palace; contributing his Time, Labour and Skill, and profecuting the Works for feveral Years, with all the Expedition the Circumstances of Affairs would allow; without any Salary, Emolument or Reward (which good Example, 'tis to be hoped, has been fince follow'd;) preferring in this, as in every other Passage of his Life, the public Service to

any

any private Advantage of his own, by the Acquest of Wealth, of which he had always a great Contempt.

This Year our most noble Brother CHARLES LENNOX Duke of Richmond and Lennox (Father of the late Duke) Master of a Lodge at Chichester, coming to the annual Assembly and Feast at London, was chosen Grand Master, and approved by the King.

Sir CHRISTOPHER WREN was { Edward Strong, sen. } Grand his D. G. Master, who acted as { Edward Strong, jun. } Wardens. before at the Head of the Craft, and was again chosen Grand Master, A. D. 1698.

In this Reign NAVAL Architecture was wonderfully improved; and the King discovered his High Taste in building his elegant Palace at Loo in Holland, till he died at Kensington 8 March 1701-2, when

7. Ann Stewart, the other Daughter of King James II. aged 38 Years, succeeded as Queen Sovereign, Wife of Grorge Prince of Denmark: He was the Patron of Astronomers and Navigators, and died at Kensington 28 Ost. 1708.

Queen Ann enlarg'd St. James's Palace, and after the famous Battle of Blenbeim, A. D. 1704, demolish'd the old Royal Castle of Wood-Stock in Oxford/bire, and built in its stead the Castle of Blenbeim for her General John Churchill Duke of Marlborough.

The Queen in her 5th Year, united the two Kingdoms of England and Scotland into the one Kingdom of GREAT-BRITAIN, which commenced on 1 May, 1707.

After the Union of the Crowns 104 Years.

The Queen and Parliament enacted the Building of 50 new additional Parish Churches in the Cities of London and Westminster: Grand Master WREN, being appointed not only Surveyor, but one of the Commissioners for carrying on the Works, attended that Service with all the Application his other Offices would permit; and preparatory thereunto, took occasion to impart his Thoughts to this Effect, in a Letter to a Friend in that Commission.

SINCE

the finishing the cathedral Church of St. Paul, and the parochial Churches of London, in lieu of those demolish'd by the Fire; (all which were executed during the Fatigues of my Employment in the Service of the Crown, from that time to the present happy Reign;) and being now constituted one of the Commissioners for Building, pursuant to the late Act, Fifty more Churches in London and Westminster; I shall presume to communicate briefly my Sentiments, after long Experience; and without further Ceremony exhibit to better Judgment, what at present occurs to me, in a transfient View of this whole Affair; not doubting but that the Debates of the worthy Commissioners may hereafter give me occasion to change, or add to these Speculations.

1. First, I conceive the Churches should be built, not where vacant Ground may be cheapest purchased in the Extremities of the Suburbs, but among the thicker Inhabitants, for Convenience of the better sort, although the Site of them should cost more; the better Inhabitants contributing most to the future Repairs, and the Ministers and Officers of the Church, and Charges of the Parish.

2. I could wish that all Burials in Churches might be disallowed, which is not only unwholesome, but the Pavements can never be kept even, nor Pews upright: And if the Church-yard be close about the Church, this also is inconvenient, because the Ground being continually raised by the Graves, occasions in Time a Descent by Steps into the Church, which renders it damp, and the Walls green, as appears evidently in all old Churches.

3. It will be enquired, where then shall be the Burials? I answer in Cemeteries seated in the Out-skirts of the Town: And since it is become the Fashion of the Age to solemnize Funerals by a Train of Coaches, (even where the Deceased are of moderate Condition) though the Cemeteries should be half a Mile, or more, distant from the Church: the Charge need be little or no more than usual; the Service may be first performed in the Church: But for the

the Poor, and such as must be interred at the Parish Charge, a publick Hearse of two Wheels and one Horse may be kept at small Expence, the usual Bearers to lead the Horse, and take out the Corpse at the Grave. A Piece of Ground of two Acres in the Fields will be purchased for much less than two Rods among the Buildings: This being inclosed with a strong Brick Wall, and having a Walk round, and two cross Walks, decently planted with Yew-trees, the four Quarters may serve four Parishes, where the Dead need not be disturbed at the Pleasure of the Sexton, or piled four or five upon one another, or Bones thrown out to gain Room. In these Places beautiful Monuments may be erected; but yet the Dimensions should be regulated by an Architect, and not left to the Fancy of every Mason; for thus the Rich, with large Marble Tombs, would shoulder out the Poor; when a Pyramid, a good Bust, or Statue on a proper Pedestal, will take up little Room in the Quarters, and be properer than Figures lying on Marble Beds: The Walls will contain Escutcheons and Memorials for the Dead, and the Area good Air and Walks for the Living. It may be confidered further, that if the Cemeteries be thus thrown into the Fields, they will bound the Excessive Growth of the City with a graceful Border, which is now encircled with Scavengers Dung-Stalls.

4. As to the Situation of the Churches, I should propose they be brought as forward as possible into the larger and more open Streets, not in obscure Lanes, nor where Coaches will be much obstructed in the Passage. Nor are we, I think, too nicely to observe East or West in the Position, unless it falls out properly: Such Fronts as shall happen to lie most open in View should be adorned with Porticos, both for Beauty and Convenience; which together with handsome Spires, or Lanterns, rising in good Proportion above the neighbouring Houses, (of which I have given several Examples in the City of different Forms) may be of sufficient Ornament to the Town, without a great Expence for enriching the outward Walls of the Churches, in which Plainness and Duration, ought

ought principally, if not wholly, to be studied. When a Parish is divided, I suppose it may be thought sufficient, if the Mother-Church has a Tower large enough for a good Ring of Bells, and the other Churches smaller Towers for two or three Bells: because great Towers and losty Steeples, are sometimes more than half the Charge of the Church.

5. I shall mention something of the Materials for publick Fa-It is true, the mighty Demand for the hafty Works of thousands of Houses at once, after the Fire of London, and the Frauds of those who built by the Great, have so debased the Value of Materials, that good Bricks are not to be now had, without greater Prices than formerly, and indeed if rightly made, will deferve them; but Brick-makers spoil the Earth in the mixing and hasty burning, till the Bricks will hardly bear Weight; though the Earth about London, rightly managed, will yield as good Bricks as were the Roman Bricks, (which I have often found in the old Ruins of the City) and will endure, in our Air, beyond any Stone our Island affords; which unless the Quarries lie near the Sea, are too dear for general Use: The best is Portland, or Roch-abbey Stone; but these are not without their Faults. The next Material is the Lime; Chalk-Lime is the constant Practice, which, well mixed with good Sand, is not amiss, though much worse than hard Stone-Lime. The Vaulting of St. Paul's is a rendering as hard as Stone; it is composed of Cockle-shell-Lime, well beaten with Sand; the more Labour in the beating, the better and stronger the Mortar. I shall say nothing of Marble, (though England, Scotland, and Ireland, afford good, and of beautiful Colours) but this will prove too costly for our Purpose, unless for Altar-pieces. In Windows and Doors Portland Stone may be used, with good Bricks, and Stone Quoyns. As to Roofs, good Oak is certainly the best; because it will bear some Negligence: The Church-wardens Care may be defective in speedy mending Drips; they usually white-wash the Church, and fet up their Names, but neglect to preferve the Roof over their Heads: It must be allowed, that the Roof being more

out

Deal, which is a Timber of Length, and light, and makes excellent Work at first, but if neglected will speedily perish, especially if Gutters (which is a general Fault in Builders) be made to run upon the principal Rasters, the Ruin may be sudden. Our Seafervice for Oak, and the Wars in the North-sea, make Timber at present of excessive Price. I suppose ere long we must have recourse to the West-Indies, where most excellent Timber may be had for cutting and fetching. Our Tiles are ill made, and our Slate not good; Lead is certainly the best and lightest Covering, and being of our own Growth and Manusacture, and lasting, if properly laid, for many hundred Years, is, without question, the most preserable, though I will not deny but an excellent Tile may be made to be very durable: Our Artisans are not yet instructed in it, and it is not soon done to inform them.

6. The Capacity and Dimensions of the new Churches may be determined by a Calculation. It is, as I take it, pretty certain, that the Number of Inhabitants, for whom these Churches are provided, are five times as many as those in the City, who were burnt out, and probably more than 400,000 grown Persons that should come to Church, for whom these fifty Churches are to be provided, (besides some Chapels already built, though too small to be made parochial.) Now, if the Churches could hold each 2000, it would yet be very short of the necessary Supply. The Churches therefore must be large; but still, in our reformed Religion, it should feem vain to make a Parish-church larger than that all who are present can both hear and see. The Romanists, indeed, may build larger Churches; it is enough if they hear the Murmur of the Mass. and see the Elevation of the Host, but ours are to be sitted for Auditories. I can hardly think it practicable to make a fingle Room. fo capacious, with Pews and Galleries, as to hold above 2000 Perfons, and all to hear the Service, and both to hear distinctly, and: see the Preacher. I endeavoured to effect this, in building the Parish Church of St. James's, Westminster, which, I presume, is the most,

most capacious, with these Qualifications, that hath yet been built; and yet at a solemn Time, when the Church was much crowded, I could not discern from a Gallery, that 2000 were present. In this Church I mention, though very broad, and the middle Nave arched up, yet as there are no Walls of a second Order, nor Lanterns, nor Buttresses, but the whole Roof rests upon the Pillars, as do also the Galleries; I think it may be found beautiful and convenient, and as such the cheapest of any Form I could invent.

- 7. Concerning the Placing of the Pulpit, I shall observe—A moderate Voice may be heard 50 Feet distant before the Preacher, 30 Feet on each Side, and 20 behind the Pulpit; and not this, unless the Pronunciation be distinct and equal, without losing the Voice at the last Word of the Sentence, which is commonly emphatical, and if obscured, spoils the whole Sense. A Frenchman is heard further than an English Preacher, because he raises his Voice, and not sinks his last Words: I mention this as an insufferable Fault in the Pronunciation of some of our otherwise excellent Preachers; which Schoolmasters might correct in the young, as a vicious Pronunciation, and not as the Roman Orators spoke: For the principal Verb is in Latin usually the last Word; and if that be lost, what becomes of the Sentence?
- 8. By what I have said, it may be thought reasonable, that the new Church should be at least 60 Feet broad, and 90 Feet long, besides a Chancel at one End, and the Bellsrey and Portico at the other. These Proportions may be varied; but to build more Room, than that every Person may conveniently hear and see, is to create Noise and Confusion. A Church should not be so filled with Pews, but that the Poor may have Room enough to stand and sit in the Alleys, for to them equally is the Gospel preached. It were to be wished there were to be no Pews, but Benches; but there is no stemming the Tide of Prosit, and the Advantage of Pew-keepers; especially too, since by Pews in the Chapels of Ease,

the

the Minister is chiefly supported. It is evident, these fifty Churches are not enough for the present Inhabitants, and the Town will continually grow; but it is to be hoped, that hereaster more may be added, as the Wisdom of the Government shall think fit; and therefore the Parishes should be so divided, as to leave Room for Sub-divisions, or at least for Chapels of Ease.

About the same Time the excellent Masons, under the Direction of their Grand Master, shewed their Skill in Buckingham House and Marlborough House in St. James's Park, Powis House in Ormond-street, the Opera House in the Haymarket, and many more about Town: And in the Country the Duke of Devonshire's fine Chatsworth in Derbyshire, Stourton in Wiltshire, the Earl of Carlisle's Castle Howard near York, Helmsley House or Duncomb Park, Mereworth House in Kent, Wilbury House in Wiltshire, &c. Nay, after the Peace of Utrecht, many rich old Officers in the Army, returning home good Connoisseurs in Architecture, delighted in raising stately Mansions.

But the Augustan Stile was most richly displayed at Oxford, in the New Chapel of Trinity College by Dr. Bathurst, in Peck-Water-Square of Christ's-Church College by Dr. Aldrige, in Queen's-College by Dr. Lancaster, elegantly rebuilt, in Allballow's Church, the new Printing-House, &c.

Grand Master WREN, who had designed St. PAUL'S, London, A. D. 1673; and, as Master of Work, had conducted it from the Footstone, had the Honour to finish that noble Cathedral. The first Stone of this Basilica was laid in the Year 1675, and the Works carried on with such Care and Industry, that, by the Year 1685, the Walls of the Quire and Side-Isles were finished, with the circular North and South Porticos; and the great Pillars of the Dome brought to the same Height: And it pleased God in his Mercy to bless the GRAND MASTER with Health and Length of Days, and to enable him to compleat the whole Structure in the Year 1710, to the Glory of his most holy Name, and Promotion of B b

his divine Worship, the principal Ornament of the Imperial Seat of this Realm. * Majestes convenit ista Deo.

The highest or last Stone on the Top of the Lantern was laid by the Hands of the GRAND MASTER'S Son, CHRISTOPHER WREN, Esq.; deputed by his Father in the Presence of that excellent Artificer Mr. Strong, and his Son, GRAND WARDENS, and other Free and Accepted Masons, and the Fellow-Crafts, chiefly employed in the Execution of the Work.

Thus was this mighty Fabrick, the second Church for Grandeur in Europe, in the Space of 35 Years, begun and finished by one Architect, and under one Bishop of London, Dr. Henry Compton; the Charge supported chiefly by a small and easy Imposition on Sea-coal brought to the Port of London: Whereas the Church of St. Peter in Rome (the only Edifice that can come in Competition with it) continued in the Building the Space of 145 Years, carried on by no less than 12 Architects successively; assisted by the Police and Interests of the Roman See; the ready Acquisition of Marble, and attended by the best Artists of the World in Sculpture, Statuary, Painting, and Mosaic Work, during the Reigns of 19 Popes +.

"The grand Cathedral of St. Paul's (fays an ingenious Writer)

is undoubtedly one of the most magnificent modern Buildings in.

" Europe; all the Parts of which it is composed are superlatively beautiful and noble; the North and South Fronts in particular

" are very perfect Pieces of Architecture; neither ought the East

" to go without due Applause. The two Spires at the West End

" are in a finished Taste; and the Portico with the Ascent, and

" the Dome that rifes in the Center of the Whole, afford a very

" august and surprizing Prospect."

The Age and Infirmities of the Grand Master, which prevented his Attendance on this solemn Occasion, obliged him from this Time forward to great Retirement: So that the Lodges suffered greatly for Want of his Presence, as usual, in visiting and regulating their Meetings; and were at last reduced to the small Number, as mentioned on Page 176.

Queen Ann died at Kenfington, without Issue, on Aug. 1, 1714. She was the last of the Race of King Charles I. upon the Throne of Britain; for the others, being Romans, are excluded by the Act of Parliament for settling the Crown upon the Protestant Heirs of his Sister Elizabeth Stewart, Queen of Bohemia above, viz, on her Daughter the Princess Sophia Electress Dowager of Bruns-wick-Lunenbourg; and she dying a little before Queen Ann, her Son George, the Elector of Hanover, succeeded on the said first of Aug. 1714.

Saxon Kings of Great-Britain.

- 1. King George I. entered London most magnificently on Sept. 20, 1714; and, after the Rebellion, A. D. 1716, the sew Lodges at London, wanting an active Grand Master, by Reason of Sir Christopher Wren's Disability, thought fit to cement under a new Grand Master, as the Center of Union and Harmony. For this Purpose the Lodges,

- 2. At the Crown, in Parker's Lane, near Drury-Lane.

3. At the Apple-tree Tavern, in Charles-Street, Covent-Garden.
4. At the Rummer and Grapes Tavern, in Channel-Row, Westminster.
And some old Brothers met at the said Apple-Tree; and having put into the Chair the oldest Master Mason (being the Master of a Lodge) they constituted themselves a Grand Lodge pro Tempore in due Form, and forthwith revived the Quarterly Communication of the Officers of Lodges (called the Grand Lodge) resolved to hold the Annual Assembly and Frast, and then to chuse a Grand Master from among themselves, till they should have the Honour of a Noble Brother at their Head.

Accordingly

On St. John Baptist's Day, in the 3d Year of King George I, A. D. 1717, the ASSEMBLY and Feast of the Free and Accepted Masons was held at the foresaid Goose and Gridiron; now removed to the Queen's-Arms Tayern in St. Paul's Churchyard.

Before Dinner, the oldest Master Mason (being the Master of a Lodge) in the Chair, proposed a List of proper Candidates; and the Brethren by a Majority of Hands, elected

MR ANTONY SAYER, Gentleman, Grand Master of Masons, who being forthwith invested with the Badges of Office and Power by the said oldest Master, and installed, was duly congratulated by the Assembly, who paid him the Homage.

Mr Jacob Lamball, Carpenter, Grand Wardens.

Capt. Joseph Elliot, ——

SAYER, Grand Master, commanded the Masters and Wardens of Lodges to meet the Grand Officers every Quarter in Communication *, at the Place that he should apoint in his Summons fent by the Tyler.

* N. B. It is called the Quarterly Communication, because it should meet Quarterly, according to antient Usage. And,

When the Grand Master is present, it is a Lodge in ample Firm; otherwise only in due Form; yet having the same Authority with ample Form.

[190]

The ASSEMBLY and FEAST was held at the said Place, June 24, 1718, where

Brother SAYER, having gathered the Votes after Dinner, pro-

claimed aloud our Brother,

GEORGE PAYNE, Esq; Grant Patter of Masons, who being duly invested, installed, congratulated, and homaged, recommended the strict Observance of the Quarterly Communication; and desired any Brethren to bring to the Grand Lodge any old Writings and Records, concerning Masons and Masonry, in order to shew the Usages of ancient Times: And this Year several old Copies of the Sothic Constitutions were produced and collated.

Mr John Cordwell, City-Carpenter, Grand Wardens.

Mr Thomas Morrice, Stone-Cutter,

By the Fervency and Zeal of Grand Master PAYNE, the Freedom of this Society has been fixed upon the noble and solid Basis of those Noblemen and Princes, who have done Honour to the Crast, by their constant Attendance and laudable Example; a Series of such noble Personages as no Age, Society, or Nation could ever boast of to have ruled over them; and who, in a continued Succession, will, in all Probability, govern them and lift them up for ever.

ASSEMBLY and FEAST at the faid Place, June 24, 1719. Brother PAYNE, having gathered the Votes, after Dinner proclaimed aloud the Reverend Brother

JOHN THEOPHILUS DESAGULIERS, LL. D. and F.R.S. Grand Master of Masons, and being duly invested, installed, congratulated, and homaged, forthwith revived the old regular and peculiar Toasts or Healths of the Free Masons.

Mr Antony Sayer foresaid, Grand Wardens. Mr Tho. Morrice foresaid,

Now several old Brothers, that had neglected the Crast, visited the Lodges; some Noblemen were also made Brothers, and more new Lodges were constituted.

AS-

ASSEMBLY and FEAST at the foresaid Place, July 24, 1720. Brother DESAGULIERS, having gathered the Votes, after Dinner proclaimed aloud

GEORGE PAYNE, Esq; again Grand Master of Masons, who being duly invested, installed, congratulated, and homaged, began the usual Demonstrations of Joy, Love, and Harmony.

Mr Thomas Hobby, Stone-Cutter, Grand Wardens.
Mr Rich. Ware, Mathematician,

This Year, at some private Lodges, several very valuable Manuscripts (for they had nothing yet in Print) concerning the Fraternity, their Lodges, Regulations, Charges, Secrets, and Usages, (particularly one writ by Mr Nicholas Stone, the Warden of Imgo Jones) were too hastily burnt by some scrupulous Brothers, that those Papers might not fall into strange Hands.

At the Quarterly Communication or Grand Lodge, in ample Form, on St John the Evangelist's Day, 1720, at the said Place,

It was agreed, in order to avoid Disputes on the Annual Feast-Day, that the NEW Grand Master, for the suture, shall be named and proposed to the GRAND LODGE some Time before the Feast, by the present of OLD Grand Master; and if approved, that the Brother proposed, if present, shall be kindly saluted, or even if absent, his Health shall be toasted as Grand Master Elect.

Also agreed, that for the future, the New Grand Master, as soon as he is installed, shall have the sole Power of appointing both his Grand Wardens and a Deputy Grand Master (now sound as necessary as formerly) according to ancient Custom, when Noble Brothers were Grand Masters.

Accordingly,

At the Grand Tobge in ample Form, on Lady-Day, 1721, at the said Place, Grand Master PAYNE proposed for his Successor our most Noble Brother

John Duke of Montagu, Master of a Lodge; who being present, was forthwith saluted Grand Master Elect, and his Health drank.

drank in due Form; when the whole Brotherhood expressed great Joy at the happy Prospect of being again patronized by noble Grand Masters, as in the prosperous Times of Free Masonry.

PAYNE, Grand Master, observing the Number of Lodges to increase, and that the General Assembly required more Room, proposed the next Assembly and Feast to be held at Stationers-Hall, near Ludgate-Street; which was agreed to.

Then the Grand Wardens were ordered, as usual, to prepare the Feast, and to take some STEWARDS to their Assistance, Brothers of Ability and Capacity, and to appoint some Brethren, as Waiters, to attend the Tables; for that no Strangers must be there. But the Grand Officers not finding a proper Number of Stewards, Jostah Villeneau, Upholder in the Borough of Southwark, generously undertook the Whole himself, attended by Thomas Morrice, Francis Bailey, and other Waiters.

CHAP. IV.

From Grand Master the Duke of Montagu, to Grand Master the Duke of Richmond.

A SSEMBLY and FEAST being at Stationers Hall, June 24, 1721, in the 7th of King George I,

PAYNE, Grand Master, with his Grand Wardens, the former Grand Officers, and the Masters and Wardens of 12 Lodges, met the Grand Master Elect, in a Grand Lodge at the Queen's-Arms Tavern in St. Paul's Church-yard, in the Morning; and having forthwith recognized their Choice of Brother Montagu, they made some new Brothers, particularly the noble Philip, Lord Stankope, now Earl of Chestersield: And from thence they marched on Foot to the Hall, in proper Cloathing and due Form; where they were joyfully received by about 150 true and faithful, all cloathed.

After

[193]

After Grace said, they sat down in the antient Manner of Masons to a very elegant Feast, and dined with Joy and Gladness. After Dinner and Grace said,

Brother PAYNE the old Grand Master made the first Procession round the Hall*, and when return'd, he proclaim'd aloud the most noble Prince and our Brother,

JOHN MONTAGU Duke of MONTAGU, Grant Master of Masons; and Brother Payne having invested his Grace's Worship with the Ensigns and Badges of his Office and Authority, install'd him in Solomon's Chair, and sat down on his Right Hand; while the Assembly own'd the Duke's Authority with due Homage and joyful Congratulations, upon this Revival of the Prosperity of Masonry.

Montagu Grand Master immediately call'd forth (without naming him before,) as it were careless, John Beal, M. D. as his Deputy Grand-Master, whom Brother Payne invested, and install'd in Hiram Abbiff's Chair on the Grand Master's Left Hand.

In like Manner his Worship Mr. Josiab Villeaneau Grand call'd forth and appointed, Mr. Thomas Morrice Wardens, who were invested and install'd by the last Grand Wardens.

Upon which the DEPUTY GRAND MASTER and GRAND WARDENS were faluted and congratulated as usual.

Then Montagu Grand Master, with his Officers and the old Officers, having made the second Procession round the Hall, Brother Desaguliers made an eloquent Oration about Masons and Masonry. After great Harmony, the Effect of Brotherly Love, the Grand Master thank'd Brother Villeneau for his Care of the Feast, and order'd him as Senior Grand Warden, to close the Lodge in good Time.

The Grand Lodge in ample Form on 29 Sept. 1721, at the Kings-Arms aforesaid, with the former Grand Officers and those of sixteen Lodges.

His Grace's Worship and the Lodge finding Fault with all the Copies of the old Gothic Constitutions, order'd Brother James Anderson, A. M. to digest the same in a new and better Method.

The Grand House in ample Form on St. John's Day, 27 Dec. 1721, at the faid Kings-Arms, with former Grand Officers: and those of twenty Lodges.

MONTAGU Grand Master, at the Desire of the Lodge, appointed fourteen learned Brothers to examine Brother ANDERSON'S Manuscript, of the Constitution Book, and to make Report. And this Communication was made very entertaining by the Lastures of some old Mastons.

Grant Tonge at the Fountain Tavern in the Strand, in ample Form, 25 March 1722, with former Grand Officers and those of twenty four Lodges.

The field Committee of fourteen reported that they had perused Brother Anderson's Manuscript, viz. the History, Charges, Regulations, and Master's Song, and after some Amendments, had approved of the same: Upon which the Lodge desir'd the Grand Master to order it to be printed. Mean while,

Ingenious Men of ALL Faculties and Stations, being convinced that the Cement of the Lodge was Love and Friendship, earnestly requested to be made MASONS, affecting this amicable Fraternity more than other Societies, then often disturbed by warm Disputes.

Grand Master Montagu's good Government inclin'd the better Sort to continue him in the Chair another Year; and therefore they delay'd to prepare the Feast.

But PHILIP Duke of WHARTON, lately made a Brother, tho' not the Master of a Lodge, being ambitious of the Chair, got a Number of Brethren to meet him at Stationers-Hall, 24 June 1722, who having no Grand Officers present, put in the Chair the oldest Master Mason (who was not the present Master of a Lodge, also irregular) and without the usual decent Ceremonials, the said old Mason proclaim'd aloud,

Therefore the noble Brothers, and all those that would not couny tenance Irregularities, disown'd WHARTON'S Authority, till worthg Brother Montagu healed the Breach of Harmony by Summonin-

The Grand Lodge to meet 17 January 1722-3, at the King's Arms aforesaid, where the Duke of WHARTON promising to be True and Faithful, Deputy Grand Master BEAL proclaim'd aloud the most noble Prince and our Brother,

II. PHILIP WHARTON Duke of WHARTON, Grant Master of Masons, who being duly Invested, Install'd, Congratulated, Homaged, and having permitted the usual Demonstrations of Joy, Love and Harmony, by the former Grand Officers, and the Officers of twenty five Ledges, appointed

Dr. DesaGuliers, Deputy Grand Master, Joshua Timson, aforesaid, Grand Wardens. James Anderson, A. M.

Grand Warden ANDERSON produced the NEW Book of Constitutions, in Print; which was again approv'd, as was also the Addition of the antient Manner of Constituting a Lodge.

Now Masonry flourish'd in Harmony, Reputation and Numbers; many Noblemen and Gentlemen of the first Rank desired to be admitted into the Fraternity; besides other Learned Men, Merchants, Clergymen and Tradesimen, who found a Lodge to be a safe and pleasant Relaxation from Intense Study, or the Hurry of Business, without Politicks or Party. Therefore the Grand Master was obliged to constitute more new Lodges, and was very assiduous in visiting the Lodges every Week, with his Deputy and Wardens; and his Worship was well pleas'd with their kind and respectful Manner of receiving him, and they with his affable and becoming Conversation.

The Committee appointed to keep out Cowans, and the Stewards to receive the Tickets and direct the Servants came early.

Some observing that Brother Dalkeith was now in Scotland, proposed to the Grand Master to name another for his Successor; but DALKEITH'S Wardens declar'd that his Lordship would soon return. Adjourn'd to Dinner.

About 400 Free Majons, all duly clothed, dined elegantly in due Form.

After Dinner, Brother WHARTON made the first Procession round the Tables, and when return'd proclaimed aloud our noble Brother,

To which his Lordship consented in a most obliging Manner, provided it should appear, on the Feast Day, to be the unanimous Desire of the whole Body of Masons.

The GRAND MASTER having then informed the Brethren, that in Regard the Stewards, might have Time to make a suitable Provision for such of them as intended to dine with him, he had given Directions, that no Tickets should be delivered after Twelve of the Clock on Saturday the 31st Instant; and concluded with strongly recommending the strictest Regard to the Name and Dignity of a Free and Accepted Mason; and that such a decent and regular Use might be made of their being Free, as would always intitle THEM to be Accepted.

All Business being over, the Lodge was closed.

When the Sentiments of them ALL concurring with the Request of the Brethren at the last Quarterly Communication, his Lordship was again intreated to continue Grand Master, at least for the next Year; and his Lordship, giving his Consent, was unanimously elected.

The

The usual Forms being gone through, and a large Collection made for the general Fund of Charity,

The Deputy Grand Master, to the great Satisfaction of the Brethren, informed them of the flourishing Condition of the Foreign Lodges, who hold Communication, from all Parts of the World, with the Grand Master of England; from whom the Right Worshipful had received several Letters.

The GRAND LODGE then took into Consideration, a Complaint against certain Brethren for Forming and Assembling under the Denomination of a Lodge of ancient Masons, who, as such, consider themselves as independent of this Society, and not subject to our Laws, or to the Authority of our GRAND MASTER. When the Deputy Grand Master took Notice of the great Necessity there was to discourage all such Meetings, not only as the same were contrary to our Laws, and a great Insult on the GRAND MASTER, and the whole Body of FREE and ACCEPTED MASONS: But as they likewise tended to introduce into the CRAFT the Novelties and Conceits of opinionative Persons, and to create a Belief, that there have been other Societies of Masons more ancient than that of this ancient and honourable Society. And

The Question being put, That the Meeting of any Brethren of this Society, as, or under any Denomination of Masons, other than as Brethren of this our ancient and honourable Society of Free and Accepted Masons, is inconsistent with the Honour and Interest of the Craft, and a high Insult on our Grand Master, and the whole Body of Masons: It was carried in the Affirmative; one of the Brethren, complained of, only dissenting.

The Deputy Grand Master, in his great Clemency, then moved, That the Consideration of the irregular Proceedings of the said Brethren, might be postponed till next Quarterly Communication, hoping that a thorough Sense of their Misconduct, and a Determination

266

mination not to be guilty of the like for the future would then appear, and reconcile them to the GRAND LODGE; and agreed to. The GRAND MASTER having informed the Lodge of his Intention to hold the Grand Feast on the 10th of April next,

The GRAND LODGE unanimously requested and prevailed with his Lordship to continue in the Chair for another Year at least.

CHARGES

OF THE

FREE and ACCEPTED MASONS,

Collected from their old Records, at the Command of the Grand Master,

AFPROVED

By the Small Modge, and ordered to be printed in the first Edition of the Book of Constitutions, on March 25, 1722.

I. Concerning GOD and RELIGION.

Majon is obliged, by his Tenure, to obey the moral Law; and if he rightly understands the Art, he will never be a stupid Altheist, nor an irreligious Libertine. But though in ancient Times Masons were charged in every Country to be of the Religion of that Country or Nation, whatever it was, yet it is now thought more expedient only to oblige them to that Religion in which all Men agree, leaving their particular Opinions to themselves; that is, to be good Men and true, or Men of Honour and Honesty, by whatever Denominations or Persusions they may be distinguished; whereby Masonry becomes the Center of Union, and the Means of conciliating true Eviendship among Persons, that mustinave remained at a perpetual Distance.

II. Of

14[93121] T

II. Of the CIVIL MAGISTRATE, Supreme and Subordinate.

A Mason is a peaceable Subject to the Civil Powers, wherever he refides or works, and is never to be concerned in Plots and Conspiracies against the Peace and Welfare of the Nation, nor to behave himself undutifully to inferior Magistrates; for as Masonry hath been always injured by War, Bloodshed, and Confusion, so ancient Kings and Princes have been much disposed to encourage the Craftimen, because of their Peaceableness and Loyalty, whereby they practically answered the Cavils of their Adversaries, and promoted the Honour of the Fraternity, who ever flourished in Times So that if a Brother should be a Rebel against the State, he is not to be countenanced in his Rebellion, however he may be pitied as an unhappy Man; and, if convicted of no other Crime, though the loyal Brotherhood must and ought to disown his Rebellion, and give no Umbrage or Ground of political Jealousy to the Government-for the Time being; they cannot expel-him from the *Lodge*, and his Relation to it remains indefeafible.

III. Of Lodges.

A LODGE is a place where Majons affemble and work: Hence that Affembly, or duly organized Society of Majons, is called a Lodge: and every Brother ought to belong to one, and to be subject to its By-Laws and the General Regulations. It is either particular or general, and will be best understood by attending it, and by the Regulations of the General or Grand Lodge hereunto annexed. In ancient Times, no Major or Fellow could be absent from it, especially when warned to appear at it, without incurring a severe Censure, until it appeared to the Major and Wardens, that pure Necessity hindered him.

The Persons admitted Members of a Lodge, must be good and true Men, free-born, and of mature and discreet Age, no Bondmen,

Bondmen, no Women, no immoral, or scandalous Men, but of good Report.

IV. Of MASTERS, WARDENS, Fellows and Apprentices.

All Preferment among *Majons* is grounded upon real Worth and personal Merit only; that so the Lords may be well served, the Brethren not put to Shame, nor the Royal Craft despised: Therefore no Master or Warden is chosen by Seniority, but for his Merit. It is impossible to describe these Things in Writing; and every Brother must attend in his Place, and learn them in a Way peculiar to this Fraternity: Only Candidates may know that no Master should take an Apprentice, unless he has sufficient Employment for him, and unless he be a perfect Youth, having no Maim or Defect in his Body, that may render him incapable of learning the Art, of serving his Master's LORD, and of being made a Brother, and then a Fellow-Craft in due Time, even after he has ferved fuch a Term of Years, as the Custom of the Country directs; and that he should be descended of honest Parents; that so, when otherwise qualified, he may arrive to the Honour of being the WARDEN, and then the MASTER of the Lodge, the GRAND WARDEN, and at length the Grand Master of all the Lodges, according to his Merit.

No Brother can be a WARDEN, until he has passed the Degree of a Master Mason; nor a Master, until he has acted as a Warden, nor GRAND WARDEN, until he has been Master of a Lodge, and served the Office of Steward at a Grand Feast; nor Deputy Grand Master, until he has served the Office of Grand Warden; nor Grand Master, unless he has been a Master of a regular Lodge before his Election, who is also to be nobly born, or a Gentleman of the best Fashion, or some eminent Scholar, or some curious Architect, or other Artist, descended of honest Parents, and who is of singular great Merit in the Opinion of the Lodges. And for the better, and easier, and more honourable Discharge of his Office, the Grand Master has a Power to chuse

his own DEPUTY GRAND MASTER, who must be then, or must have been formerly, the *Master* of a particular *Lodge*; and has the Privilege of acting whatever the GRAND MASTER, his *Principal*, should act, unless the said *Principal* be present, or interpose his Authority by a Letter.

These Rulers and Governors, supreme and subordinate, of the ancient Lodge, are to be obeyed in their respective Stations by all the Brethren, according to the old Charges and Regulations, with all Humility, Reverence, Love, and Alacrity.

V. Of the Management of the CRAFT in working.

All Masons shall work honestly on working Days, that they may live creditably on boly Days; and the Time appointed by the Law of the Land, or confirmed by Custom, shall be observed.

The most expert of the Fellow Craftsmen shall be chosen or appointed the Master or Overseer of the Lord's Work; who is to be called Master by those that work under him. The Craftsmen are to avoid all ill Language, and to call each other by no disobliging Name, but Brother or Fellow; and to behave themselves courteously within and without the Lodge.

The Master, knowing himself to be able of Cunning, shall undertake the Lord's Work as reasonably as possible, and truly dispend his Goods as if they were his own; nor to give more Wages to any Brother or Apprentice, than he really may deserve.

Both the Master and the Masons receiving their Wages justly, shall be faithful to the Lord, and honestly finish their Work, whether Task or Journey; nor put the Work to Task that hath been accustomed to Journey.

None shall discover Envy at the Prosperity of a Brother, nor supplant him, or put him out of his Work, if he be capable to sinish the same; for no Man can finish another's Work so much to the Lord's Prosit, unless he be thoroughly acquainted with the Designs and Draughts of him that began it.

When

[315]

When a Fellow-Craftsman is chosen Warden of the Work under the Master, he shall be true to both Master and Fellows, and shall carefully oversee the Work in the Master's Absence, to the Lord's Prosit; and his Brethren shall obey him.

All Masons employed, shall meekly receive their Wages without Murmuring or Mutiny, and not desert the Master till the Work is sinished.

A younger Brother shall be instructed in Working, to prevent spoiling the Materials for Want of Judgment, and for increasing and continuing of Brotherly Love.

All the Tools used in Working shall be approved by the Grand Lodge.

No Labourer shall be employed in the proper Work of Masonry; nor shall free Masons work with those that are not Free, without an urgent Necessity; nor shall they teach Labourers and unaccepted Masons, as they should teach a Brother or Fellow.

VI. Of BEHAVIOUR, viz.

1. In the Lodge, while constituted.

You are not to hold private Committees, or separate Converfation, without Leave from the Master, nor to talk of any Thing impertinent or unseemly, nor interrupt the Master or Wardens, or any Brother speaking to the Master: Nor behave yourself ludicrously or jestingly while the Lodge is engaged in what is serious and solemn; nor use any unbecoming Language upon any Pretence whatsoever; but to pay due Reverence to your Master, Wardens, and Fellows, and put them to worship.

If any Complaint be brought, the Brother found guilty shall stand to the Award and Determination of the Lodge, who are the proper and competent Judges of all such Controversies, (unless you carry it by Appeal to the GRAND LODGE) and to whom they ought to be referred, unless a Lord's Work be hindered the mean while, in which Case a particular Reference may be made; but

you

you must never go to Law about what concerneth Masonry, without an absolute Necessity apparent to the Lodge.

2. Behaviour after the LODGE is over, and the Brethren not gone.

You may enjoy yourselves with innocent Mirth, treating one another according to Ability; but avoiding all Excess, or forcing any Brother to cat or drink beyond his Inclination, or hindering him from going when his Occasions call him, or doing or faying any thing offensive, or that may forbid an easy and free Converfation; for that would blast our Harmany, and defeat our lau-Therefore no private Piques or Quarrels must dable Purposes. be brought within the Door of the Lodge, far less any Quarrels about Religion, or. Nations, or State-Policy, we being only, as Masons, of the Catholic Religion-above-mentioned; we are also of all Nations, Tongues, Kindreds, and Languages, and are refolved against all **Politicity**, as what never yet conduced to the Welfare of the Lodge, nor ever will. This Charge has been always strictly enjoined and observed; but especially ever fince the Reformation in BRITAIN, or the Differt and Seccifion of these Nations from the Communion of Rome.

3. Behaviout when Brethren meet without Strangers, but not in a Lodge formed.

You are to falute one another in a courteons Manner, as you will be instructed, calling each other Brother, freely giving mutual Instruction as shall be thought expedient, without being overseen or overheard, and without encroaching upon each other, or derogating from that Respect which is due to any Brother, were he not a Mason: For though all Masons are as Brethren upon the same Level, yet Masonry takes no Honour from a Man that he had before; nay, rather it adds to his Honour, especially if he has deserved

[317]

deserved well of the Brotherhood, who must give Honour to whom it is due, and avoid ill Manners.

4. Behaviour in Presence of Strangers not Malons.

You shall be cautious in your Words and Carriage, that the most penetrating Stranger shall not be able to discover or find out what is not proper to be intimated; and sometimes you shall divert a Discourse, and manage it prudently for the Honour of the worshipful Fraternity.

5. Behaviour at Home, and in your Neighbourhood.

You are to act as becomes a moral and wise Man; particularly, not to let your Family, Friends, and Neighbours know the Concerns of the Lodge, &c. but wisely to consult your own Honour, and that of the ancient Brotherhood, for Reasons not to be mentioned here. You must also consult your Health, by not continuing together too late, or too long from home, after Lodge Hours are past; and by avoiding of Gluttony and Drunkenness, that your Families be not neglected or injured, nor you disabled from Working.

6. Behahiour towards a strange Brother.

You are eautiously to examine him, in such a Method as Pruzence shall direct you, that you may not be imposed upon by an ignorant salse *Pretender*, whom you are to reject with Contempt and Derision, and beware of giving him any Hints of Knowledge.

But if you discover him to be a true and genuine Brother, you are to respect him accordingly; and if he is in want you must relieve him if you can, or else direct him how he may be relieved: You must employ him some Days, or else recommend him to be employed. But you are not charged to do beyond your Ability, only

[318]

only to prefer a poor Brother, that is a good Man and true, before any other poor People in the same Circumstances.

FINALLY, All these Charges you are to observe, and also those that shall be communicated to you in another Way; cultivating Brotherly Love, the Foundation and Cape-stone, the Cement and Glory of this ancient Fraternity, avoiding all Wrangling and Quarrelling, all Slander and Backbiting, not permitting others to flander any honest Brother; but defending his Character and doing him all good Offices, as far as is confistent with your Honour and Safety, and no farther. And if any of them do you Injury, you must apply to your own or his Lodge; and from thence you may appeal to the GRAND LODGE at the Quarterly Communication, and from thence to the annual GRAND LODGE, as has been the antient laudable Conduct of our Forefathers in every Nation; never taking a legal Courfe, but when the Case cannot be otherwise decided; and patiently listening to the honest and friendly Advice of Master and Fellows, when they would prevent your going to Law with Strangers, or would excite you to put a speedy Period to all Law-Suits, that so you may mind the Affair of MASONRY with the more Alacrity and Success; but with Respect to Brothers or Fellows at Law, the Master and Brethren shall kindly offer their Mediation, which ought to be thankfully submitted to by the contending Brethren; and if that Submission is impracticable, they must however carry on their Process, or Law-Suit, without Wrath and Rancour (not in the common Way) faying or doing nothing which may hinder Brotherly Love, and good Offices to be renewed and continued; that all may see the benign Influence of MASONRY, as all true Masons have done from the Beginning of the World, and will do to the End of Time.

Amen, so mote it be.

ART. III. That the Treasurer's Accounts be approved and allowed from time to time by the Grand Lodge, and figned by the GRAND MASTER, or Deputy Grand Master; and the Account so signed to be entered by the Grand Secretary, in the GRAND MASTER'S Book.

ART. IV. If it should be found necessary for the Treasurer to employ under him an Assistant or Clerk, he may be at Liberty so to do, such Clerk or Assistant to be a Brother and a Master Mason, and to have such Allowance, from time to time, as the Grand Lodge shall think fit out of the Money passing through the Treasurer's Hands, not exceeding one Shilling in the Pound; and this to be be charged and allowed in the Treasurer's Accounts: But such Assistant or Clerk is not to be considered as a Member of

the Grand Lodge; nor is he to speak therein, without being allowed or commanded so to-do.

Of the GRAND SECRETARY.

ART. I. The Grand Secretary is nominated yearly at the Grand Feast, by the GRAND MASTER; and is by his Office a Member of the Grand Lodge, and may have a Clerk or Assistant, if he thinks sit, who must be a Brother and a Master Mason; but is not, during such time, to be considered as a Member of the Grand Lodge; nor is he to speak therein, without being allowed or commanded so to do.

Of PROVINCIAL GRAND MASTERS.

ART. I. The Office of PROVINCIAL GRAND MASTER was found particularly necessary in the Year 1726; when the extraordinary Increase of the Craftsmen, and their travelling into distant Parts, and convening themselves in Lodges, required an immediate Head, to whom they might apply in all Cases, where it was not possible to wait the Decision or Opinion of the Grand Lodge.

ART. II. The Appointment of this Grand Officer is a Prerogative of the GRAND MASTER; from whom, or in his Absence from his Deputy, a Deputation may be granted to such Brother of Eminence and Ability in the Crast, as he or either of them shall think proper; not for Life, but during Pleasure.

ART. III. The PROVINCIAL GRAND MASTER thus deputed, is invested with the Power and Honour of a Grand Master in his particular District; and is intitled to wear the Cloathing of a GRAND OFFICER, to constitute Lodges within his own Province, and in all publick Assemblies to walk immediately after the Grand Treasurer. He is also empowered to appoint a Deputy, Wardens, Treasurer, Secretary, and Sword-bearer, who are entitled to wear

the Cloathing of Grand Officers, while they officiate as such, within that particular District; but at no other Time or Place.

ART. IV. He is enjoined to correspond with the Grand Lodge, and to transmit a circumstantial Account of his Proceedings, at least once in every Year. At which Times, he is required to send a List of those Lodges he has constituted; their Contributions for the general Fund of Charity; and the usual Demand, as specified in his Deputation, for every Lodge he has constituted.

See the List of Provincials, after the List of Grant Masters.

Of the COMMITTEE of CHARITY.

By the original Order and Constitution of Nature, Men are so made and framed, that they of Necessity want one another's Assistance for their mutual Support and Preservation in the World: Being fitted by an implanted Disposition to live in Societies, and establish themselves into distinct Bodies, for the more effectual Promulging and Propagating a Communication of Arts, Labour, and Industry, of which, CHARITY and mutual FRIENDSHIP is the common Bond. It is in this Respect only, that all the human Race stand upon a Level, having all the same Wants and Desires, and are all in the same Need of each other's Assistance; as by this common Cement, every one is bound to look upon himself as a Member of this universal Community, and especially the Rich and Great; for the truly noble Disposition never shines so bright, as when engaged in the noble Purposes of social Love, Charity, and Influenced by these great and good Principles, Benevolence,

ART. I. The Grand Lodge came to a Resolution to consider of the most prudent and effectual Method of collecting and disposing of what Money should be lodged with them in Charity, towards the Relief only of a true Brother, fallen into Poverty and Decay; but of none else.

When it was refolved, That each particular Lodge might dispose of their own Charity for poor Brothers, according to their own U u By-

By-Lawn; until it should be agreed by all the Lodges (in a new Regulation) to carry in the Charity, collected by them, to the Grand Lodge, at the Quarterly or Annual Communication; in order to make a common Stock for the more handsome Relief of poor Brethren.

ART. II. In consequence of which Regulation at the Grand Modes, on Nov. 21, 1724, CHARLES LENNOX, Duke of Richmond, Lennox and Aubigny, being Grand Master;

Brother FRANCIS SCOTT, Earl of Delkeith (afterwards Duke of Buccleugh) the last Grand Master, proposed, That in order to promote the Charitable Disposition of FREE MASONS, and to render it more extensively beneficial to the Society, each Lodge muy make a certain Collection, according to Ability, to be put into a Join't-Stock, ladged in the Hands of a Thrasurer, at every Quarterly Communication, for the Relief of distressed Brethren that shall be recommended by the Contributing Longes to the Grand Officers from Time to Time.

The Motion being readily agreed to,

RICHMOND, Graid Moster, defined all present to come prepared to give their Opinion of it, at next Grant Hodge; which was held in ample Form, on March 17, 1724-5. When

ART. III. At the Ladge's Defire, Grand Mafter RICHMOND named a Committee for confidering of the best Methods to regulate the said Majons general Charity: They met, and chose for Chairman, WILLIAM COWPER, Esq. Clerk of the Parliament, who drew up the Report.

But the Affair requiring great Deliberation, the Report was not made till the Grand House metric ample Form, on Nav. 275, 1725, when Richmond, Grand Master, ordered the Report to be read. It was well approved, and recorded in the Book of the Grand Ladge; for which that Committee received publick Thanks; and Copies of it were ordered to be sent to the particular Ladges, in this Form:

The

The Committee, to whom it was referred to consider of proper Methods to regulate the general Charity, after several Meetings for that Purpose, came to the following Resolutions, which they submit to the Judgment of the Grand Lodge, as conducive to the End proposed by the Reference.

1. That it is the Opinion of the Committee, that the Contributions from the feveral Lodges be paid quarterly and voluntarily.

2. That no Brother be recommended by any Lodge, as an Object of this *Charity*, but who was a Member of some Regular Lodge, which shall contribute to the same *Charity*, on or before the 21st Day of *November*, 1724, when the general *Charity* was first proposed in the *Grand Lodge*.

3. That no Brother, who has been admitted a Member of any such Lodge, since that Time, or shall hereafter be so admitted, be recommended till three Years after fuch Admission: And as to the Methods or Rules to be observed by the Grand Linge, in reliewing such Brethren, who shall be qualified as aforesaid, whom they shall think fit upon Application to themselves, to relieve, viz. Those concerning the Circumstances of the Persons to be relieved, the Sums to be paid, the Times or Terms of Phyment, the Continuance, suspending, or taking off such Allowance, with the Reasons thereof, whether arising from the Circumstances of the afflifted Brother being bettered, or from his Behaviour, in any Respect, rendering him unfit to have it continued; and, in general, all other Circumstances attendings the regular and ordinary Distribution of the Charity, where the Grand Lodge think fit to put any one upon it, the Committee are of Opinion, they are most decently and securely left to the Wisdom, Care, and Discretion of the Grand Lodge, to act therein, from Time to Time, as Cases theil happen in a Manner most agreeable to the Exigencies of them; which, as the Committee cannot forfee with any Certainty, fo they are unable to lay down any fixed Proposals concerning them; but as it may fall out that a Brother, who is in all Respects qualified for Relief. and in Need of it, may by the Pressure of his Circumstances be anlT U u 2 forced

forced to apply, perhaps, a good while before a Quarterly Communication may be had, or the Grand Lodge affembled, for a present Relief or Subsistance, till he can make his Case known to the Grand Lodge, for their further Favour: The Committee took that Case into their particular Consideration; and as to that, are humbly of Opinion,

- 4. That three Pounds, and no more, may be given to any particular distressed Brother, who shall be recommended by any Lodge as an Object of this Charity, without the Consent of the Grand Lodge.
- 5. That the abovesaid casual Charity of three Pounds or under, be disposed of as there shall be Occasion, by a standing Committee of Five, to consist of the Grand Master, Deputy, and Senior Grand Warden for the Time being, and two other Members of the Grand Lodge, to be named by the Grand Master, of which Committee three always be to a Quorum. And it being absolutely necessary that, for collecting and disbursing the Sums which shall be given for so charitable a Purpose, there should be a Receiver or Treasurer publickly entrusted and known,
- 6. The Committee think it necessary, that every Treasurer, upon his Appointment, be desired to give the earliest general Notice he can, where he may be applied to, from Time to Time, for the Purposes of this Charity, as Need shall require. All which they submit to your Judgment and Direction.

ART. IV. Yet no TREASURER was found, till at the Grand Lodge, in ample Form, on June 24, 1727, Inchiquin, Grand Master, requested Brother Nathaniel Blakerby, Esq. to accept of that Office, which he very kindly undertook.

Then

[333]

Then also it was resolved, that the sour Grand Officers, for the Time being, together with Brother Martin Folkes, Francis Sorell, and George Payne, Esqrs; as a Committee of Seven, should, upon due Recommendations, dispose of the intended Charity; and fresh Copies of the Report were sent to the Lodges.

ART. V. At last this good Work of CHARITY was begun at the Grand Lodge, on Nov. 25, 1729, KINGSTON being Grand Master, and, in his Absence, Deputy Grand Master BLAKERBY, the Treasurer, in the Chair; who, after a warm Exhortation, ordered the Lodges to be called over a second Time, when some Officers gave in the Benevolence of their respective Lodges, for which they were thanked; and their Charity, being forthwith recorded, was put into the Hands of the Treasurer, as an hopeful Beginning: And other Lodges following the good Example,

ART. VI. At the Grand Louge, in due Form, on Des. 27, 1729, Deputy Grand Master BLAKERBY, the Treasurer, in the Chair, had the Honour to thank many Officers of Lodges, for bringing their liberal Charity: When by a Motion of Brother Thomas Batson, Counsellor at Law, the Grand Lodge ordained, That every new Lodge, for their Constitution, shall pay two Guineas towards this general Charity of Masons.

And ever fince, the Ladges, according to their Ability, have, by their Officers, fent their Benevolence to every Grand Lodge, exercipt on the Grand Feast Day: And several distressed Brothers have been handsomely relieved.

ART. VII. But the Committee of Seven being thought too few for this good Work, the Grand Mode, in due Form, on Aug. 28, 1736, Norrolk being Grand Master, and, in his Absence, Deputy Grand Master Blakerby, the Treasurer, in the Chair, resolved, That the Committee of Charity shall have added to them twelve Masters of contributing Lodges; that the sirst Twelve, in the printed List, shall be succeeded by the next Twelve, and so on: And that for Dispatch, any Five of them shall be a Quorum, provided one of the Five is a present Grand Officer. Accordingly,

The

[334]

The Committee of Charity met the Treasurer BLAKERBY the first Time, in the Mastership of Norrolk

On November 13, 1730: When

They considered the Petitions of some poor Brethren, whom they relieved, not exceeding three Pounds to each Petitioner: And adjourned, from Time to Time, for supplying the Distressed according to their Powers; or else recommended them to the greater Favour of the Grand Ledge.

ART. VIII. This Committee had not all their Powers at once: For, at the Example on Dec. 15, 1730, NORROLK being Grand Master, and, in his Absence, the Deputy BLAKERBY in the Chair, it was ordained, That for Dispatch, all Complaints and Informations about Charity shall be referred, for the Future, to the Committee of Charity; and that they shall appoint a Day for hearing the same, shall enter their Proceedings in their own Book, and shall report their Opinion to the Grand Lodge.

From this Time, the Minutes of the Committee of Charity have been read and confidered at every Grand Lodge, except on the Grand Feast Day.

ART. IX. At the Committee of Charity, March 16, 1730-1, it was agreed, That no Petition shall be read, if the Petitioner do not attend the Committee in Person; except in the Cases of Sickness, Lameness, or Imprisonment.

ART. XI. At the Committee of Charity, on June 18, 1731, it was agreed, That no poor Brother that has been once affiled, shall, a second Time, present a Petition, without some new Allegation well attested.

ART.

ART. XII. At the Grand Lange on June 8, 1732, Viscount Montagu being Grand Master, and, in his Absence, Deputy Grand Master Batson in the Chair, having signified, That not-withstanding the general Charity, some poor Brothers had molested Noblemen and others (being Masons) with private Applications for Charity, to the Scandal of the Crast; it was resolved, That any Brother who makes such private Applications for the Future, shall be for ever debarred from any Relief from the Committee of Charity, the Grand Lodge, or any Assens.

ART. XIII. At the Committee of Charity, on July 5, 1732, it was agreed, That no Brother shall be relieved, unless his Petition be attested by three Brothers of the Lodge to which he does, or did once, belong.

ART. XIV. At the Grand Louge, on Nov. 21, 1732, Viscount Montagu being Grand Master, and, in his Absence, Deputy Batson in the Chair, it was resolved, That all former and present Grand Officers, wis. Grand Masters, Deputies, and Wardens, with twenty Masters of contributing Lodges in a Rotation, according to the printed Lift, shall be Members of the Committee of Charity. And,

ART. XV. At the Brant Longe, on Dec. 13, 1733, upon the Motion of STRATHMORE, Grand Master, in the Chair, it was resolved, That ALL Masters of regular Lodges that have contributed to the Charity, within twelve Months past, shall be Members of the Committee, together with all former and present Grand Officers.

ART. XVI. That confidering the usual Business of a Quarterly Communication was too much for one Time; whatever Business cannot be dispatched here, shall be reserved to the Committee of Charity, and their Opinion reported to the next GRAND LODGE.

ART. XVII. That all Questions, debated at the faid Committee, shall be decided by a Majority of those present.

ART. XVIII. That all Petitions for Charity, presented to the Grand Lodge, shall be referred to the said Committee, who are to report their Opinion to the next Grand Lodge, viz. Whether or not

the Case of any distressed Brother deserves more Relief than is in the Power of the Committee to give?

ART. XIX. That the faid Committee shall twice give publick Notice, in some publick News Paper, of the Time and Place of their Meetings.

ART. XX. At the Grant Lodge, on Feb. 24, 1734-5, CRAUFURD, Grand Master, in the Chair, it was recommended by the Committee, and now resolved here, That no Master of a Lodge shall be a Member of the said Committee, whose Lodge has not contributed to the general Charity, during twelve Months past.

ART. XXI. That one of the Brethren, figning and certifying a poor Brother's Petition, shall attend the Committee to attest it.

ART. XXII. At the Grant Todge, on March 31, 1735, upon the Motion of CRAUFURD, Grand Master, in the Chair, it was resolved, That no extraneous Brothers, that is, not regularly made, but clandestinely, or only with a View to partake of the Charity; nor any assisting at such irregular Makings, shall be ever qualified to partake of the Masons general Charity.

ART. XXIII. That the Brothers, attesting a Petition for Charity, shall be able to certify, that the Petitioner has been formerly in reputable, at least, in tolerable Circumstances.

ART. XXIV. That every Petition received, shall be signed or certified by the Majority of the Lodge, to which the Petitioner does, or did belong.

ART. XXV. That the Name and Calling of the Petitioner be expressly mentioned.

ART. XXVI. At the Grand Hodge, on April 6, 1736, WEYMOUTH being Grand Master, and, in his Absence, Deputy Grand Master WARD in the Chair; upon the Motion of the Committee of Charity, it was resolved, That no Petition for Charity shall be received, which has not been offered first to the Secretary, and laid in his Hands ten Days at least, before the Meeting of the Committee of Charity, that he may have Time to be informed of its Allegations, if they are dubious.

ART.

ART. XXVII. At the Brand Hodge, on March 20, 1739, RAYMOND, Grand Master, it was resolved, That a Brother's being intitled to, and receiving Relief out of, the Charity of a particular Lodge, in Pursuance of the Laws thereof, shall be no Objection to bis being relieved out of the general Charity, in case such Lodge shall contribute to the said general Charity, according to the Laws of the Society.

ART. XXVIII. At the Grand Lodge, on December 3, 1741, MORTON, Grand Master, it was resolved, That before the Brethren proceed to Business in any Committee of Charity, all the Laws relating to the Disposal of the general Charity of this Society be first read; and that, for the Future, no Petition shall be received, unless every Brother shall, at the Time of his signing the same, be a Member of some regular Lodge, and the Name of such his Lodge be always specified.

ART. XXIX. At the Grand Todge, on June 18, 1752, CARYSFORT, Grand Master, it was ordered, That the Sum of three Guineas be paid to the Grand Secretary, at every Communication and Annual Assembly, for his own incidental Charges, and that of an Assistant Secretary, out of the public Fund.

Ordered, That any foreign Brother, after due Examination, shall be relieved by this *Committee*, with any Sum not exceeding five Pounds, any Law to the contrary notwithstanding.

ART. XXX. At the Grand Lodge, on July 24, 1755, CARNARVAN, Grand Master, it was ordered, That, for the Future, every Certificate granted to a Brother of his being a Mason, shall be sealed with the Seal of Masonry, and signed by the Grand Secretary; for which five Shillings shall be paid to the Use of the general Fund of Charity.

Thus the COMMITTEE of CHARITY has been established among the FREE and ACCEPTED MASONS of ENGLAND, who have very generously contributed to their general Fund, and do still persevere in that good Work.

ART,

[338]

ATR. XXXI. The Committee regularly meets, according to the Summons of the GRAND MASTER, or his Deputy, and has relieved many distressed Brothers with small Sums, not exceeding 51. to each: But the Trank Lodge has ordered the Treasurer to pay to some Petitioners, ten, or fifteen, or twenty Pounds, as they thought the Case required. So that the Distressed have found far greater Relief from this general Charity, than can be expected from particular Lodges; and the Contributions, being paid by the Lodges, at various Times, have not been burdensome.

ART. XXXII. The TREASURER'S Accounts have been audited and balanced at every Grand Lodge; whereby all know the Stock in Hand, and how every Particular of the Charity has been disposed of; every Thing being duly recorded in the Grand Lodge-Book, and in that of the Committee, of which every Master of a contributing Lodge is a Member.

Of the STEWARDS.

It having been formerly the Custom, for the two Grand Wardens to take upon themselves the Trouble of regulating and conducting the Annual Grand Feast, it has since been thought proper, in order to relieve them from that extraordinary Trouble, and that all Matters might be expeditiously and properly managed, that the Grand Master, or his Deputy, should have a Power to nominate and appoint a certain Number of Stewards, to whom the Conduct and Care of the same should be committed; and that all Things relative to the Feast should be decided among them by a Majority of Votes; except the Grand Master, or his Deputy, should interfere; and, in consequence thereof, the following Regulations have been entered into, viz.

ART. I. That at the Feast, the Stewards shall open no Wine till Dinner be laid on the Tables; that the Members of each Lodge shall sit together, as much as possible; that after Eight of the Clock at Night, the Stewards shall not be obliged to furnish any Wine or other

[839]

other Liquors; and that either the Money or Tickets shall be returned to the Stewards.

ART. II. On Nov. 26, 1728, the Office of Stewards, that had been disused at three preceding Feasts, was revived by the Grand Lodge, and their Number settled to be always Twelve.

ART. III. The Stewards for the Year are allowed to have fewels of Silver (though not gilded) pendant to red Ribbons, about their Necks, to bear white Rods, and to line their white Leather Aprons with red Silk.

Former Stewards are also allowed to wear the same Sort of Aprons, white and red.

ART. IV. Each of the acting Stewards is allowed, for the Future, at the Feast, the Privilege of naming his Successor in that Office, for the ensuing Year.

ART. V. On June 24, 1735, upon an Address from those that have been Stewards, the Grand Lodge, in consideration of their past Service and suture Usefulness, ordained,

That they should be constituted a Lodge of Masters, to be called the STEWARDS LODGE; to be registered as such in the Grand Lodge Book and printed Lists, with the Times and Place of their Meetings.

ART. VI. That the Stewards Lodge shall have the Privilege of sending a Deputation of Twelve to every Grand Lodge, viz. the Master, two Wardens, and nine more; and each of the Twelve shall vote there; and each of them that attends shall pay Half a Crown, towards the Expence of the Grand Lodge.

ART. VII. That no Brother, who has not been a Steward, shall wear the same Sort of Aprons and Ribbons.

ART. VIII. That each of the twelve Deputies from the Stewards Lodge shall, in the Grand Lodge, wear a peculiar Jewel suspended in the red Ribbon; the Pattern of which was then approved.

Of Constitutions.

The Ancient Manner of CONSTITUTING a Lodge.

A new Lodge, for avoiding many Irregularities, should be solemnly constituted by the GRAND MASTER, with his Deputy and Wardens; or, in the Grand Master's Absence, the DEPUTY acts for his Worship, the Senior Grand Warden as Deputy, the Junior Grand Warden as the Senior, and a present Master of a Lodge as the Junior.

Or if the *Deputy* is also absent, the GRAND MASTER may depute either of his *Grand Wardens*, who can appoint others to be *Grand Officers* pro Tempore.

The Lodge being opened, and the Candidates, or the new Master and Wardens being yet among the Fellow-Crasts, the GRAND MASTER shall ask his Deputy, if he has examined them, and finds the Candidate Master well skilled in the Noble Science and the Royal Art, and duly instructed in our Mysteries, &c.

The Deputy, answering in the Affirmative, shall, by the Grand Master's Order, take the Candidate from among his Fellows, and present him to the Grand Master, saying, Right Worflipful Grand Master, the Brethren here desire to be formed into a Lodge; and I present my worthy Brother A. B. to be their Master, whom I know to be of good Morals and great Skill, true and trusty, and a Lover of the whole Fraternity wheresoever dispersed over the Face of the Earth.

Then the GRAND MASTER, placing the Candidate on his left Hand, having asked and obtained the unanimous Consent of the Brethren, shall say, I constitute and form these good Brethren into a New Lodge, and appoint you, Brother A. B. the Master of it, not doubting of your Capacity and Care to preserve the Cement of the Lodge, &c. With some other Expressions that are proper and usual on that Occasion, but not proper to be written.

Upon

[341]

Upon this, the Deputy shall rehearse the Charges of a Master; and the GRAND MASTER shall ask the Candidate, saying, Do you submit to these Charges, as Masters have done in all Ages? And the New Master signifying his cordial Submission thereunto,

The GRAND MASTER shall, by certain significant Ceremonies and ancient Usages, instal him, and present him with the Book of Constitutions, the Lodge-Book, and the Instruments of his Office; not altogether, but one after another; and after each of them the Grand Master or his Deputy shall rehearse the short and pithy Charge that is suitable to the Thing presented.

Next, the Members of this New Lodge, bowing all together to the Grand Master, shall return his Worship their Thanks; and shall immediately do Homage to their New Master, and signify their Promise of Subjection and Obedience to him by the usual Congratulation.

The Deputy and Grand Wardens, and any other Brethren prefent, that are not Members of this New Lodge, shall next congratulate the NEW MASTER; and he shall return his becoming Acknowledgements to the GRAND MASTER first, and to the rest in their Order.

Then the GRAND MASTER orders the New Master to enter immediately upon the Exercise of his Office, viz. in chusing his Wardens: and, calling forth two Fellow-Crasts (Master Masons) presents them to the Grand Master for his Approbation, and to the New Lodge for their Consent. Upon which

The Senior or Junior Grand Warden, or some Brother for him, shall rehearse the Charges of each Warden of a private Lodge: And they signifying their cordial Submission thereunto,

The New MASTER shall present them singly, with the several Instruments of their Office, and in due Form instal them in their proper Places: And the Brethren of this New Lodge shall signify their Obedience to those New WARDENS by the usual Congratulation.

Then

Then the Grand Master gives all the Brethren Joy of their New Master and Wardens, and recommends Harmony; hoping their only Contention will be a laudable Emulation in cultivating the Royal Art and the Social Virtues.

Upon which, all the New Lodge bow together in returning Thanks for the Honour of this Constitution.

The GRAND MASTER also orders the Secretary to register this New Lodge in the Grand Lodge Book, and to notify the same to the other particular Lodges; and after the Master's Song, he orders the Grand Warden to close the Lodge.

This is the Sum, but not the whole Ceremonial by far; which the Grand Officers can extend or abridge at Pleasure; explaining Things that are not fit to be written! Though none but those, that have acted as Grand Officers, can accurately go through all the several Parts and Usages of a new Constitution, in the just Solemnity.

ART. I. Ordered, That every New Lodge, for the Future, shall pay two Guineas for their Constitution, to the general Fund of Charity.

ART. II. The Precedency of Lodges is grounded on the Seziority of their Constitution.

ART. III. No New Lodge is owned, nor their Officers admitted into the Grand Lodge, unless it be regularly constituted and registered; and upon the Dissolution of a Lodge so constituted, the Constitution shall be delivered up to the Grand Master, or his Deputy; for a Constitution shall upon no Account be sold, or otherwise disposed of.

ART. IV. The Jewels and Furniture of every Lodge shall belong to, and be the Property of, the Master, Wardens, and Bretheren of such Lodge; and the Master of the House where such Lodge is held shall have no other Property therein, than as appertaineth to him as a private Member, and no Master of any publick House shall be suffered to own, or purchase, such Jewels and Funiture, for the Purpose of having a Lodge constituted or held

[343]

at his House, under the Penalty (if discovered) of forseiting such Constitution.

ART. V. If any Set or Number of Masons shall take upon themselves to form a Lodge, without the GRAND MASTER'S Warrant, the regular Lodges are not to countenance them, nor own them as fair Bretbren, duly formed, nor approve of their Acts and Deeds; but must treat them as Rebels, until they humble themselves, as the Grand Master shall in his Prudence direct, and until he approve of them by his Warrant signified to the other Lodges; as the Custom is, when a New Lodge is to be registered in the Grand Lodge Book.

Of MARINGS.

ART. I. No Lodge shall make more than five new Brothers at one and the same Time, without an urgent Necessity; nor any Man under the Age of twenty-one Years (who must be also his own Master) unless by a Dispensation from the GRAND MASTER or his DEPUTY.

ART. II. That no Lodge shall ever make a Mason without due Enquiry into his Character; neither shall any Lodge be permitted to make and raise the same Brother, at one and the same Meeting, without a Dispensation from the Grand Master or his Deputy, which, on very particular Occasions only, may be requested.

N. B. This Article is not to extend to Foreigners, or Natives of these Kingdoms, whose particular Business it shall clearly appear to the Master obliges them immediately to go Abroad; but if the Master makes, and raises such Person on the same Night; he must give the first convenient Notice to the Grand Master or Deputy Grand Master of his having so done.

ART. III. That no Lodge shall ever make a Mason for a less Sum than One Guinea; and that Guinea to be applied either to the private Fund of the Lodge, or to the publick Charity, without deducting from such Deposit, any Money towards the defraying

[344]

the Expence of the T-r, &c. under the Forfeiture of their Constitution. But this not to extend to the Making of Waiters, Servitors, or menial Servants, who may be instituted by the Lodge they are to serve; provided such Making or Institution be done without Fee or Reward.

ART. IV. Every new Brother, at his Entry, is decently to cloath the Lodge, that is, all the Brethren present; and to deposit something for the Relief of indigent and decayed Brethren, as the Candidate shall think sit to bestow, over and above the small Allowance that may be stated in the By-Laws of that particular Lodge: Which Charity shall be kept by the Cashier *.

Also the Candidate shall solemnly promise to submit to the Conflutions, and other good Usages, that shall be intimated to him in Time and Place convenient.

ART. V. Every Brother concerned in making Masons clandestinely, shall not be allowed to visit any Lodge till he has made due Submission, even though the Brothers so made may be allowed.

ART. VI. None, who form a Stated Lodge without the Grand Master's Leave, shall be admitted into regular Lodges, till they make Submission and obtain Grace.

ART. VII. If any Brethren form a Lodge without Leave, and shall irregularly make new Brothers, they shall not be admitted into any regular Lodge, no not as Visitors, till they render a good Reason, or make due Submission.

ART. VIII. Seeing that some extraneous Brothers have been made lately in a clandestine Manner, that is, in no regular Lodge, nor by any Authority or Dispensation from the Grand Master, and upon small and unworthy Considerations, to the Dishonour of the Craft;

The Grand Lodge decreed, that no Person so made, nor any concerned in making him, shall be a Grand Officer, nor an

Nor is this inherent Privilege subject to a Dispensation, because the Members of a particular Lodge are the best Judges of it; and because if a turbulent Member should be imposed upon them, it might spoil their Harmony, or hinder the Freedom of their Communication; or even break and disperse the Lodge, which ought to be avoided by all True and Faithful.

But it was found inconvenient to inflift upon Ununimity in Several Cases: And therefore the GRAND MASTERS have allowed the Linger to admit a Member, if not above three Ballots are against him! though some Lodges desire no such Allowance.

ART. III. The Majority of every particular Lodge, when congregated, not elfe, shall have the Privilege of giving Instructions to their Master and Wardens, before the Meeting of the Grand Chapter or Quarterly Communication; because the said Officers are their Representatives, and are supposed to speak the Sentiments of their Brethren at the said Grand Lodge.

Upon a fudden Emergency, the Grand Lodge has allowed a private Brother to be present, and with Leave asked and given, to fignify his Mind, if it was about what concerned Masonry.

ART. IV. All particular Lodges are to observe the same Useges as much as possible; in order to which, and also for cultivating a good Understanding among Free-Masons, some Members of every Lodge shall be deputed to visit the other Lodges, as often as shall be thought convenient.

The same Usages, for Substance, are actually observed in every Lodge; which is much owing to visiting Brothers, who compare the Usages.

ART. V. If any Lodge, within the Bills of Mortality, shall cease to meet regularly, during twelve Months successive, its Nume and Place shall be crazed or blotted out of the Grand Lodge Book and engraved List: And if they petition to be again inserted, and owned

Of VISITORS.

No Vifitor, however skilled in Majonry, shall be admitted into a Lodge, unless he is personally known to, or well wonched for and recommended by one of that Lodge present. Nor shall any Perfon made a Mason in England, under any other Constitution but this, be admitted as a Visitor.

Of REMIOVALS.

ART. I. If a particular Lodge remove to a New Place for their flated Meeting, the Officers shall immediately signify the same to the Secretary.

The Brand Lange made the following REGULATION.

ART. II. Whereas Disputes have arisen about the Removal of Ledges from one: House to another, and it has been questioned in whom that Power is wested; it is hereby declared,

That no Lodge shall be removed without the Master's Knowledge; that no Motion be made for removing in the Master's Absence; and that if the Motion be seconded or thirded, the Master shall order Summons to every individual Member, specifying the Business, and appointing a Day for Hearing and Determining the Affair, at least Ten Days before: And that the Determination shall be

An ODE on MASONRY.

-The Words by Brother Jackson, and for to Musick by Brother Gilding.

I.

Mystic Truths Urania brings;

Friendly Visitant, to Thee

We owe the Depths of MASONRY:
Fairest of the Virgin Choir,
Warbling to the golden Lyre,
Welcome, here thy ART prevail:
Hail! divine Urania, hail!

Here in Friendship's sacred Bower,
The downy wing'd, and smiling Hour,
Mirth invites, and social Song,
Nameless Mysteries among;
Crown the Bowl and fill the Glass,
To ev'ry Virtue, ev'ry Grace,
To the Brotherhood resound,
Health, and let it thrice go round.

III.

We restore the Times of Old,
The blooming glorious Age of Gold;
As the new Creation free,
Blest with gay Euphrofine;
We with Godlike Science talk,
And with fair Astrea walk;
Innocence adorns the Day,
Brighter than the Smiles of May.

Pour

Pour the roly Wine again, Wake a louder, louder Strain; Rapid Zepbyrs, as ye fly, Waft our Voices to the Sky; While we celebrate the NINE, And the Wonders of the Trine; While the Angels fing above, As we below, of PEACE and LOVE.

The MASTER's SONG.

TE fing of Masons ancient Fame! VV Lo, Eighty Thousand Craftimen rise Under the MASTERS of great Name, More than Three Thousand Just and Wise. Employ'd by SOLOMON the SIRE, And Gen'ral MASTER Mafor too, As HIRAM was in stately Tyre, Like Salem built by Masons wee. H.

The Royal Art was then Divine, ... The Craftsmen counsell'd from above, The Temple was the GRAND DESIGN, The wondring World did All approve. Ingenious Men from ev'ry Place with Came to furvey the glorious Pile.: And when return'd, began to trace And imitate its lofty Stile.

At length the Grecians came to know Beometry, and learn'd the Art PYTHAGOR'AS was rais'd to show, And glorious Euclid to impart: Great Archimedes too appear'd, 👊 And Carthaginian Masters bright; Till Roman Citizens uprear'd The Art with Wisdom and Delight.

I.

N, on, my dear Brethren, pursue your great Lecture, And refine on the Rules of old Architecture: High Honour to Masons the Craft daily brings. To those Brothers of Princes and Fellows of Kings.

U.

We drove the rude Danhals and Goths off the Stage, Reviving the Art of Augustus's fam'd Age: And Vespasian destroy'd the vast Temple in vain, Since so many now rise in Carnarvan's mild Reign.

The noble five Orders compos'd with such Art, Will amaze the fixt Eye, and engage the whole Heart: Proportion's sweet Harmony gracing the Whole, Gives our Work, like the glarious Creation, a Soul.

See, see, behold here, what rewards all our Toil, Inspires our Genius, and bids Labour smile:
To our noble GRAND MASTER let a Bumper be crown'd, To all Masters a Bumper, so let it go round.

The Deputy Grand Master informed the Grand Lodge, that the Grand Master had been pleased to appoint Brother Thomas French Grand Secretary, in the room of Brother Samuel Spencer, deceased.

The usual ceremonies being observed, a collection from the several Lodges was made for the General Charity.

The Grand Master in the Chair then acquainted the Brethren, That at a Committee of Charity held at the Horn Tavern in Fleet-street, on Friday the 21st instant, he had communicated

Ordered, That the Thanks of the Grand Lodge be transmitted to his Grace the Duke of BEAUFORT, Grand Master of Masons, for his particular regard and great attention to the interest, ho-

nour, and prosperity of the Society.

The Grand Master in the Chair then informed the Brethren, That at the said Committee he had presented a Plan for raising a Fund to build a Hall, and purchase Jewels, Furniture, &cc. for the Grand Lodge, independent of the General Fund of Charity; that he apprehended the accomplishment of such a design would not only give a function to our assemblies, but be a proper prelude to an Incorporation, should it be the opinion of the Society to obtain a charter for that purpose; that the said Plan had been carefully perused by the Brethren present at the said Committee; and that several amendments having been made thereto, the following resolutions had been agreed to, and referred to this Grand Lodge for confirmation.

I. That every Grand Officer shall contribute annually, in proportion to the dignity of his office, not less than the following Sums:

X. That a book shall lie open in every Lodge for the voluntary contributions of the Members, to be applied to the

purposes of the Grand Lodge.

The above resolutions being duly considered, and it being found that they will tend in a great measure to augment the General Fund of Charity, as all extra charges will be desirated out of this New Fund, and also be the most effectual means of enabling the Society to carry their designs into execution;

Resolved,

Refolved. That the said resolutions do meet with the approbation of this Grand Lodge, and that they be strictly enforced by all Regular Lodges and Masons under the Constitution of England, under the title of Regulations for raising a Fund to build a Holl, and purchase Jewels, Furniture, &c. for the GRAND LODGE, independent of the General Fund of Charity; and that they be forthwith printed and transmitted to all the Lodges on toward.

vern in the Strand, Wednesday, 7th Feb. 1770.
